

GENTLE STRUCTURE

Structure felt, not seen.

S/S 2027

BONDED BODYWEAR

with
SECOND-SKIN
SOFTNESS
and
LIGHT,
FLEXIBLE
SUPPORT.

Light sculpting where it counts.

Gentle Structure is an innovation-driven bodywear capsule that puts comfort first. Built on two core fabrics: a soft brushed 4 ways stretch jersey and creora® PowerFit Micro-wicking. Every piece uses bonded construction for clean, minimal lines and comfort. Soft silicone printed wire delivers natural lift without rigidity, convertible designs adapt from strapless to multiway, and targeted compression panels offer light shaping where it counts. The full range extends into plus sizes, with two exclusive full coverage bras designed for dedicated support. This is bodywear that works with the body, not against it.

Built for real bodies

A brushed jersey with 4 ways stretch for body-skimming ease and recovery.

The soft hand feel sits comfortably against the skin while bonded construction keeps lines clean and minimal.

Soft Brushed 4 Ways Stretch Jersey

creora® Power Fit, from Hyosung's flagship high-power spandex portfolio, offers exceptional stretch and recovery, enhancing both fit and comfort.

Enhanced Fabric Power

Fabrics engineered with creora® Power Fit deliver enhanced fabric power even when applied to different companion yarn types, providing greater shape-holding capability than competitor spandex.
