

# Gaining Project Power Through Visualization with **SAP Business One**®

**Kitron Group Pty**  
Sydney, Australia  
[www.kitron.com.au](http://www.kitron.com.au)

**Industry**  
Engineering, construction, and  
operations

**Products and Services**  
Management of large and  
complex urban construction  
projects

**Employees**  
100

**SAP® Solutions**  
SAP Business One®  
application and SAP® Early  
Adopter Care program

Kitron manages and oversees enormous projects that involve the development of significant high-density housing projects across southeast Australia. To maintain critical oversight at all times, it engaged **Key Business Solutions** to integrate Gantt chart functionality into its project management software and SAP Business One application. With greater clarity, Kitron achieved greater flexibility. This meant higher cost efficiency, accuracy, and innovation along the value chain for better service delivery.

## Before: Challenges and Opportunities

- Introduce project visualization functionality that is familiar to company employees and easy to use
- Empower project staff with accurate, ongoing views of project status and progress

## Why SAP and Key Business Solutions

- Global organization with strong reputation for expertise in enterprise resource planning software
- World-class support for audit trail functionality to inform and reassure external stakeholders
- Implementation partner Key Business Solutions with its deep understanding of the SAP Business One application and how to implement it to give growing businesses the support they require
- The SAP Early Adopter Care program to facilitate adoption of the latest innovations from SAP

## After: Value-Driven Results

- Less time required to manage projects in part because next steps and milestones are highly visible
- Visualization of project status and progress based on Gantt chart functionality
- Flexible project management with greater range of cost-effective options during project execution
- Single, businesswide view of company activity at any given time

**“The Gantt chart visualization is great. **Visual understanding of project progress** and detailed status of subprojects means I can steer projects with confidence because I can see all contingencies of any decision. That’s project power.”**
