

# SSW Group Ltd – Case Study

## Project Overview

SSW Group Ltd was contracted to design, supply, and install roofboxes at 2 Aldersbury Square, Moorgate, London. The project involved the professional installation of **28 prefabricated roofboxes** across the building, constructed with durable sandwich panel systems to provide long-term performance and compliance with modern building standards.

## Scope of Work

The works were delivered in a structured sequence to ensure precision and safety:

1. Survey and preparation of existing roof areas
2. Fabrication of bespoke sandwich panel roofboxes
3. Professional installation of 28 roofboxes with airtight sealing
4. Quality assurance checks and final sign-off

## Compliance & Reporting:

- Full Installation Records

Detailed installation documentation generated and archived to ensure full traceability.

- Live Project Tracking

Daily progress and snagging tracked digitally for streamlined delivery.

## Materials Used

- Sandwich panels (high-performance, insulated)
- Steel fixings and support frames
- Sealants for airtight and watertight finishes
- Protective coatings for durability

## Challenges & Solutions

- **Urban Access Restrictions** – Moorgate’s busy location required careful coordination for deliveries and crane operations. This was managed through scheduled logistics and local authority approvals.
- **Roof-Level Safety** – Working at height was addressed through advanced edge protection systems and strict adherence to safety protocols.

## Client Feedback

Tilbury contracts commended SSW Group Ltd for the **professional quality and efficiency** of the roofbox installations. Particular praise was given to the smooth project management and the high standard of workmanship.

## Results

- **28 roofboxes installed** with full professional finish
- Delivered within agreed project programme
- Full compliance with safety and insulation standards
- Zero health & safety incident
