## (Technical) Due Diligence

SUPPORTING YOUR GROWTH  
IN A DYNAMIC AND CHANGING WORLD

---

At Katoni Engineering, we have a wealth of highly skilled engineers from all core disciplines ready to help support our clients.

In the world of business, delivering growth inline with your stakeholder's expectations can necessitate alternate growth strategies. We can provide you with a confidential external resource to unlock the growth opportunity. Our clients inorganic growth can be everything from a relatively small acquisition of equity in an undeveloped business opportunity or much larger in the form of an entire corporate acquisition.

Technical due diligence is an independent and comprehensive review of every technical aspect of an investment to help fully describe and characterise it before an investment decision is made or a truly independent health check (CPR – Competent Person Review).

### Our Due Diligence Services

As a function of our breadth of experience we can tailor our services to provide the exact balance of experience to support the size and complexity of the review as follows:

#### In-depth Industry Knowledge and Understanding

Our technical skill enables everything from remote desktop 'cold eyes' reviews to direct seller face to face interaction, from independent process modelling to preparing cost estimates for process changes and legislative/safety enhancements.

#### Integrity and Future Potential

As a product the breadth of skilled engineers, we have the experience to objectively look at any system to determine the risk factors that could limit an asset realising its full potential. This is supplemented by our offshore teams capable of 'walking the lines' to facilitate a truly independent offshore inspections and assessment.

#### Risk Management

Effective risk identification and ranking will always play a key role in due diligence as a product its ability to concisely describe a threat or opportunity to a wide-ranging audience with a quantified ranking that can typically neutralise opinion. Early in a due diligence work this is the understanding behind 'red flag' reviews that can halt an investment progress early in its tracks.
