CoWin

Human touch.
In every interaction.

CoWin

A secure digital solution that keeps the lines of communication open and provides support during times of stress. Designed to restore control when it’s needed most.

More contact.
Fewer incidents.

More autonomy.
Less tension.

More structure.
Fewer misunderstandings.

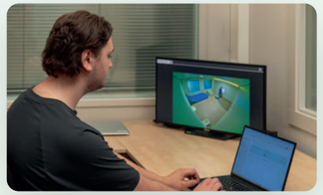

Designed with genuine care. Discover CoWin.

CoWin was born from real-world experiences. In collaboration with healthcare professionals and experts by experience, we build technology that doesn't pit safety against contact - it brings them together. It's precisely when tension rises that it's important for someone to feel in control, and staff to maintain an overview of the situation. CoWin supports that process. Not by taking over, but by creating space for autonomy, collaboration, and personalized care.

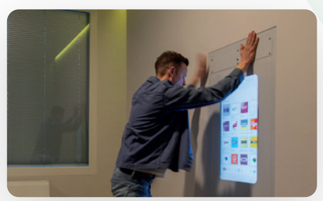

Stay connected.
No matter what.

In high-security environments, contact is far from always a given. Sometimes distance is necessary, but humanity must never disappear. CoWin keeps the connection alive, even when that's physically impossible at the moment.

Clear dashboard.
Real-time adjustments.

CoWin isn't just for clients, but also for those who work with them. The dashboard keeps staff in control. Turn features on or off, adjust settings, or respond immediately. With intuitive controls, focus can be placed back on care.

Strong on the wall.
Gentle to use.

Robust, secure, and built to withstand rough handling. Completely vandal-proof - yet intuitive, calm, and human-centered in usability.

Fits in any space.
New or existing.

CoWin can be mounted into or on the surface of the wall, opening possibilities. Include CoWin in new construction plans or install it in an existing space - it's all possible.

What CoWin makes possible.

Structure.
A sense of order in the day.

Time and clarity bring peace. A visible clock and a clear daily schedule give the mind less to remember. That frees up space for reflection and recovery.

Calm.
No overstimulation.

The interface demands little of the client, featuring limited stimuli and deliberate interaction. Day and night modes are available to adapt to the moment. Everything is designed to help reduce tension.

Expression.
For what goes unsaid.

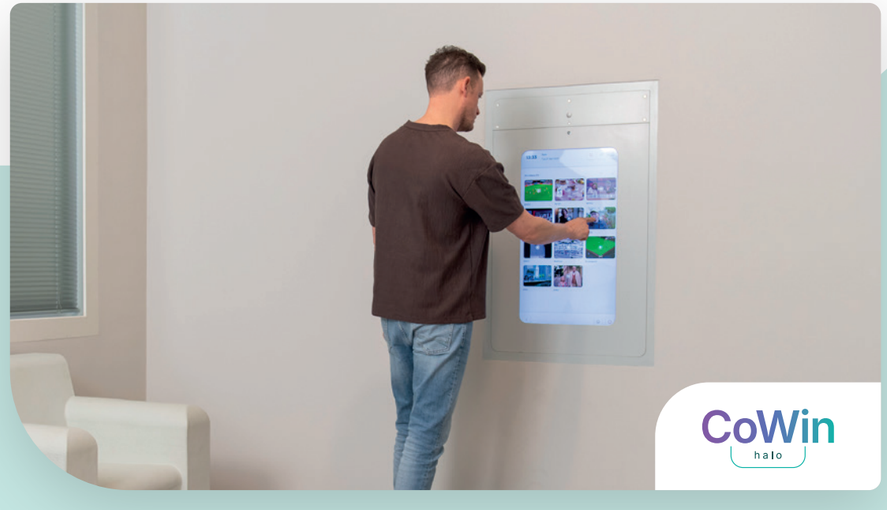

Not everything can be captured in words. Drawings, images, and collages support expression without judgment.

Control.
Always within reach.

The client can intervene at any time. CoWin can always be turned off with a single action. The off button is always immediately accessible, and other elements like the clock are customizable.

One thought.
Two models.

CoWin adapts to its space. Based on the same principles but designed for different dynamics.

CoWin Halo

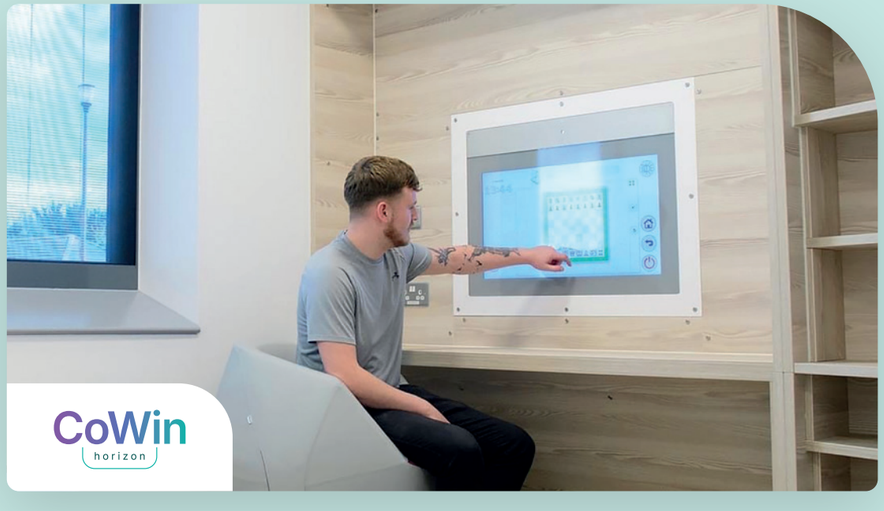

When tension peaks.
And every second counts.

