Smart Into Digital

THE BEST RUN 

A woman with her hair in a bun, wearing a white patterned shirt, is looking at a tablet in a retail clothing store. In the background, there are racks of clothes, a man looking at items, and a table with shoes. The scene is brightly lit with large windows.

Point-of-sale technology
is no longer used simply
to make straightforward
payments.

A modern Point-of-sale system has to be more sophisticated **to comply with growing demands** of both worlds – the digital and physical.

While providing an **efficient checkout process**, your point-of-sale software must allow you **real-time visibility into sales data and reporting...**

...and further **manage customer information** combined with loyalty programs to offer a **personalized shopping experience.**

A vital component to stay competitive in such digital era is a **seamless end-to-end integration-** from point-of-sale to the ERP system

Today's Challenges for Point-of-Sale Systems

End-to-End Integration

- Point-of-sale systems are not fully integrated to ERP backend systems
- Financial and logistic updates not in real-time
- Errors may occur because of manual work
- No possibility to integrate other platforms or applications

Transparency

- Real-time information is missing across several POS systems, organizations or even countries
- No accurate and real-time insights into sales data
- Missing information about inventory
- No holistic view of overall business

Loyalty Management

- No integration of loyalty programs into POS system
- No centralized system that tracks customer data, loyalty points, discounts and gift cards
- No personalized sales or appropriate rewards (e.g. Cashback)

Legal Requirements

- POS systems need to meet applicable local legislation and fiscal requirements
- GDPR standards
- Germany – GOBD/ Kassensicherungsverordnung (2020)
- France - NF 525 (2018)
- Austria - RKSIV (2017)

Hardware

- Interaction of soft- and hardware is often underestimated
- Flexibility to run POS systems on any hardware device – on PCs, laptops, or even tablets
- Need of mobile compatibility

360° Customer View

- POS systems collect customer data during sales process, but have a lack of transparency of customer buying behaviour
- No understanding of customer needs
- No 360° customer profile view

Omni-Channel Processes

- Combining online and offline sales is becoming more and more important
- Customers buy online and pick-up goods in-store (Click and collect)
- Buy and deliver

Multiple Payment Methods

- To stay competitive in our digital age, POS systems need to handle contemporary payment options, such as mobile and online payments with ApplePay, Alipay, or others
- But also payments with gift cards, or loyalty points

Usability

- POS systems should be easy to use combined with an intuitive and modern user interface
- Smooth and seamless integration to save time and costs for end-users

Offline Capability

- Sales process should not be stopped even if network connection is interrupted

Scalability

- POS systems should be scalable and extendable to a wide variety of business scenarios – no matter if you have a business with 10, 200, or 1000 shops

Security

- POS systems need to ensure the security and compliance standards and protect from fraud

Digitize Your Business with SAP Customer Checkout

Simplify your point-of-sale processes. Gain real-time and in-depth insights. Run your business productively and efficiently.

Take advantage of **rich POS functionalities** that can be used for different business scenarios

Manage POS operations centrally for multiple locations and gain **real-time insights** into sales and financial data

Save time and prevent manual errors through a **seamless end-to-end integration** to your ERP system

Gain **insights on customer purchase history** and offer personalized sales

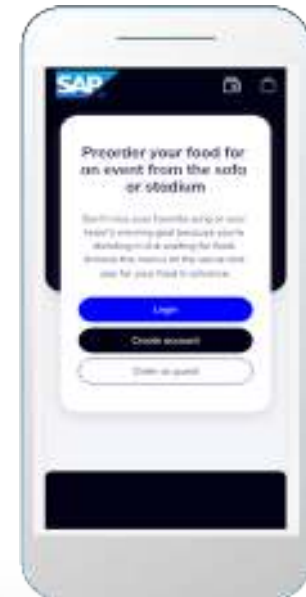

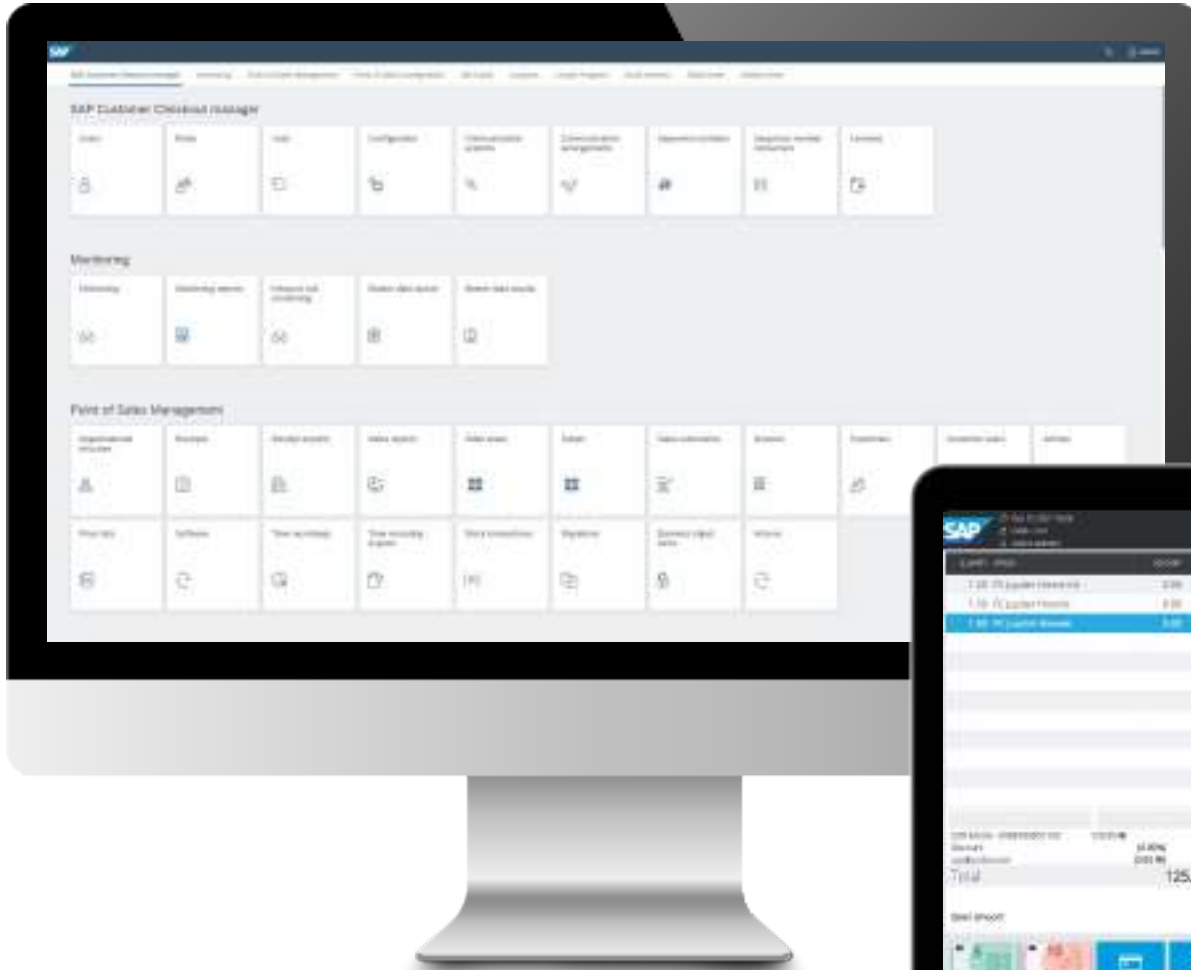

Benefit from the **flexibility to extend and scale the solution** anytime combined with a modern user interface

