Net Zero Commitment

RAW People recognises the importance of the worldwide climate emergency.

Since our organisation formed as a CIC in 2022, our aim has been to become a net zero organisation. In working to achieve this our pledge has been to take action to reduce our climate impact by taking the following steps:

Waste – reducing and make less waste and managing it more efficiently ensuring less of it goes to landfill.

Recycle – recycling of paper, plastics and other materials.

Use electricity from renewable sources
