### **Disclosure:**

The audit was based on data generated by Decentralized Masters. To perform the test, price histories were downloaded from various sources (e.g., Refinitiv, CoinMarketCap, CoinGecko, CoinCompare, CoinCodex and others). All entry prices and current prices generated by Decentralized Masters are verified to make sure to use the correct symbols for the downloaded price histories.

The entry prices for the audit are calculated as an average of the prices (open/high/low/close) found in the respective price sources. The current prices, the all-time highs and the associated trading days were determined by CONQUEST on the basis of the price data used and were taken as a basis for the audit. The symbols and recommendation dates were taken from Decentralized Masters.

No guarantee can be given that all recommendations are complete.