Digitize Your Business with SAP Customer Checkout

Capabilities and Key Features

- **Point-of-Sale:** From sales, returns, to discounts – SAP Customer Checkout supports all common processes that are needed at point-of-sale
- **Central Point-of-Sale Management:** Manage your POS systems in different shops around the globe centrally
- **End-to-End Integration:** Fully integration of your POS systems to your backend ERP system
- **Loyalty, Coupons and Omnichannel:** Manage customer loyalty programs, coupons, and reward loyal customers
- **Mobile Order:** Let customers order and pay online via mobile phones

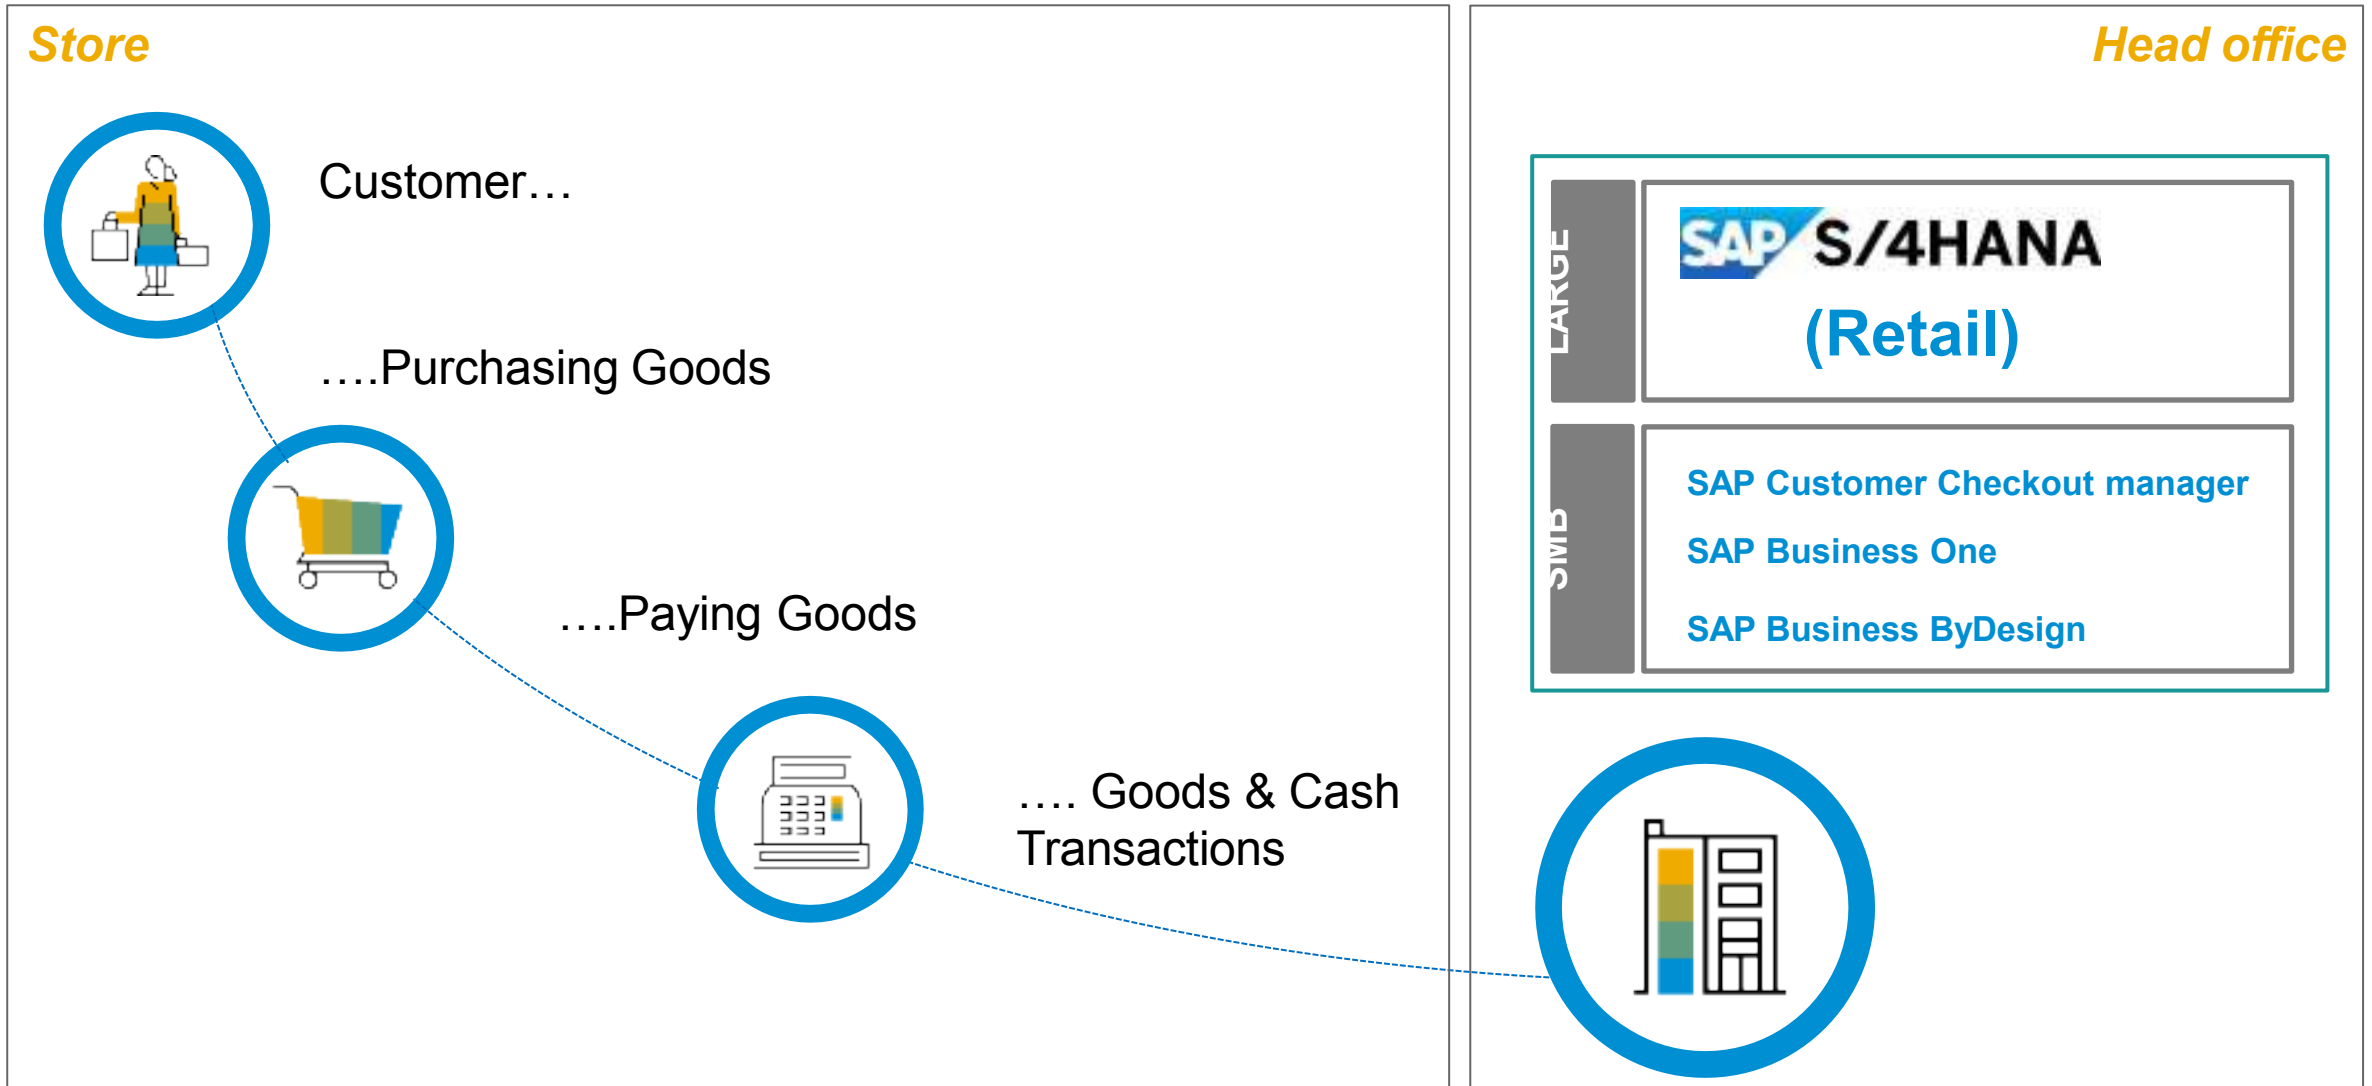

A close-up photograph of a person's hand touching a tablet screen mounted on a wooden checkout counter. The person is wearing a dark top and a ring on their finger. The background is slightly blurred, showing another person's hand near the counter. The overall lighting is warm and focused on the interaction with the device.

