

Net One Systems: Improving Financial Data Visualization and Business Process Efficiency with the SAP S/4HANA® Finance Solution

Net One Systems customers benefit from the company's extensive experience with designing, installing, maintaining, and supporting computer network systems. As a leader in the network market, Net One Systems has evolved into a cloud integrator that provides customer-oriented services.

The company deployed the SAP S/4HANA® Finance solution in Japan with the assistance of a third-party consultant, an SAP® software consultant, and SAP MaxAttention™ services. The deployment has accelerated the company's integration of financial and management data and has enabled the ability to display financial information on a single table. Executives can now make business decisions using real-time data and live operational insights. Net One Systems is able to get better data visualization and establish a single source of truth, which greatly improves business efficiency.

Accelerated integration of critical data

Redesigned

Business processes by using SAP Fiori

"Ever since we deployed the system that applies best practices recommended by SAP to improve our business processes, we have been promoting migration to the SAP HANA platform and SAP S/4HANA Finance. It was only natural to move toward more visualization and simplification, and SAP MaxAttention is our indispensable strategic partner for quick and assured IT innovation."

Yuichiro Sugiyama, Operational Managing Director, Corporate Planning and Strategy, Net One Systems Co. Ltd.
