

GP consultation and procedure fees

Good care takes time. Our fees are designed to support thorough, careful appointments while keeping costs as clear as possible.

iHealth Centre is a private billing practice. Fees vary depending on the type of appointment, the time required, and the care provided.

There may be up to three subsequent 1-hour long appointments, at the doctor's discretion, before any medication can be prescribed.

Billing and appointment information

Private billing

iHealth Centre is a private billing practice. Fees vary by practitioner, appointment type, and the care provided. Please review the fee information before booking, or contact reception if you are unsure which fee applies. Eligible patients may be able to claim a Medicare rebate for eligible services.

Prescriptions and referrals

Providing prescriptions and referrals without consultation is not appropriate in most circumstances. We need to consider your medications and referrals in the context of all your health data in order to provide proper care, so we request you make an appointment to obtain these.

Preparation of correspondence, repeat/replacement prescriptions or pathology forms may incur a charge.

Payment and Medicare processing

We accept all major credit and debit cards, as well as cash and bank transfer. Payment is processed at reception on the day of your appointment.

If you bring a physical debit card we may be able to return your Medicare rebate instantly at the time of payment or send it to Medicare for overnight processing.

WorkCover and insurance invoices must be paid on the day of your appointment, and you are responsible for filing any relevant claims.

Cancellations and non-attendance

If you need to cancel or reschedule your appointment, please provide as much notice as possible (at least 2 hours for GP, 24 hours for Allied Health).

Late cancellations and missed appointments may incur a fee, particularly for longer appointments or allied health services. This helps us offer appointments to other patients who may be waiting for care.

Transfer of medical records (full file)

\$40 + GST

This process involves clinical and administrative input to ensure accuracy, thoroughness, and compliance with privacy standards and RACGP guidelines. An onsite doctor reviews your file to address any outstanding clinical reminders and confirm your record's readiness for secure transfer. Our reception team then facilitates the encrypted transfer, ensuring your data remains protected.

Our commitment to fair and transparent billing

The Australian Medical Association (AMA) Fee structure forms the basis of our billing policy. Our standard appointments are booked in time blocks. However, we know that care does not always fit into neat boxes.

If your appointment goes significantly longer than the scheduled time due to clinical need, we may apply a fair adjustment based on the time actually spent, usually in 5-minute increments. We always aim to be transparent and respectful about fees, and you are welcome to ask us about billing at any time.
