

How Is a Move to the Cloud Helping an IT Consultancy Stay Ahead of a Changing Industry?

To survive in today's ever-changing markets, every company must have a solid IT core. And to pursue digital transformation without taking the focus off what they do best, businesses large and small turn to Experis Ciber B.V. for guidance and support on how to make technology work for them. An SAP gold services partner, Experis Ciber often recommends SAP® software to clients. So, after its acquisition by Manpower Group called for the carving out of business systems from Ciber Inc., it made sense to turn to SAP in pursuit of its own cloud transformation strategy.

With SAP S/4HANA® Cloud, Experis Ciber has a unified view of projects across the company as well as full and immediate insight into project progress and profitability. It also has real-time visibility into internal and external resource availability. Mobile access and the SAP Fiori® user experience not only make it easier to open and manage new projects but also help project managers complete crucial time-writing tasks on the go. The result is greater flexibility and agility that allow Experis Ciber to run live and maintain its trusted standing as an SAP services partner of choice.

“SAP S/4HANA Cloud is the backbone of our ecosystem and is connected with our systems for service management, HR, and payroll. It is also **what we recommend to our customers**. It allows us to present them with best practices to improve how they do business.”

Linda Beukers, Director SAP Practice, Experis Ciber B.V.

IT consulting and services provider Experis Ciber both runs SAP® software and recommends it to clients. A longtime user of the SAP ERP application, the company embarked on a cloud transformation strategy, which included moving its systems for finance, customer and internal projects, time writing and revenue collection, purchasing, sales orders, billing, and reporting to SAP S/4HANA® Cloud. Now it has the firsthand expertise to help clients with their own transformations using SAP S/4HANA Cloud.

SAP gold services partner Experis Ciber deployed SAP S/4HANA Cloud as part of an overall cloud transformation strategy – giving it the experience and confidence to help its clients do the same.

Before: Challenges and Opportunities

- Help clients digitally transform their businesses to improve customer engagement and experience
- Pursue a cloud transformation strategy following an acquisition by Manpower Group that required back-office and project management operations to be carved out from Ciber Inc.
- Unify siloed data and improve reporting and analytics on projects, profit, and employees to better track costs and revenues against project budgets and meet requirements for both Manpower Group and regulatory bodies
- Improve internal and external resource planning for projects
- Build on a strong reputation as an SAP services partner by running the same software recommended to clients

Why SAP

- SAP S/4HANA Cloud – a solid fit with business requirements and overall cloud strategy
- SAP API Management, which allows for integration with SAP and non-SAP software systems
- Ability to adopt new software, technology, and functionality quickly without major upgrades
- Speed of the SAP cloud technology innovation road map
- One week to collect high-level requirements and to conduct workshops with stakeholders across the business

After: Value-Driven Results

- Innovation platform that offers the flexibility and agility to stay ahead of changing industry and client demands
- Better user experience that makes new projects easier to open and manage
- Unified view of all projects as well as full and immediate insight into project progress and profitability
- Real-time visibility into internal and external resource availability
- Increased efficiency with ability for project managers to complete time-writing tasks on the go

“SAP S/4HANA Cloud has helped us speed up the process of doing figure analysis rather than spending time just producing the figures.”

Linda Beukers, Director SAP Practice, Experis Ciber B.V.
