

For Pet Clinics

Kit Instructions

How to use the **Mokupet** FAVN Test Kit to ensure your patient's smooth arrival in Hawaii

mokupet

Please Read First

Ship the pet's sample with the 2-day mailer provided to arrive at the lab on a weekday during business hours (Monday – Friday, 8 am to 5 pm). If the sample cannot arrive during business hours, refrigerate the sample to ship it the following week, e.g., samples collected on Thursday and Friday should be shipped the following Monday to avoid weekend delays. Samples can be stored up to 7 days at 2 – 8 °C before ship.

What's Included

Mailer Box

Ice Pack

Transport Tube

Absorbent

Padded Sleeve

FAVN Report Form

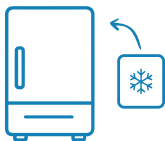

Sticker Label

Shipping Mailer

Getting Started

1

Place ice pack in freezer immediately. Freeze flat.

2

Verify the patient's information on the transport tube. Notify Mokupet if any information is incorrect.

3

Collect sample and transfer **1.0 to 2.0 ml of serum only** into transport tube.

4

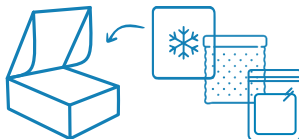

Place serum sample into padded sample bag, then seal.

5

Complete, review, and sign FAVN Report Form. Place form back in documents bag.

6

Repack mailer box with ice pack, sample, and FAVN Report Form.

7

Perform final check and hand checklist receipt to the pet owner.

8

Seal the mailer box with the sticker label provided.

9

Place box into self-sealing shipping mailer and seal.

10

Drop off at a shipping carrier location or contact Mokupet to schedule a pick up.

Need Help?

For more support, please visit our FAQs page or contact us directly at **support@mokupet.com**.

Official test results are sent directly to Hawaii DOA. A copy of the test results will be emailed to the pet clinic and pet owner.