SAP Customer Checkout

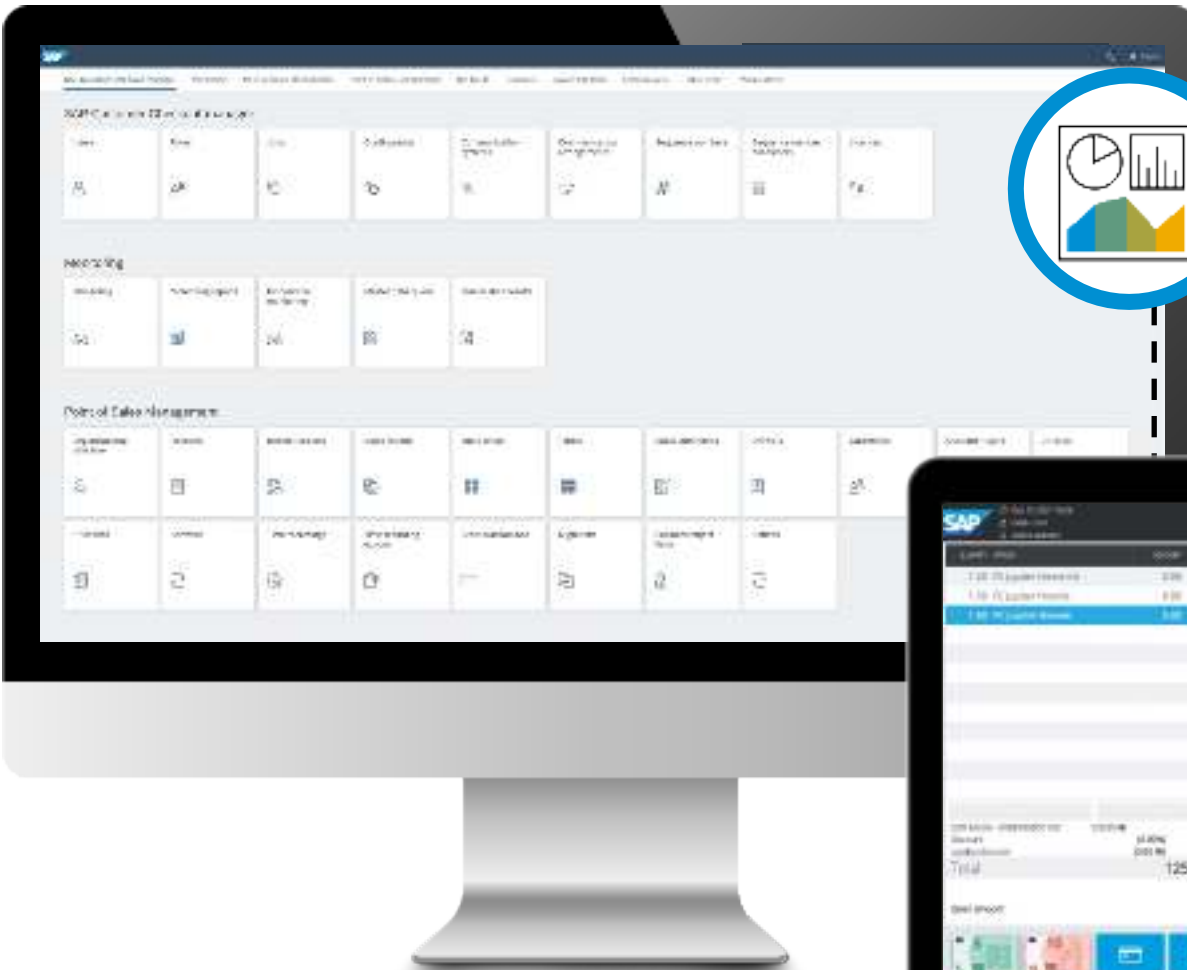

A modern Point-of-Sale System with Rich Functionalities

Digitize Your Business with SAP Customer Checkout

Digitize Your Business with SAP Customer Checkout

Two Software Components

SAP Customer Checkout Manager: Central management solution for various POS operations

SAP Customer Checkout: POS solution with rich functionality that is running at the cash counter

Rich POS functionalities

Quick Service

Manage POS Operations Centrally

Get **Real-time Insights** on Sales and Reporting Data

Full Transparency across Whole Organization

Download all sales reports as .csv file

Manage Coupons Centrally

Seamless End-To-End Integration
to the ERP-System

Seamless End-to-End Integration

Benefit from the integration flexibility of SAP Customer Checkout and choose the SAP ERP system that fits to your needs:

Integration Options

Use **SAP Customer Checkout as Standalone** without **SAP ERP system** and manage all master data centrally

Use **integrated with SAP ERP Systems** to transmit transactions directly to your warehouse management and accounting applications

