COMMENT (0)

One of the few Indian vendors to successfully transition from the domestic to the international markets is Himachal Futuristic Communications Limited (HFCL). While the company started its journey as an optical fiber manufacturer, it has recently made waves because of its new product development for growing markets.

"A key driver of the transition was that we wanted to grow our revenue by going beyond the Indian market," said Mahendra Nahata, managing director of HFCL, speaking to Light Reading. "To do so we had to develop our own design capabilities and procure new machinery, as every market has its own specific requirement for optical cable."

New product growth

The market expansion has helped the company grow revenues to 43.3 billion rupees (US\$527 million) in 2021-22 from INR30.9 billion (\$376 million) in 2017-18. And HFCL is investing heavily in new product development, working with partners outside of India to complement its booming fiber business.

Home-grown HFCL Limited, a telecom equipment manufacturer and technology provider, has launched 5G Macro radio units today at the India Mobile Congress 2022. The first product in HFCL's 5G family, the 5G 8T8R macro radio units (RU) has been designed and developed completely by the company's indigenous R&D team to address India and global markets. It is a next-generation RU that has a compact form factor. And HFCL claims that this new RU provides energy efficiency, supports digital beamforming and zero-touch provisioning and will be a key component in rolling out 5G networks.

HFCL announces the launch of 5G 8T8R Macro Radio Unit

October 2022 | Products Release

Himachal Futuristic Communications Limited (HFCL) has announced the launch of 5G 8T8R Macro Radio Unit (RU), the first product from its 5G product family. HFCL's 5G 8T8R Macro RU is a next generation RU that has a compact form factor, improved energy efficiency, supports digital beamforming and zero touch provisioning.

5G will accelerate the adoption of virtualisation and cloud native technologies. However, most of the current implementations of virtual radio access network (vRAN) are based on proprietary technologies. HFCL's 5G 8T8R Macro RU combines the power of vRAN and open radio access network (O-RAN) based open standards. Unlike traditional RAN where all components of RAN must come from the same vendor, HFCL's 5G 8T8R Macro RU can integrate with any vendor's virtual baseband unit (vBBU) that is compliant with O-RAN fronthaul specification.

HFCL's 5G 8T8R Macro RU is 3GPP Release 15 and 16 compliant. It supports n78 frequency band (3.3 – 3.67 GHz) with 8T8R MIMO (Multiple-Input Multiple-Output) configuration. It is lightweight and compact in form factor and supports natural convection air cooling. It will aid operators in providing better 5G coverage and address capacity requirements in urban, suburban and rural areas. It is modular in design and can be easily customized to support any Sub-6 GHz frequency band to address the global markets. It supports multiple mounting options and can be easily deployed on poles, rooftops, and walls. Security by design is built into the 5G 8T8R Macro RU and it supports secured boot, digitally signed applications, and is hardened against distributed denial-of-service attacks.

Commenting on the launch, Mahendra Nishata, MD, HFCL, said, "HFCL is proud to bring the world class 5G 8T8R Macro RU product that has been designed and developed completely by our indigenous research and development (R&D) team to address India and global markets. It also supports needs of rural mobile broadband in the country. Reliable and ubiquitous 5G networks has a critical role to play in making India a digital economy."

October 01, 2022

HFCL Limited, the leading high-tech enterprise and integrated next-gen communication product and solution provider in collaboration with Qualcomm Technologies, Inc. launches world's first Open source Wi-Fi 7 Access Points under its IO product line at India Mobile Congress, Pragati Maidan, New Delhi on 01 October 2022.

HFCL becomes the first OEM to launch Open source Wi-Fi 7 Access Points, based on the IEEE 802.11be – a revolutionary Wi-Fi technology that is designed to deliver Extremely High Throughput (EHT), higher spectral efficiency, better interference mitigation, and Real Time Applications (RTA) support. Wi-Fi 7 uses faster connections with 320MHz and 4kOAM. multiple connections with Multi Link operation

HFCL's 5G 8T8R Macro RU is a next generation RU that has a compact form factor, improved energy efficiency, supports digital beamforming and zero touch provisioning.

5G will accelerate the adoption of virtualization and cloud native technologies. However, most of the current implementations of virtual RAN (vRAN) are based on proprietary technologies. **HFCL's 5G 8T8R Macro RU combines the power of vRAN and O-RAN based open standards.** Unlike traditional RAN where all components of RAN must come from the same vendor, HFCL's 5G 8T8R Macro RU can integrate with any vendor's virtual baseband unit (vBBU) that is compliant with O-RAN fronthaul specification.

