

# Unlock the Value of your EMR Data

Turn EMR data into measurable recovery.

Your EMR contains the information needed to strengthen data quality and recover funding—but accessing it often relies on manual extracts, one-off reports, and limited analytics capacity.

**3terra's Enhanced EMR Integration Package** brings critical EMR data directly into DQA, enabling EMR-backed validation, faster audits, and less rework. The result: greater recovered weight and funded volumes, with significantly less manual effort.

## What Is Enabled When Using 3terra's Enhanced EMR Integration Package:

- ✓ **Measurable Impact:** 15–30% improvement in weight and funded volume yield from DQA
- ✓ **New EMR-derived checks:** based on orders/results, provided care, and patient attributes
- ✓ **Coding-time context:** provide case weight and funding indicators context to coders at the time of coding
- ✓ **Streamline review:** embedded evidence from the EMR reduces system switching during audit
- ✓ **Eliminate manual extracts:** Remove one-off reports, spreadsheets and repeated extraction burden

## BUSINESS IMPACT

- Higher DQA weight and funding recovery
- Increased initial abstract quality
- Fewer chart touchpoints by coders
- Preserve Decision Support and HIM resource capacity

## IMPLEMENTATION

- Quickly operational after initial setup
- Minimal IT effort required, fully supported by 3terra
- Secure, least privilege access, with all data remaining within the hospital

See how integrating EMR data can impact quality and recovery

Available as an extension of the DQA platform starting June 2026.