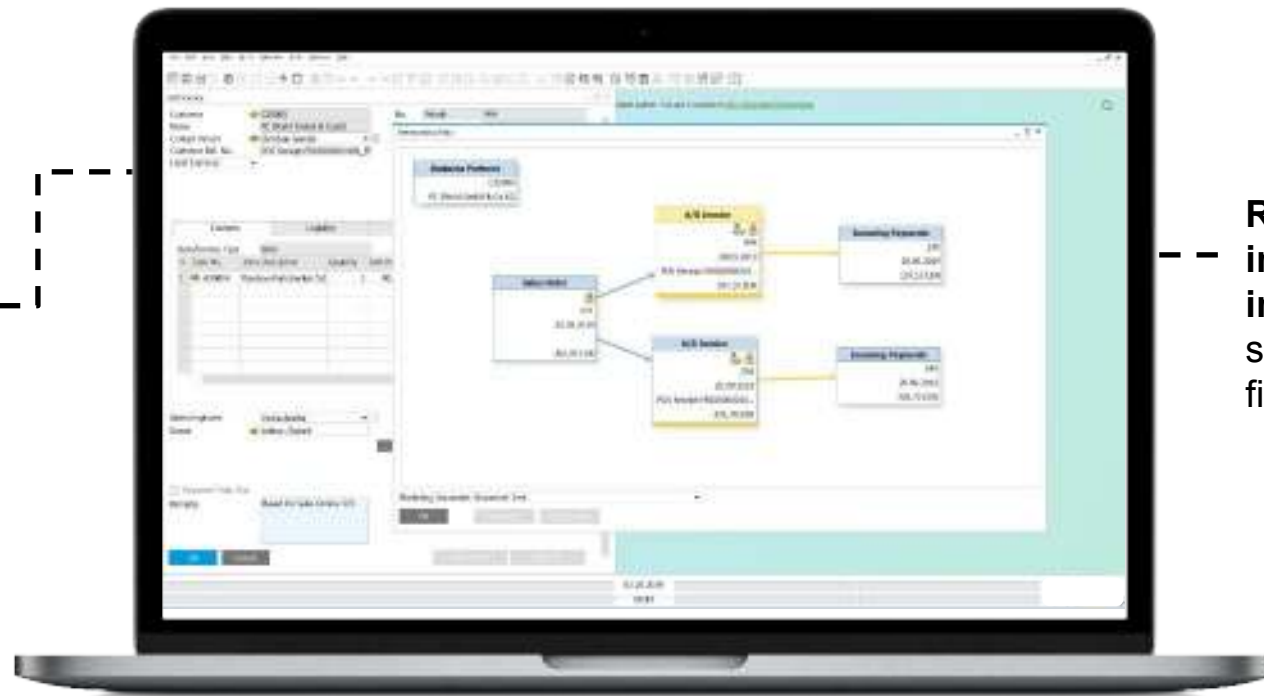

Seamless End-to-End Integration

Synchronization of master data (articles, prices, customers) in real-time

Fully and seamless end-to-end integration from POS system to the SAP ERP System

Real-time and in-depth insights into sales and financial data

A woman with dark hair in a ponytail, wearing a white coat, is smiling and looking at her smartphone. She is carrying a brown shopping bag. The background is a blurred shopping mall with other people and store displays.

**Personalized Shopping Experience
through Loyalty Management**

Loyalty Management

SAP Customer Checkout provides you with loyalty management functionality. In addition, it offers the technical basis to integrate your own loyalty management program.

Capabilities and Key Features

- **Easy configuration set-up** for loyalty management
- **Out-of-the-box** loyalty management for front- and backend
- **Integrate a mobile app** to collect loyalty points
- Define your **own point calculation**
- **Create loyalty users** at point-of-sale
- Customers can **collect loyalty points** at point-of-sale
- Customers can **redeem loyalty points** at point-of-sale
- **Reward loyal customers** with coupons for discounted articles
- **Track loyalty transactions** (loyalty points collection, purchase history) of your customers
- **Generate loyalty reports** to track Top Customers

