

## FIBER OPTIC CABLE ASSEMBLIES

### FIBER-TO-THE-ANTENNA CABLE ASSEMBLY

HFCL's high performance FTTA cable assembly ensures optimal performance across broad spectrum of wavelengths. These cables are specifically designed to meet performance requirements of low signal loss and high data transfer rates, to ensure reliable communication between remote radio units (RRUs) and baseband units (BBUs) in mobile networks.

#### PRODUCT FEATURES

- Good Repeatability
- Superior Crush Resistance
- Excellent flexibility for remote traction
- 100% factory tested for Mechanical & Optical characteristics
- Customizable Length
- IP68 Protected & UV Stabilized
- Suitable for Wireless Horizontal & Vertical cabling in Indoor & Outdoor Industrial Installations

#### APPLICATIONS

- Gigabit Ethernet
- Telecommunication Networks:
- Data Centres:
- Wireless Base Stations:
- 4G/5G Mobile Networks
- Broadband Internet