HFCL's 5G 8T8R Macro RU is 3GPP Release 15 and 16 compliant. It supports n78 frequency band (3.3 – 3.67 GHz) with 8T8R MIMO (Multiple-Input Multiple-Output) configuration. It is lightweight and compact in form factor and supports natural convection air cooling. It will aid operators in providing better 5G coverage and address capacity requirements in urban, suburban and rural areas. It is modular in design and can be easily customized to support any Sub-

Homegrown HFCL Limited, a telecommunications equipment manufacturer and technology provider, launched 5G 5G macro radios today at Mobile India Congress 2022. The first product in HFCL's 5G family, the 5G 8T8R (RU) macro radios, was designed and developed entirely by the company's local R&D team to address India and global markets. This is a next-generation RU that has a compact form factor. And HFCL claims that this new RU provides energy efficiency, supports digital beamforming and automatic provisioning and will be a key component in the deployment of 5G networks.

Explaining the importance of the radio units, Mahendra Nahata, MD, HFCL, told Business Today that six such radio units would be required for each tower. In total, the city will need 10,000 towers to deploy 5G in Delhi, with six radio units installed on each tower. In total, Delhi alone would require 60,000 radio stations from a single operator, which is a

HFCL Ltd launches next-gen 8T8 Macro RU product to support 5G in India

HFCL Ltd (a leading telecom equipment manufacturer and technology provider), has launched its 5G 8T8R Macro Radio Unit (RU), its first product from the 5G family.

The announcement came after Prime Minister Narendra Modi on Saturday launched the 5G network at India Mobile Congress 2022. During the event, several telecom companies demonstrated using 5G services.

HFCL Ltd specialises in creating digital networks for telecom companies, enterprises, and the government.

Home-grown HFCL Limited, a telecom equipment manufacturer and technology provider, has launched 5G Macro radio units today at the India Mobile Congress 2022. The first product in HFCL's 5G family, the 5G 8T8R macro radio units (RU) has been designed and developed completely by the company's indigenous R&D team to address India and global markets. It is a next-generation RU that has a compact form factor. And HFCL claims that this new RU provides energy efficiency, supports digital beamforming and zero-touch provisioning and will be a key component in rolling out 5G networks. Explaining the relevance of radio units, Mahendra Nahata, MD, HFCL told Business Today that every tower will require six such radio units. In total, for the 5G rollout in Delhi, the city will require 10,000 towers and six radio units will be mounted on each tower. In total, Delhi alone would require 60,000 radio units by a single operator, which in itself is a big opportunity. HFCL is investing around Rs 400 crore in the manufacturing of telecom equipment. And while the radio units will be manufactured in Delhi NCR, Nahata said the company hasn't yet decided on the number of units it plans to manufacture. However, Nahata counts it as a big opportunity as other than providing radio units to the Indian telecom operators, the

Press Release

Next generation RU that combines the power of vRAN and open standards to accelerate 5G deployment

India, October 01, 2022:- HFCL Limited (HFCL), a leading telecom equipment manufacturer and technology provider today announced the launch of **5G 8T8R Macro Radio Unit (RU)**, the first product from its 5G product family. HFCL's 5G 8T8R Macro RU is a next generation RU that has a compact form factor, improved energy efficiency, supports digital beamforming and zero touch provisioning.

5G will accelerate the adoption of virtualization and cloud native technologies. However, most of the current implementations of virtual RAN (vRAN) are based on proprietary technologies. **HFCL's 5G 8T8R Macro RU combines the power of vRAN and O-RAN based open standards.** Unlike traditional RAN where all components of RAN must come from the same vendor, HFCL's 5G 8T8R Macro RU can integrate with any vendor's virtual baseband unit (vBBU) that is compliant with O-RAN fronthaul specification.

HFCL's 5G 8T8R Macro RU is 3GPP Release 15 and 16 compliant. It supports n78 frequency band (3.3 – 3.67 GHz) with 8T8R MIMO (Multiple-Input Multiple-Output) configuration. It is lightweight and compact in form factor and supports natural convection air cooling. It will aid operators in providing better 5G coverage and address capacity requirements in urban, suburban and rural areas. It is modular in design and can be easily customized to support any Sub-6 GHz frequency band to address the global markets. It supports multiple mounting options and can be easily deployed on poles, rooftops, and walls. Security by design is built into the 5G 8T8R Macro RU and it supports secured boot, digitally signed applications, and is hardened against distributed denial-of-service attacks.

Commenting on this product launch, **Mr. Mahendra Nahata, MD, HFCL** said, "HFCL is proud to bring the world class 5G 8T8R Macro RU product that has been designed and developed completely by our indigenous R&D team to address India and global markets. It also supports needs of rural mobile broadband in the country. Reliable and ubiquitous 5G networks has a critical role to play in making India a digital economy."

With a distinct set of features designed for improved energy efficiency, HFCL's 8T8R Macro RU also supports digital beamforming with excellent steering capability for improved customer experience. It supports improved
