

A TTM-specific element within the trusted SiteWise Prequalification framework.

Designed for organisations that provide and deploy Temporary Traffic Management (TTM), this element assesses the systems, people and capability that support safe, efficient and risk-based TTM delivery.

Who is it for?

TTM Companies

Showcase your TTM capability and risk-based systems to clients and councils.

Contractors & PCBU's seeking to engage

An easy way to see how a TTM company is prequalified in the areas that matter - specifically related to TTM risk and delivery.

Councils & road controlling authorities

A consistent and reliable mechanism to understand the capability of TTM suppliers operating in your network.

What it looks at

- 1. TMP & Risk Assessment Capability** How TTM risk is identified, assessed and managed using a risk-based approach.
- 2. People & Competency** The right people, training, competencies and supervision systems.
- 3. Plant & Equipment** TTM vehicles, equipment and resources selected, maintained and managed for safe delivery.
- 4. Assurance & Evidence** How performance is checked, monitored and evidence is maintained to demonstrate that systems work.

The benefits

Easy way to see how a company is TTM prequalified

Focused on TTM-related risk areas

Confidence in risk-based capability

Stronger outcomes for projects and the public

Supports better informed and consistent decisions

One framework. Clearer choices. **Better outcomes**

SiteWise TTM Prequalification gives contractors, PCBU's and councils a simple, consistent and reliable way to engage capable TTM providers in a risk-based world.

Developed by industry, for industry. Supporting the transition to risk-based TTM in New Zealand.
