

What we're learning this term

We are communicators...

We will be learning lots of new vocabulary this half term and thinking carefully about how we can develop our oracy skills. We will do "telling time" every day, an opportunity to practise speaking in front of our peers, asking and answering questions, and promoting good listening skills.

We are mathematicians...

This half term we are thinking about numerical patterns and shape, space and measure. We will be learning how to match, sort and compare objects and different quantities, and how to create, identify and extend repeating patterns.

We are learning to understand the world...

We will spend lots of time outdoors exploring our class garden, starting by helping to tidy up the plants and learning about seasonal changes in our garden. We will plant bulbs ready to grow in spring.

We will also be learning about our school community, then thinking about our local community. This helps us conceptualise the world around us and learn about the places and people in it.

We are musicians...

We sing lots of songs all day, every day! We will practise singing at different volumes and in different pitches, and learn songs while developing our understanding of body percussion. We have singing assembly every Wednesday, where we learn new songs to sing with the rest of the school.

We are artists...

There is constant access to art resources on our art trolley and outside. Children make masterpieces every day through their own initiative and talent!

We will be drawing and painting self-portraits as part of our "All About Me" topic, being careful to look in the mirror to get our faces right. We will also be learning how to use colour and create patterns with collage when we learn about Elmer.

PE days

Our PE day is Friday, with Coach Ramone.

That's the same content throughout, just consistent punctuation, spacing and phrasing. Send over the next class's copy whenever you're ready and I'll do the same.
