

The Data Quality Platform Trusted by Canada's Leading Hospitals

20+ years of Canadian leadership

3terra's DQA platform helps Canadian hospitals improve coding accuracy and strengthen data quality.

Our average hospital client sees a 10x ROI on their investment. We ensure your data reflects the complexity of care you provide while helping your team navigate complex and evolving methodologies.

What DQA Does for Your Hospital

A specialized suite of software tools to optimize clinical coding and monitor data quality.

- ✓ **Automated Audits:** Reviews 100% of coded cases to focus energy on highest-impact cases.
- ✓ **Accurate Coding:** The backbone of hospital funding and performance measurement.
- ✓ **Integrated Data:** Brings data from across your entire hospital into a single environment.
- ✓ **Community Developed:** Evolves alongside your hospital and the broader healthcare system.
- ✓ **Rapid Implementation:** Implemented quickly with minimal internal effort for immediate value.

BUSINESS IMPACT

- Detect and prioritize coding opportunities that most impact funding and performance metrics.
- Ensure alignment with Canadian and provincial methodologies.
- Improve the overall accuracy of reported patient care data.

DELIVERY

- Deployment within 1 week with no complex IT infrastructure.
- Immediate access to AI, rules, and integrations.
