

Stay Ahead of Hospital Performance

Know what's changing, and what to do next

Most hospitals operate reactively, acting only after performance issues or funding drops occur. Leadership rarely gets proactive, independent clarity on what's truly changing, both financially and operationally.

3terra's Focused Insights deliver clear, data-driven insight before issues escalate. Last year, hospitals used these insights to launch focused initiatives to reduce LOS, improve ED wait times, and educate physicians.

What You Receive Each Quarter with 3terra's Focused Insights:

An independent, tailored analysis covering key topics, including:

- ✓ **Weighted cases:** to identify key factors driving hospital weighted activity change
- ✓ **Funded volume risks and forecasts:** to understand projected impacts of changing care activity
- ✓ **Conservable day opportunities:** to quantify the financial impact and improvement opportunities
- ✓ **Emergency department performance:** to identify key wait times trends and care quality indicators
- ✓ **Many more**, including quality indicators like readmissions and ALC

BUSINESS IMPACT

- Earlier identification of financial and clinical risks and opportunities
- Make decisions based on evidence instead of anecdotes
- Cross-functional alignment between hospital leaders
- Independent evaluation and validation of opportunities

DELIVERY

- Delivered as an Executive-ready PDF package
- Presented and explained live to hospital stakeholders
