

DPS Skis – Precision-Built for the Pursuit of Performance

DPS Skis have been at the forefront of ski innovation since 2005. They merge cutting-edge carbon fiber technology with a relentless drive to engineer the perfect turn. From pioneering the first rockered ski with sidecut to launching PHANTOM Glide, a permanent base treatment for all-condition glide, DPS are constantly redefining the possibilities in ski design.

DPS are uniquely capable of refining skis for a range of environments—from deep powder to technical terrain. Based out of their ski manufacturing facility in Salt Lake City, Utah, they maintain full control over every stage of their production process, from wood core machining to top sheet printing and pressing. Real-world testing takes place just minutes from their factory, enabling fast, data-driven design evolution. This rigorous production and testing process ensures the highest standards of quality and performance in every pair of DPS skis.

DPS embodies the same dedication to durability, innovation, and elite performance that defines our approach at Brigantes . Whether for professional use or demanding alpine conditions, DPS delivers gear that's built to perform—and built to last.

OSM-COMBAT-DISTANCE (Over Snow Mobility - Assault)

Skill Level: Low, no prior ski experience necessary.

Purpose: For fast and efficient dismounted mobility over flat to rolling terrain. Excels in tighter quarters, brush, and forest. Easily maneuverable.

Mission Set: SOF without mountainous terrain, conventional forces, large troop movements, support elements, scouts, point patrol, reconnaissance elements. Requires minimal skiing ability.

Skis: Short, highly maneuverable walking ski. The skis feature a fishscale or semi-permanent skin inlay base. More stable than OSM-COMBAT-DISTANCE. Faster and more efficient than snowshoes. Full skin available for transition to steeper terrain or pulling very heavy loads. (pulk, sled, etc). Treated with permanent PHANTOM Glide for service free performance.

Base Options: Fishscale, skin inlay

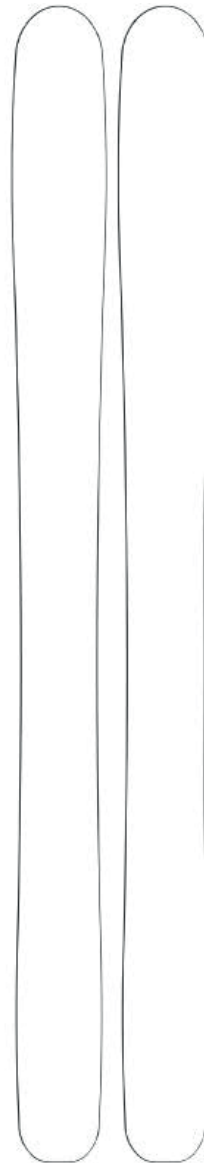

Sizes: 153cm

Dimensions: 129/100/114, 130/100/115

Boot: Universal, any standard issue cold weather boot, Vapor Barrier boot, Lundhags.

Binding: NNN-BC, Hagan X-Trace, Nordigrip, or similar.

OSM-COMBAT-DISTANCE (Over Snow Mobility - Distance)

Skill Level: Medium, some ski experience necessary.

Purpose: Dismounted mobility, covering long distances, pulling loads, and fast travel over flat to moderately rolling terrain.

SOF in the absence of steep mountainous terrain, conventional forces for troop movement, support elements, scouts, point patrol, reconnaissance / over-watch elements.

Skis: Skis feature a fishscale or semi-permanent skin inlay base. Full skins are available for transition to steeper terrain or pulling very heavy loads. (pulk, sled, etc). Turned up tail for retreat, supple, rockered, pre-curved shovel for breaking trail, floatation, and max fore-aft stability. Treated with permanent PHANTOM

Base Options: Fishscale, skin inlay

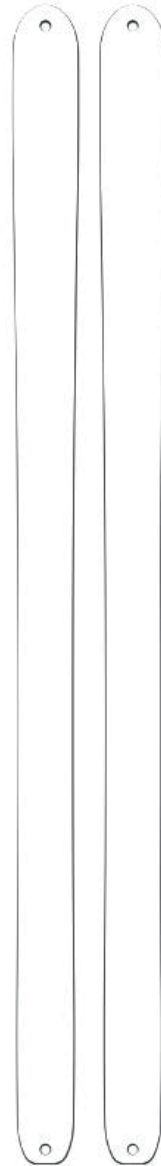

Sizes: 184cm, 195cm

Dimensions: 104/87/91, 99/82/87

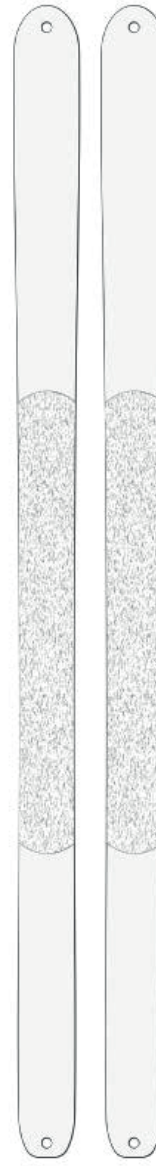

Boot: Light to Midweight boot. Lundhags or similar with removable liner.

Binding: NNN-BC, Hagan X-Trace, Nordigrip

OSM-COMBAT-MAT (Military Alpine Touring)

Skill Level: High

Purpose: Ascend and descend steep mountainous terrain.

Mission Set: Special Operations Forces (SOF), scouts, point patrol, reconnaissance / overwatch, sniper elements

Skis: DPS Carbon Pagoda Tour 100, Alpine Touring ski, like a traditional downhill ski but lighter. Fitted with climbing skins for ascending. Treated with permanent PHANTOM Glide for service free performance.

Base Options: World Cup alpine race base

Sizes: 153cm, 163cm, 171cm, 179cm, 184cm

Dimensions: 129/100/114, 130/100/118 131/100/116, 130/100/115, 129/100/114

Boot: Plastic Alpine Touring boot, the same boot recreational skiers use for backcountry skiing. Heavy weight but offers the most downhill control.

Binding: ATK Releasable Alpine Touring binding with lockable heel for controlled descent.
