

# How Can You Know That a Third-Party Application Isn't Going to Break Your SAP® Software?

Customers throughout India rely on Adani Group for a huge variety of products and services. But whatever they buy – power from thermal and solar plants, sustainably grown food products, edible oils, gas, bunkering services to vessels at port, infrastructure, and much more – they know they can count on quality. Adani is all about building a happier nation, and long ago it adopted SAP® applications to help. Recently, to optimize operations, the company needed a new solution to streamline governance of the SAP software's master data, but it wanted to be sure not to incur any information security risks when incorporating it.

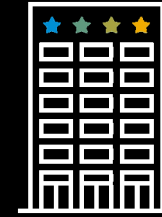

The PiLog Group, an SAP partner, presented its Master Data Quality Manager to Adani. PiLog explained that the application satisfied not only the master data governance need but also the risk avoidance requirement. That's because PiLog has obtained premium certification for the integration from the [SAP Integration and Certification Center](#). Now Adani's SAP software data is in better shape than ever, and the company rests easy knowing that no vulnerabilities were introduced by adding the PiLog product.

“Premium certification from the **SAP Integration and Certification Center** gives us peace of mind that solutions from partners have been tested by SAP for security risks to our SAP software.”

Kaushal Kabra, Head – Data Governance and Risk Management, Adani Group

By choosing third-party applications for its SAP® software that have been certified at the premium level by the SAP Integration and Certification Center, Adani knows that any security vulnerabilities have been wrung out by security scans SAP performed during its extremely thorough certification process.

**Revenue**  
US\$12 billion

**SAP® Solutions**  
Premium certification for the ABAP® programming language add-on from the SAP Integration and Certification Center

Adani Group, India's infrastructure conglomerate giant, wanted to know that its new master data governance solution would pose no major security issues for its SAP® software. Therefore, it chose a product, Master Data Quality Manager from the PiLog Group, that had achieved premium certification from the SAP Integration and Certification Center. Adani has seen no significant security problems in the product's first year and expects never to see one.

## Before: Challenges and Opportunities

- Provide strong governance and improve the quality of master data
- Ensure standardization across business units and comply better with audit requirements

## Why SAP and PiLog

- Well-established solutions with proven business processes in the SAP portfolio to fulfill the needs of this widely diversified business
- As a global provider for master data governance, PiLog's compliance with international data quality standards
- Partnership to protect joint customers from security vulnerabilities and reduce project risk

## After: Value-Driven Results

- Elimination of security vulnerabilities prior to installation
- Confidence that no major security issues will arise
- Ease of implementation with the existing SAP software and landscape
- Highly secure solution that integrates smoothly with minimal risk
- Reduced effort in solution testing and validation before implementation
- Better master data governance and improved accuracy of business transactions

**“Our customers rely on us to offer best integration without jeopardizing the quality of the SAP software code base and existing customizations. By offering premium certified solutions, we provide that assurance from both a security and a performance point of view.”**

Imad A Syed, Chief Information Officer, PiLog Group
