SAP® Solutions
SAP® Cloud Platform

Semos Group strives to make its HR solutions the first choice for customers. Its employee engagement suite, JobPts, is an SAP-certified application built on SAP Cloud Platform. Working with SAP brings added value and confidence in solution quality, stability, and security – and goes a long way in strengthening the Semos brand.

Before: Challenges and Opportunities

- Create a top-notch experience for future customers by creating a world-class HR cloud solution
- Develop and deploy innovative HR solutions that continuously improve business performance
- Solidify a reputation for software excellence, security, and high-end professional services

Why SAP

- Application certification from SAP, which adds value and confidence for customers
- Certification requirements to meet highly detailed standards for quality and integration with SAP software
- Goal to provide the best customizable employee engagement solutions developed on SAP Cloud Platform

After: Value-Driven Results

- Customer trust in solution security, functionality, integration, availability, stability, and deployment, making Semos their first choice for digital HR transformation software
- Faster customer pilots by eliminating the need for most testing and validation by IT
- Wider market reach and increased brand awareness

“JobPts really models the entire experience of the award process into a single system.”

Harish Lade System General Manager, Asian Paints Ltd.