Loyalty Management

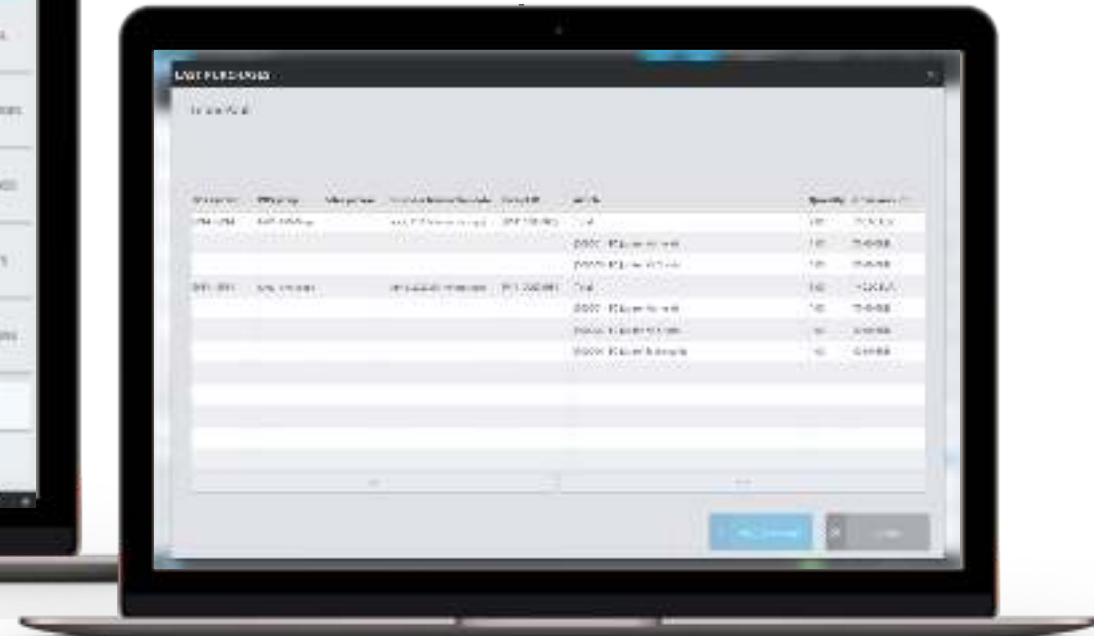

Collect loyalty points for each purchase

Scan loyalty users or create new loyalty account for personalized sales

Apply coupons from loyalty programs

View Last Purchases and Purchased Items at Point-of-Sale

Pay with loyalty points

Loyalty Management

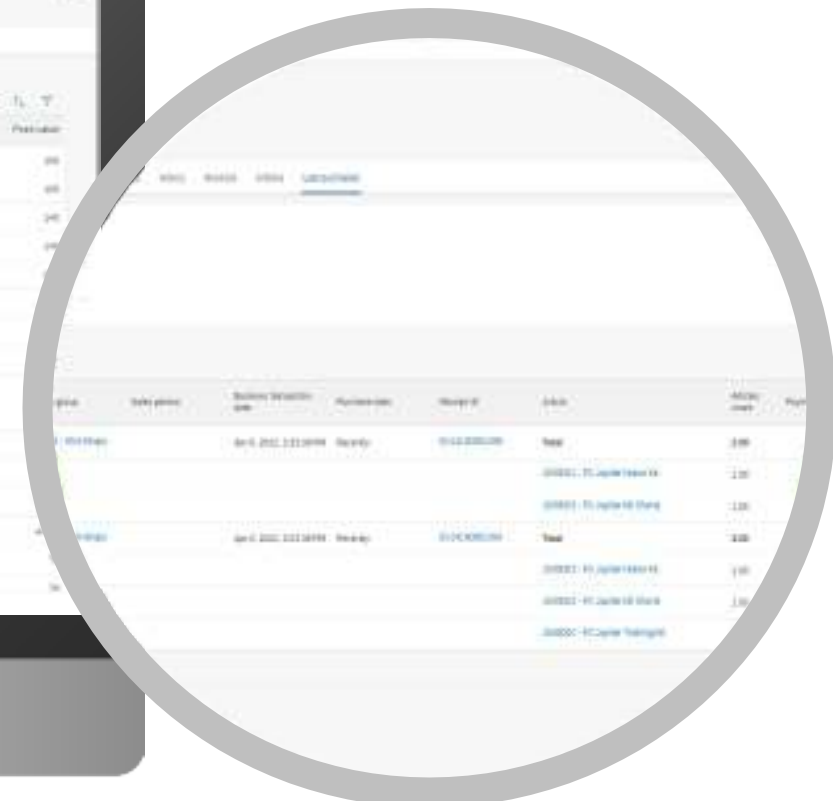

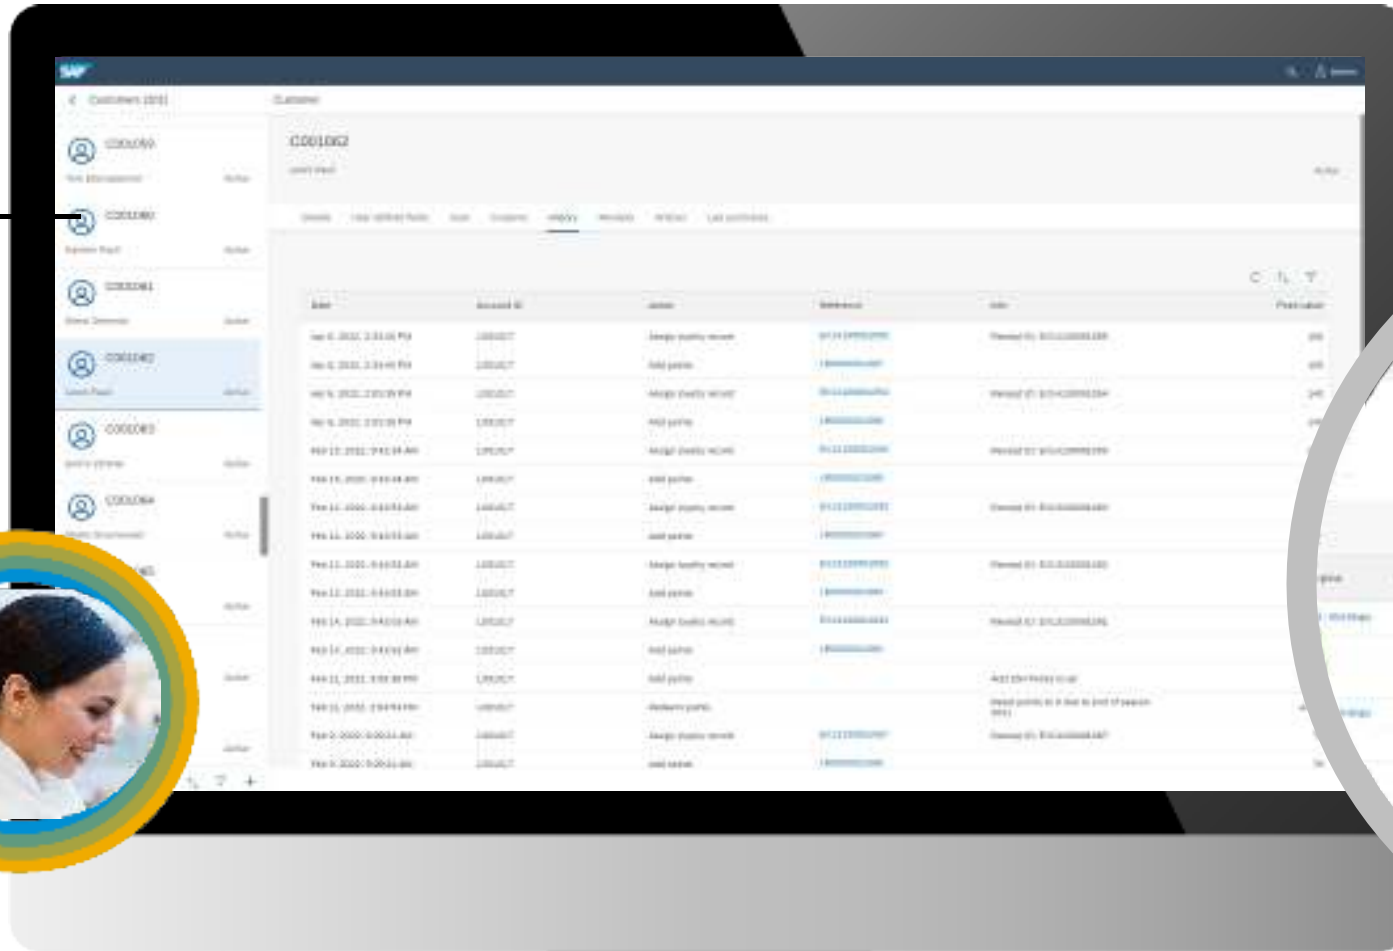

Gain **insights on customer purchase history** and offer personalized sales

Create **personalized coupons** for your Top 10 Customers

Understand and know **your customers** – what, where and when they purchase

Reward loyal customers and **increase revenue**

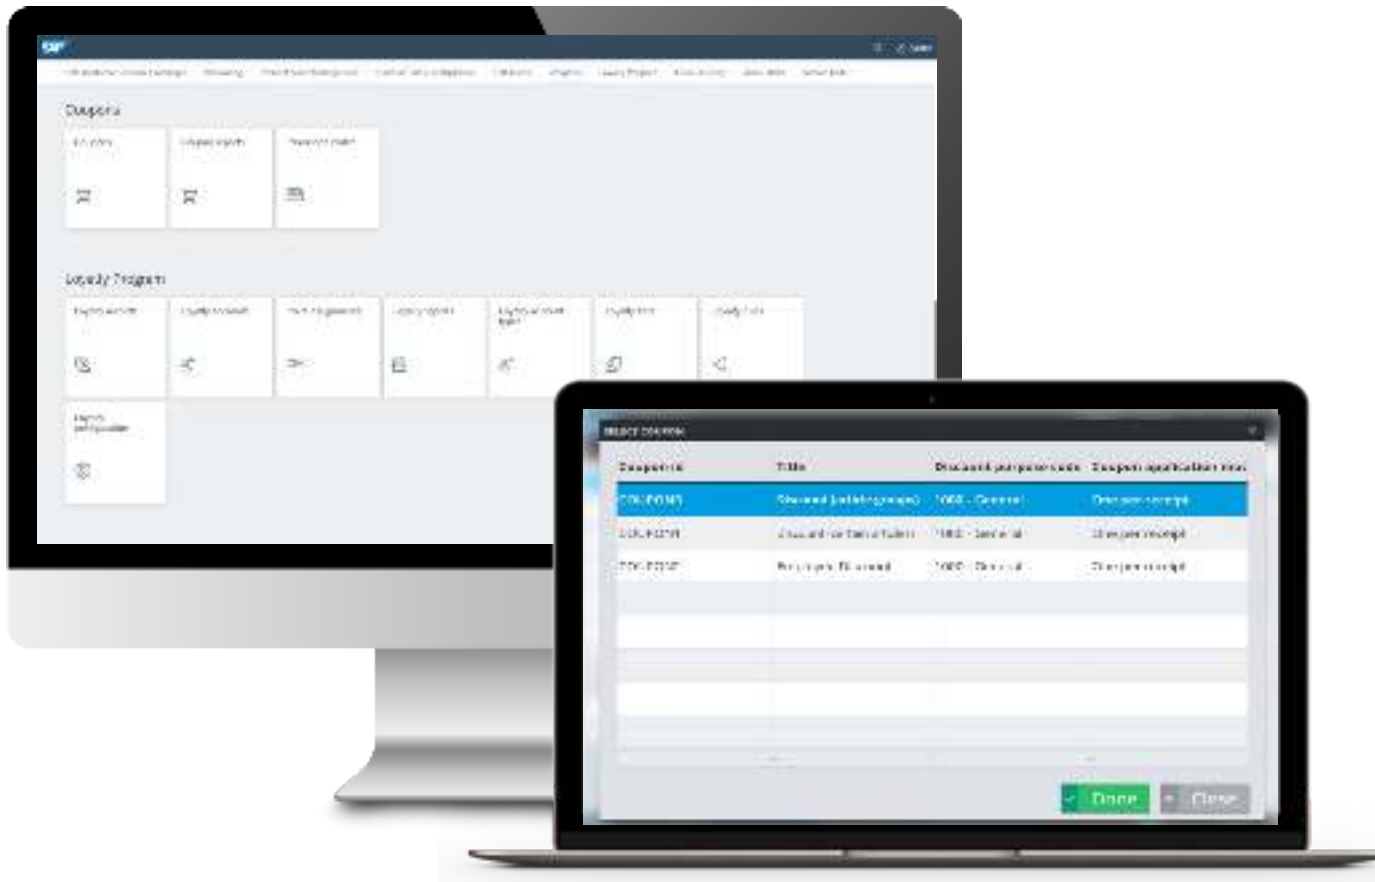

A young woman with long blonde hair is smiling and looking at her smartphone. She is holding a red coffee cup in her left hand and a smartphone in her right hand. She has several shopping bags, including a red one and a white one, hanging from her arms. The background shows a clothing store with mannequins and other people in the distance.