CoWin Halo is designed for high-security areas where maximum safety is required. Fully vandal-proof thanks to its steel frame and reinforced safety glass. Designed to keep functioning under high pressure.

Why CoWin Halo?

In a high-pressure environment, every second counts and the situation can change in an instant. CoWin Halo encourages standing operation - an active posture contributes to de-escalation. CoWin Halo facilitates contact, even when physical proximity is not possible at that moment.

- Keeps the connection open via secure communication.
- Focus on de-escalation.
- Helps make situations more manageable, faster.
- Available in medium and large sizes.

CoWin Horizon

Daily well-being.
Space for recovery.

CoWin Horizon has a home-like design and is intended for patient rooms and common areas. For everyday moments, not just acute situations. It combines safety with comfort and structure. We shift thoughts by stimulating expression through activities like drawing and making collages, so that today feels calmer and tomorrow remains manageable.

Why CoWin Horizon?

Stress rarely arises all at once. It builds up. During restless nights, a lack of clarity, or too little control over the day. CoWin Horizon helps break that cycle by bringing calm, structure, and comfort.

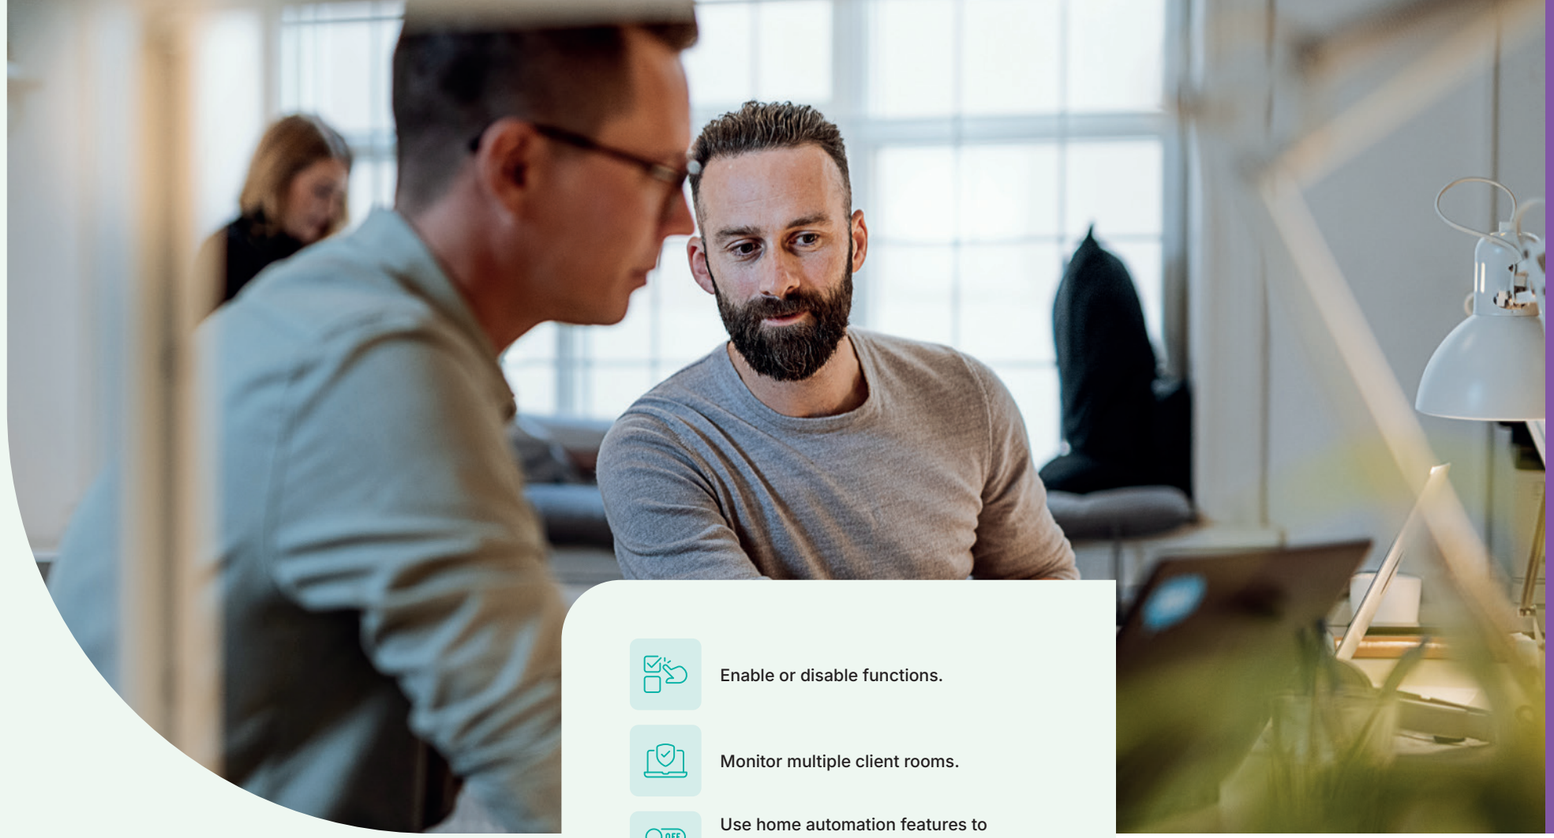

- Restores autonomy by enabling personal choices.
- Focus on prevention and recovery.
- Supports recovery with comfort and relaxation.
- Gives staff room to focus on care, not on course correction.

CoWin Cloud. Moves with you.

CoWin Cloud is the software that runs on all CoWin systems. It is secure, centrally managed, and fully controllable. This gives you control where needed and autonomy where possible.

With a single click, per department or individual client, staff can:

- Enable or disable functions.
- Monitor multiple client rooms.
- Use home automation features to control lighting and temperature, operate blinds and windows, and more.
- Publish the daily schedule for each client.
- Perform an intervention.
- Maintain contact with the client when physical contact is not possible.
- Chat with a client who speaks another language using the automatic translation feature, and the user interface is available in multiple languages.
- View activities per client via the dashboard.
- Plan activities.
- Temporarily disable CoWin.

Why CoWin Cloud?

Profiles tailored from practical experience.

A well-thought-out start, developed in collaboration with healthcare professionals. Always customizable per client or department.

Flexible setup at any time.

New client? Different treatment plan? Easily adjust settings.

Secure and centrally managed.

No local servers. Updates rolled out automatically.
Digital security suitable for highly secure environments.

Packages. Choose what fits.

Autonomy

For environments where structure and personal choice are central.

- Daily structure and visible time
- Basic communication within the department
- Relaxation and creative tools
- Uploading of personal or personalized content (documents, videos, photos, films, etc.)
- Radio (choice from global offerings)
- Full control via the dashboard

Connection

Everything from *Autonomy*, expanded with controlled external connectivity.

- Scheduled external video and call sessions
