Flying Checklist Mission Book

I spy with my little eye …

I hear with my little ear…

How many of these things can you see or hear on your special flight?

Mission 1: At the airport

I spy	I hear

At the check in desk

I spy	I hear
○ Luggage scale ○ Sticker on your case ○ Passports	○ The conveyer belt ○ Check in desk staff asking questions

Security

I spy	I hear
○ Baggage trays ○ Baggage scanner ○ Metal detector ○ Security guards	○ Clatter of the trays on the conveyer belt ○ Beeps of the metal detector tunnel

Departure Lounge

I spy	I hear
○ Shops ○ Cafes ○ Toilets ○ Runway ○ Boarding gates	○ Lots of people talking and waiting ○ Announcements

Flight Mission Log:

Mission 1 

Mission 2 

Mission 3 

Mission 4 

Mission 5 

You did it!

Well done
'Flight Detective'

Mission 5: Landing

I spy	I hear
○ Wing flaps move around - these are called speed brakes	○ Engine noise quieter – slowing down. Your ears might feel a **'pop'**
○ Clouds out the window - the plane will safely **wobble** as you go through them	○ **'Bing Bong'** seatbelts on for landing everybody!
○ Land getting closer out of the window	○ Baggage rattling
○ Plane turning left or right (wings flaps pointing up or down)	○ **'Clunk'** the wheels coming back down for landing
○ Runway on the ground getting closer	○ **'Bump'** as they tyres land on the runway
○ Plane on the runway going really fast	○ ***Noisy*** engines - this is the powerful brakes slowing the plane down safely
○ Plane taxiing to the airport	○ **'Bing Bong'** cabin crew say goodbye message!
○ Seatbelt sign off	
○ Everybody getting ready to go!	

Mission 2: Onboard the aircraft

I spy	I hear
Getting on the plane	
○ Cabin Crew ○ Rows of chairs ○ Overhead lockers	○ Engine humming ○ People talking & trying to find their seats
My special seat	
○ Armrests ○ Seatbelt ○ Safety card (in front) ○ Light (look up) ○ Fan (look up)	○ **'Bing Bong'** everybody onboard ○ **'Click, clunk'** lockers opening and closing ○ Captain's welcome message
Ready for take off	
○ Airplane taxiing (driving) to the runway ○ Lights flicker on/off ○ Seatbelt sign on ○ Wing flaps moving up and down	○ Lots of people talking ○ Cabin crew safety messages ○ **'Bump bump'** over to the runway ○ **'Bing Bong'** cabin crew sit down, seatbelt on!

Mission 3: Let's fly!!!

I spy	I hear

Take off

I spy	I hear
○ Plane starts moving	○ *Noisy* engine power!
○ Runway *speeding* by faster	○ **Rattle** of the lockers
○ Tipping back into your seat as the plane nose lifts up	○ **'Clunk'** the wheels are moving back up into the aircraft
○ Ground below moving further away - **you are flying!**	○ Engines getting a bit quieter – the plane is slowing down a little. This stops it being too noisy near the airport
○ Clouds out of the window	○ **'Bing Bong'** it is safe to unfasten your seatbelt if you need to move around
○ Plane steering left or right (wings point up or down)	○ Cabin crew announcement
○ Wing flaps move and change the shape	

You might feel the plane and wobbling up and down as you lift off. This is the aircraft moving through the bumpy air in the clouds. Your ears might go 'pop' as the plane gets higher.

Mission 4: Cruising in the sky

I spy	I hear
○ People moving around	○ People chattering excitedly
○ Cabin crew pushing a trolley with drinks and snacks	○ Captain or cabin crew announcements (messages)
○ Clouds out the window	○ Baggage compartments open and shut as people get things from their bags

Now the aircraft is whizzing through the sky. It might wobble sometimes as it travels through the air, just like a car when it travels on a bumpy road. This is safe. It is called turbulence. Sometimes the seatbelt sign comes on to make sure everyone is sitting down. This is a good time to have a drink or snack and enjoy some activities.

After a while- you're nearly there…

○ Cabin Crew tidy up time	○ Engine noise getting quieter (this is the pilot starting to slow the plane down a little- you're nearly there)
○ Seatbelt sign is back on
