

NEOHAUS

Human creativity in the age of
artificial intelligence.

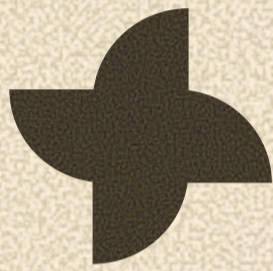

WE
BELIEVE IN

Human authorship

We believe creativity is human.
Technology exists to amplify
human vision, not replace it.

Democratization of creativity

Storytelling is no longer limited to big studios. Talent anywhere can create compelling stories. Neohaus works to provide equitable access to technology and knowledge, empowering creators worldwide to share their stories.

Quality over noise

We stand against flooding the internet with AI slop and meaningless content. At Neohaus, we promote creative thinking and storytelling so creators can produce work with depth, clarity, and impact.

Innovative approach

We evolve alongside emerging tools and formats and immersive, interactive technologies. We experiment with approaches to expand possibilities, push boundaries, and shape the future of storytelling.

NEOHAUS AND CREATORS

Our main partner is the multidisciplinary AI creator — working independently or in small teams. We provide access to projects, opportunities, and resources to help bring ideas to life.

NEOHAUS AND CLIENTS

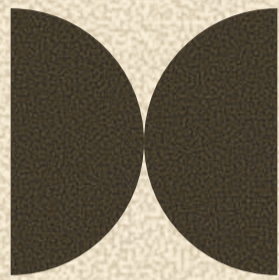

We work with companies and projects that create positive impact and contribute to humanity. Through AI films and other formats, we amplify their message and help drive a sustainable future.

NEOHAUS AND INDUSTRY

Our goal is to contribute to the development of the creative industry, filmmaking, and media through ethical approaches. By collaborating with others and sharing knowledge, we help lay the foundation for human-centered progress

WE DO

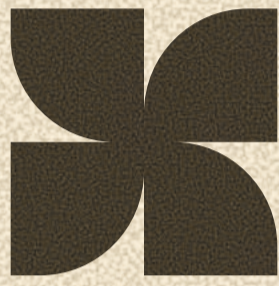

Network

We connect advertising agencies, production companies, and in-house brand teams with our curated network of top AI talent worldwide. Our creatives are selected based on portfolio quality, technical skills, industry experience, and over 30 criteria to ensure the right creative, technical, and personal match for every project.

Studio

We create content in-house from concept to final production for companies in nanotechnology, robotics, and frontier technologies. Our work focuses on visual storytelling for complex innovations, translating science, engineering, and new technologies into clear, emotional, and cinematic stories.

School

We train production teams, studios, and agencies to use AI tools and integrate them into real creative workflows.

Through workshops, team training, and pipeline development, we help companies move from experimentation to fully integrated AI-powered production.

**BUILD THE FUTURE
OF STORYTELLING
WITH US.**