- Secure communication with trusted contacts
- Supporting treatment and guidance goals
- Exporting drawings and notes
- Chat translation, to bridge the language barrier between client and staff
- Television

Recovery

Everything from *Autonomy* and *Connection*, plus options focused on maximum therapeutic effectiveness and self-development. For organizations that want to get the most out of recovery.

- Controlled external calling (landline and mobile numbers)
- Self-management and feedback tools
- Support for learning and recovery goals
- Insight into usage via an extensive client dashboard

CoWin service. Support tailored to your practice.

CoWin supports the work on the ground, including service that adapts to your needs. A good start makes all the difference for staff and users, and that's why we always recommend onboarding. We ensure that CoWin is an integral part of the process from the very beginning so that your team knows what's possible.

After that, continued development remains essential. Is the situation changing? With the Recornect Academy, knowledge is always close by. With unlimited access to online training and walkthrough videos, teams can keep learning at their own pace.

1-year warranty. Always included.

You want to be able to rely on continuity – that CoWin keeps doing what it's supposed to do. CoWin comes standard with a one-year warranty with every service model. Even after that, you can count on support, maintenance, and training from our team. Choose the CoWin service model that fits best, supporting flexibility or certainty.

Our service models. Take a look and compare.

	On Demand	Assured
Costs	Pay as you go. No fixed monthly or annual costs.	Fixed amount per CoWin. Volume discount for larger quantities.
Onboarding	Not included. Recommended.	Included. Includes travel and accommodation if on-site.
Remote training	Available at an hourly rate.	Included.
On-site training	Available for a call-out charge plus hourly training rate.	Included. Includes travel and accommodation.
Remote service	Available at an hourly rate.	Included.
On-site service	Available for a call-out charge plus hourly service rate.	Included. Includes travel and accommodation.
Parts for replacement	Full rate.	25% discount. Includes a 1-year warranty on replacement parts.
Recornect Academy	Not included. Not available separately.	Included. Exclusive access with Assured as the service model.
Service level	Based on scheduling.	Priority service.

On Demand. No fixed costs. You use what you need, when you need it. Provides flexibility but less predictability in costs and without access to the continuous learning platform, Recornect Academy. On Demand suits organizations that know exactly when support is needed.

Assured. Worry-free use. You choose peace of mind and clarity. Everything you need, for a fixed fee: Training, service, and support all included both on-site and remote.

Includes unlimited access to the in-depth online training courses and how-to videos from our Recornect Academy. This way, your team continues to develop at their own pace. Support is always available. When issues arise, Assured is our top priority. For organizations that rely on continuity and speed, with no surprises.

CoWin in practice. Where it counts.

More than **15,000** end users have worked with CoWin.