**SAP Customer Checkout
Coupons**

SAP Customer Checkout *Coupons*

SAP Customer Checkout provides you with central coupon management functionality. Include coupons into your sales processes at POS to attract customers, or reward employees while saving money on purchases.

Capabilities and Key Features

- **Out-of-the-box coupon management** for front- and backend
- **Create coupons** for customers, employees and loyalty programs
- Create **general and personalized coupons**
- Define your own **discount conditions and discount rules**
- **Generate coupon reports** to track all coupon interactions
- **Apply general or personalized coupons** to sales items and receipts
- **Loyalty and influencer coupons**
- **Reward loyal customers with coupons** to gain discounts on promoted articles

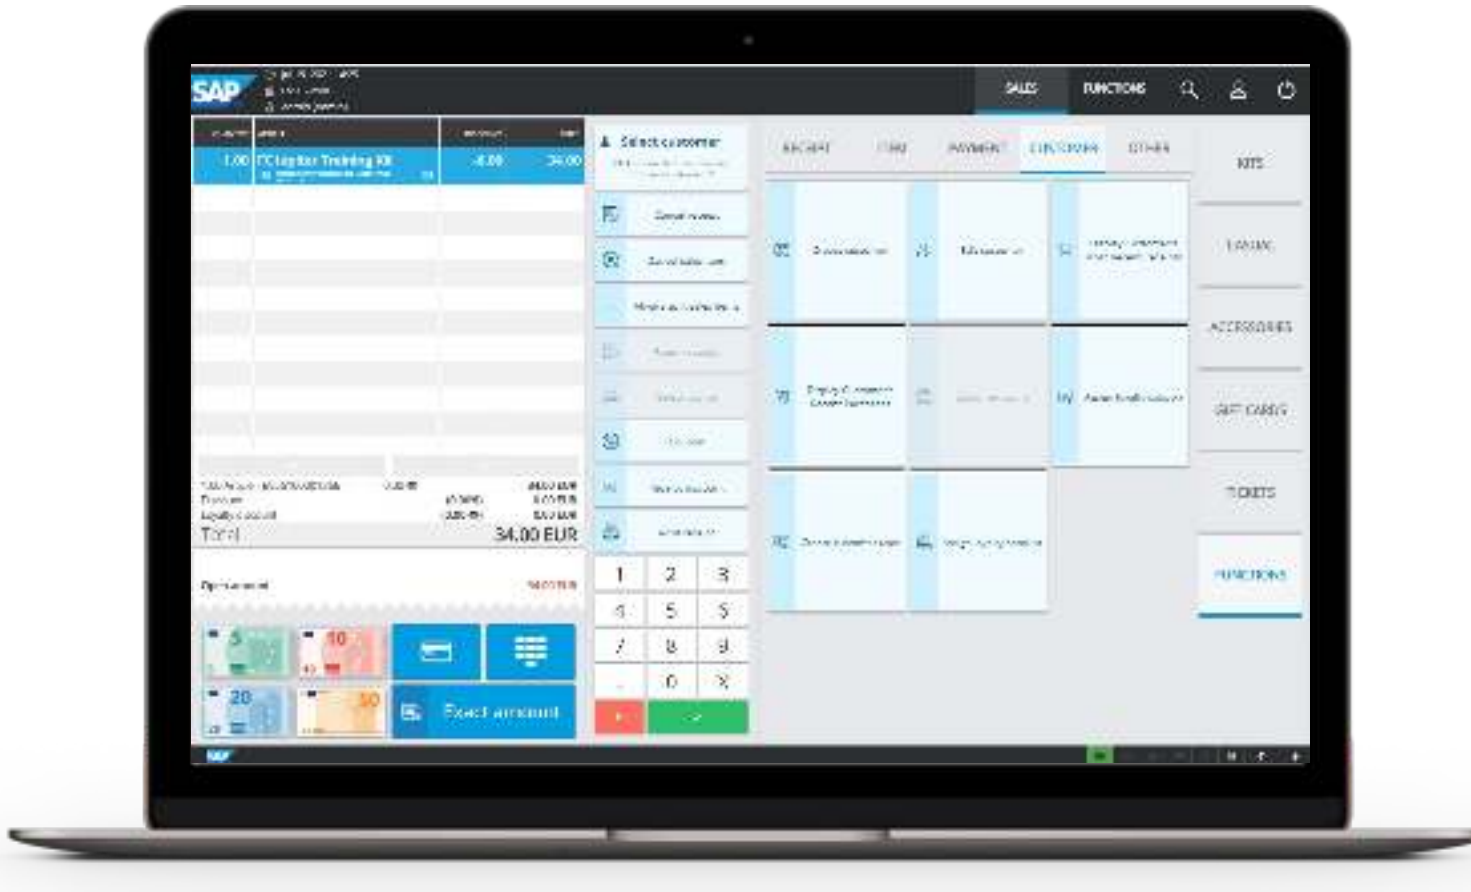

SAP Customer Checkout *Loyalty Coupons*

Capabilities and Key Features

- Include **coupons** within your loyalty program
- Customers with **sufficient number of loyalty points** can purchase a coupon
- **Provide special and personalized offers** to loyal customers, e.g. “Meet & Greet with a player”, or “LateNight or Exclusive Shopping”

SAP Customer Checkout *Influencer Coupons*

Capabilities and Key Features

- **Increase customer loyalty by discount codes promoted by influencers on Social Media**
- **Let your customers benefit from famous influencers advertising products or brands and getting discounts, e.g. 20% off**
- **Use influencer coupons overall your business**
– various POS systems and locations

SAP Customer Checkout *Stamp Card*

Capabilities and Key Features

- Reward loyal customers with stamp cards
- Buy 10 coffee, get 1 for free
- Customers collect stamps for each purchase or specific item (e.g. coffee); if the stamp card has reached 10 stamps, the customer gets the 11th coffee for free
- Define personalized discount rules to be applied on items and receipts

A young woman with long blonde hair is smiling and looking at her smartphone. She is holding a red coffee cup in her left hand and a smartphone in her right hand. She has several shopping bags, including a red one and a white one, hanging from her arms. The background shows a busy shopping mall with other people and store displays.

