## SKILLS

- React
- NodeJs
- Nesxt.JS
- AWS
- React Native
- Typescript
- Expo

## WORK EXPERIENCE

Senior Product Engineer

February 2024 - Present

### GetZOOT

ZOOT is a social video gaming platform created on the sweepstakes model.

As a senior product engineer and one of the first members of this project I'm playing an important part in developing the project and I have a big responsibility taking product decisions.

Some of my main responsibilities were:

- Led the integration of game providers and adapter systems.
- Designed and implemented core platform systems, including referral, rewards, notifications, and level-up.
- Developed an internal admin CMS for user management, redemptions, and game lobby operations.
- Drove performance optimization initiatives across the platform.
- Being part of the recruitment team.

**Technologies:** TypeScript, Next.JS, Node.JS, AWS, Pulumi, REST API, Microservices, PostgreSQL, GraphQL, Socket.IO, Recoil

Senior Software Engineer

March 2023 - January 2024

### AQUA

AQUA was a NFT marketplace built on web3.

In my role as a Senior Software Engineer at AQUA, I was tasked with the development and maintenance of our NFT marketplace, with a specific focus on web3 technologies.

Some of my key responsibilities included:

- Designed and implemented passwordless authentication flows using email and phone, while maintaining social login integrations.
- Expanded and improved the company's proprietary SDK with new features and capabilities.
- Integrated NFT collections from the blockchain into the marketplace.
- Enhanced platform UX by improving asset visibility and currency-related insights.

**Technologies:** TypeScript, Next.JS, Node.JS, AWS, Pulumi, REST API, Recoil

Full Stack Software Engineer

July 2019 - March 2023

### MCRO Tech

MCRO is an outsourcing tech company.

In my role as a full-stack software engineer, I worked on diverse projects across multiple industries, adapting my responsibilities based on each project's specific needs.

Some of my most relevant work was:

- Mentored a team of 3 junior engineers.
- Collaborated closely with product teams to build proof-of-concepts for new ideas.
- Developed real-time features, including video conferencing and chat systems.
- Built mobile features leveraging native capabilities such as location, camera, and push notifications.
- Improved performance and SEO across multiple platforms.
- Created reusable, scalable components and maintained web, mobile, and backend systems.

**Technologies:** TypeScript, React, React Native, Next.JS, Node.JS, Nest.JS AWS, Expo, Serverless, REST API, GraphQL, Socket.IO, MobX, Redux
