Empowering Tomorrow's Innovators: Recap of the Annual Science, Health, and Technology Fair

In an electrifying event held on April 13th, the Annual Science, Health, and Technology Fair brought together high school students from across the region to spotlight their remarkable talents in science, health, and technology. The fair served as a vibrant platform for these budding scientists, offering them the chance to explore their interests, engage in hands-on learning experiences, and showcase their creativity and problem-solving skills. Through a variety of interactive exhibits and presentations, participants not only unveiled their groundbreaking discoveries but also ignited inspiration among their peers and educators.

By fostering a culture of curiosity and collaboration, the fair facilitated networking opportunities and encouraged students to delve deeper into the latest developments in science, health, and technology. This celebration of youthful innovation serves as a beacon for the future generation of scientists, health professionals, and technology leaders, propelling them towards a brighter and more innovative tomorrow.

iCorps Cohort #17: Recap of Customer Discovery Sessions at HIC

The iCorps Cohort #17, kicked off its inaugural session at the HIC on April 20th and 21st. Over the weekend, participants engaged in immersive workshops and mentorship sessions led by industry experts, aimed at understanding and validating customer needs.

iCorps, a renowned entrepreneurial program, provides participants with intensive training and guidance to transform innovative ideas into viable businesses. As part of Cohort #17, participants are diving deep into customer discovery techniques, refining their strategies to identify target markets and gather feedback effectively. The collaborative environment at HIC fosters innovation as participants work together to fine-tune their business models and approaches.

Hands-On Learning: Basic Operating Room Principles Worshop at HIC's Simulator

On April 27th, our center hosted a successful workshop on Basic Operating Room Principles, led by Johanna Negrón. Attendees were immersed in fundamental concepts crucial for effective operation within surgical environments, gaining hands-on experience and practical knowledge under Johanna's guidance. Through interactive simulations and guided exercises, participants delved into sterile techniques, instrument handling, and teamwork dynamics, leaving equipped with a deeper understanding of operating room protocols and procedures.

This workshop not only provided valuable learning experiences but also fostered collaboration and skill development. Participants left ready to apply their newfound knowledge in real-world scenarios.

Stay tuned for future workshops and training sessions as we continue to offer innovative learning opportunities at our center!

UPR Information Systems Students Visit the HIC for an Insightful Learning Experience

Students from the University of Puerto Rico's Information Systems program recently visited the Healthcare Innovation Center (HIC) for an informative and engaging experience. The visit, organized to provide students with real-world insights into the industry, included presentations and interactions with professionals working at the center.

During their time at HIC, the students were welcomed with in-depth presentations about the center's innovative projects and cutting-edge technologies. They learned about various initiatives and had the opportunity to ask questions and discuss potential career paths in the field of information systems and healthcare technology.

The visit concluded with a Q&A session, allowing students to engage directly with industry experts and gain valuable knowledge to further their academic and professional journeys. The students left with a deeper understanding of how their studies apply to real-world scenarios and the impact they can make in the field of information systems and healthcare technology.

SCIENTIFIC INNOVATION NIGHTS

The Scientific Innovation Night on May 9th was a major milestone in healthcare innovation, co-hosted with Parallel18 and BioLeap. The event featured engaging presentations from Dr. David Lopez, Dr. Elizabeth Pérez, Dr. Luis Acevedo, and Eng. Oscar Misla, highlighting groundbreaking innovations and emerging trends. Interactive demonstrations and vibrant networking opportunities fostered idea exchange and left attendees inspired.

Scientific Nights are pivotal meeting points for executives, professors, physicians, and residents from various institutions and hospitals. These events promote collaboration and idea exchange in the healthcare community, providing a platform for professionals to discuss their research and innovations, ultimately advancing the field of healthcare.

Join us for our next Scientific Innovation Night on Thursday, August 15, at 6 p.m. at the new facilities of the Puerto Rico Science Trust in San Juan

Highlights from the I-Corps PR Program Finale at the HIC

The I-Corps PR program successfully concluded its intensive multi-week boot camp with a grand finale at the HIC on June 1st and 2nd. This event marked the culmination of an exhaustive exploration into the commercial viability of various innovative business ideas. Teams of emerging entrepreneurs presented their findings and shared valuable insights gained through a structured process of market validation and mentorship.

Participants showcased the progress they made and the potential for further entrepreneurship in Puerto Rico. The event not only highlighted their innovative solutions but also demonstrated the dynamic spirit of the local startup ecosystem. The experience provided by the I-Corps PR program continues to foster a culture of innovation and entrepreneurship across the island.

Clinical SN

Clinical Social Network

We're thrilled to announce the launch of our Clinical SN pilot this past month, a mobile application designed to seamlessly connect patients with their healthcare network. CSN ensures secure and efficient management and sharing of health information, significantly improving communication and coordination within healthcare.

The pilot, involving users from CIRACET Corp, Wellness Centers and various medical offices**,** allows us to test the application in real-world settings. This initiative is crucial for evaluating CSN's functionality and integrating valuable user feedback to enhance the app further. We're committed to continuously improving the healthcare management experience and look forward to making even more strides in this direction.

Stay tuned for more updates on this transformative project!