SAP Customer Checkout
Gift Cards

SAP Customer Checkout *Gift Cards*

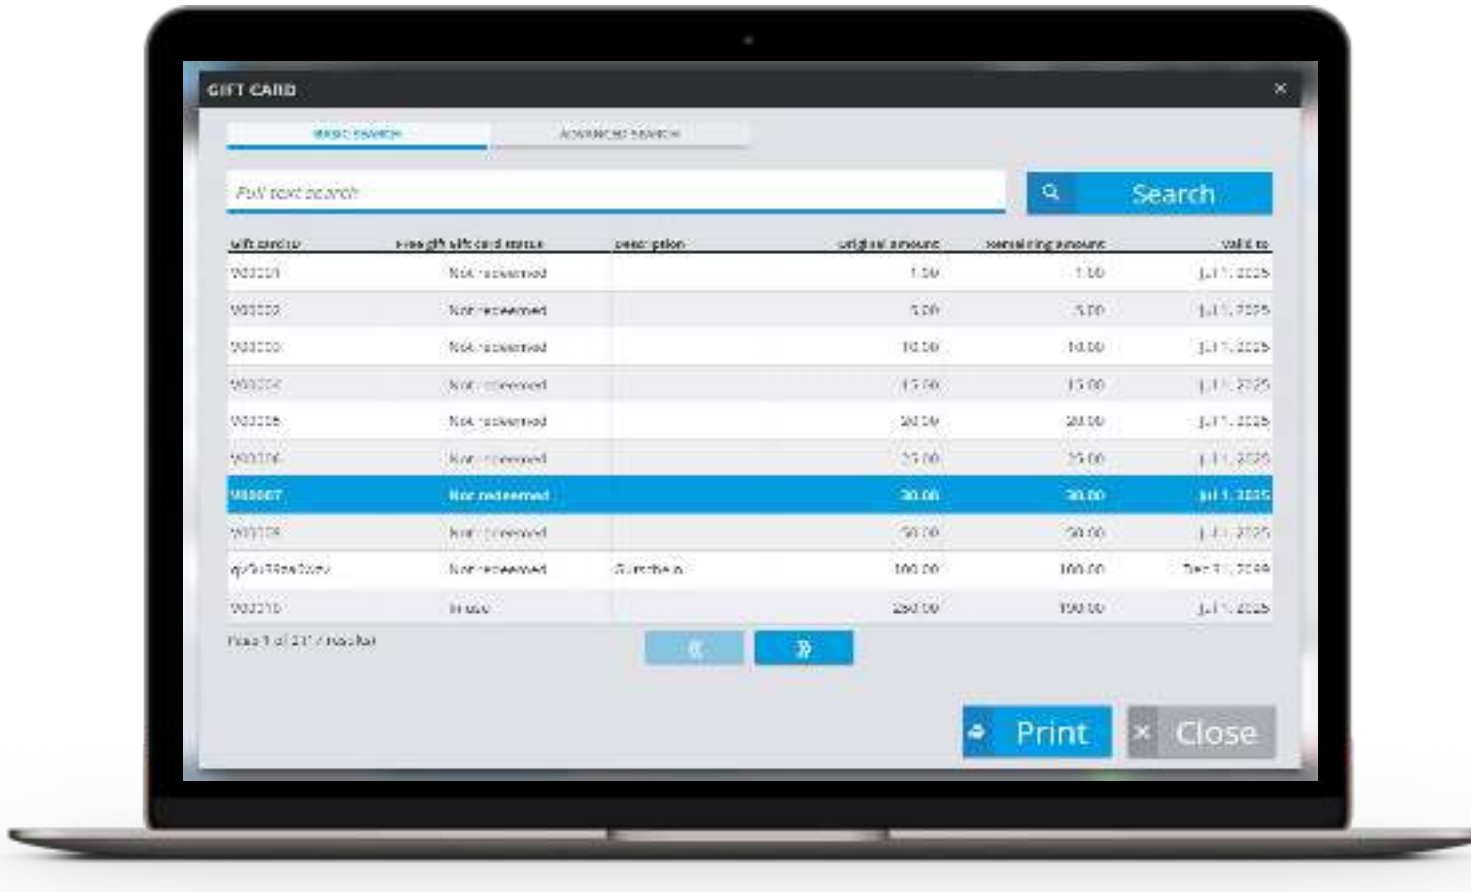

SAP Customer Checkout provides you with central gift card functionality. Include gift cards into your business to attract new customers and keep existing ones engaged.

Capabilities and Key Features

- **Out-of-the-box gift card management** for front- and backend
- **Create and manage all gift cards** for customers
- **Track all gift card transactions**
- **Generate several gift cards** with one click
- **Generate gift card reports** to track all interactions
- Design your **individual gift card patterns**
- **Pay and redeem gift cards** at point-of-sale
- **Top-up gift cards** at point-of-sale
- **Pre-printed gift card** scenario
- **Digital gift card** for customers to download
- Download and **export gift card as Mobile Pass**, e.g. Apple Wallet

SAP Customer Checkout *Gift Cards*

Capabilities and Key Features

- **Create gift cards** at point-of-sale
- **Pay with gift cards** at point-of-sale
- Buy gift card in shop A, and use it in shop B
- **Check all gift cards**, and amounts
- **Top-up gift cards**
- **Perform a pay-out by gift card** when returning items or receipts
- **Print gift cards** at point-of-sale

SAP Customer Checkout *Gift Cards*

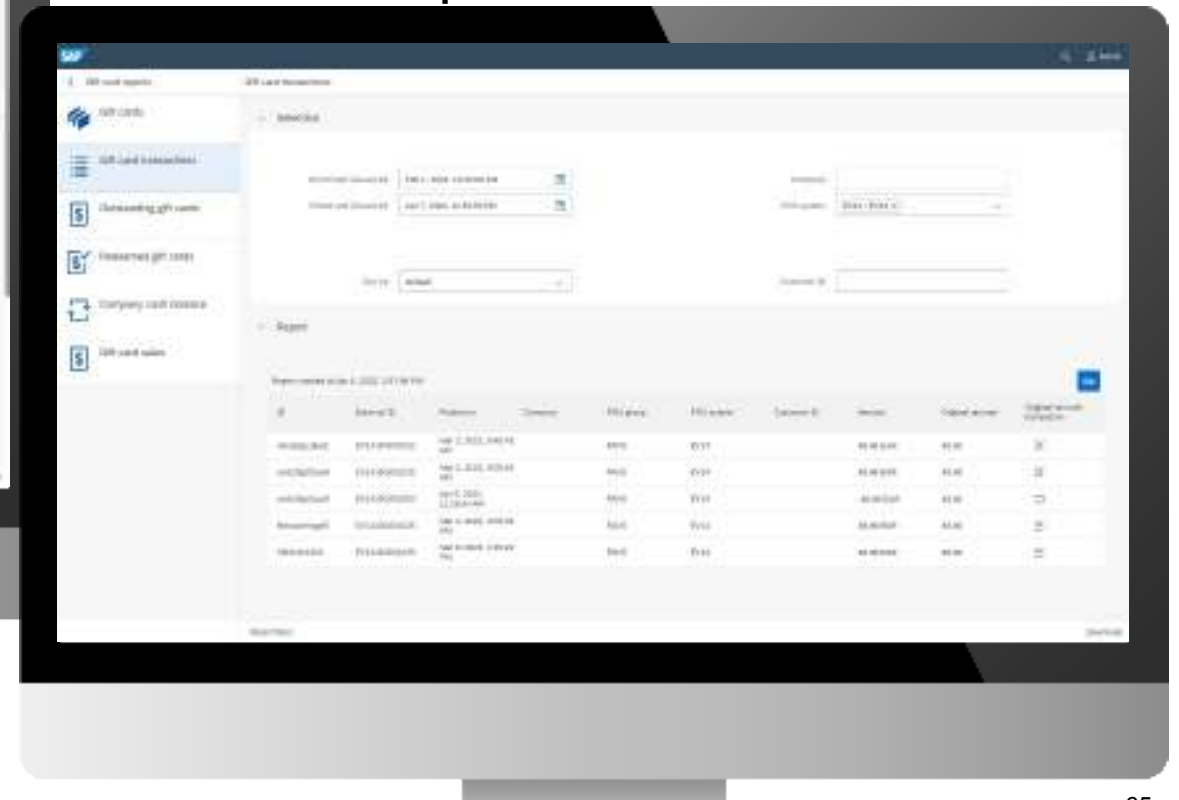

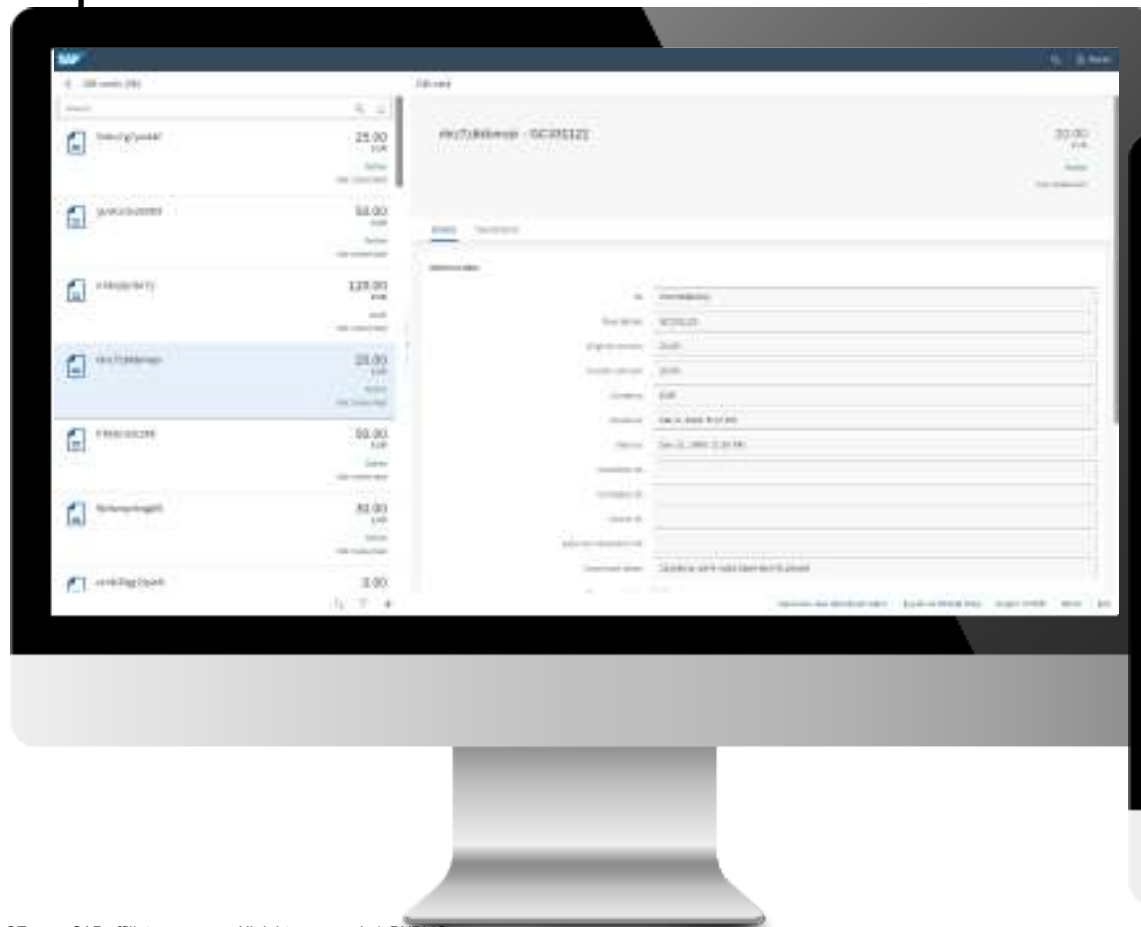

Manage all the gift cards used in POS systems centrally

Create, edit, and top-up gift cards

Search or block gift cards

Generate gift card reports to get further details

Track gift card status, outstanding and redeemed gift cards

A close-up photograph of a person's hands holding a black smartphone. In the foreground, a tablet displays a checkout interface. The background is blurred, showing a person in a white uniform and festive decorations. The text 'SAP Customer Checkout Mobile Order' is overlaid on the bottom left.

SAP Customer Checkout
Mobile Order

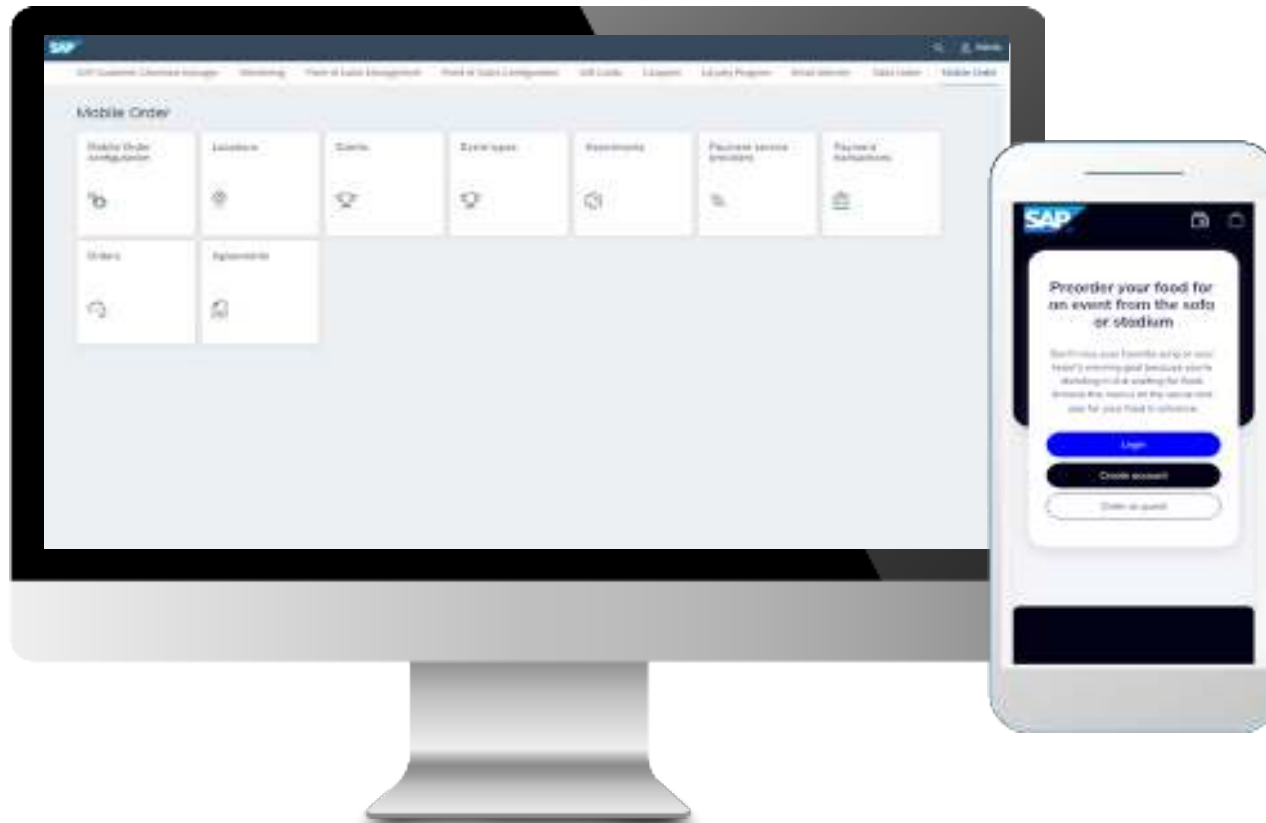

For Stadiums, Venues and more...

SAP Customer Checkout *Mobile Order*

**SAP Customer Checkout provides you with Mobile Order functionality.
Let your customers place and pay orders online while receiving a pick-up code to present at point-of-sale.**

Capabilities and Key Features

- **Out-of-the-box Mobile Order configuration**
- **Configure and set-up the web application** for ordering and paying
- **Manage your assortments, events, and locations**
- **Track all your orders** from customers
- **Integrate external SMTP server** for emails
- **Manage all payment providers**
- **Offer your customers new possibilities to take orders and pay online**

New Customers in 2021

What our customers are saying...

“With SAP Customer Checkout, we were able to implement a **comprehensive and integrated POS system that meets all our requirements** to provide a unique and smooth experience to our millions of visitors.”

Mohammed Al Hashmi, CTO, Expo 2020 Dubai

“Working with consenso, we implemented SAP Customer Checkout in just six months. While this helps us meet new cash register regulations in Germany, we are now also delivering a **better experience** for our customers.”

Stephan Poos, Project Manager, AGRAVIS Raiffeisen AG

“With access to **real-time stock monitoring and user-friendly touch screens** for order entry, we can deliver optimal service at each kiosk. And because SAP Customer Checkout is hardware agnostic, we have unlimited options for further innovation at Allianz Arena.”

Michael Fichtner, CIO, FC Bayern München AG

Thank You.
