Support

Our Australian-based sales and support teams are experts in digital solutions. When you call TasmaNet, you're speaking to someone local, who understands exactly how to get you back on track.

Connectivity

With Fixed Wireless, Enterprise Fibre or the NBN access network, you can unlock the potential of the cloud, integrate your business ICT, and power future growth.

Solutions

Our comprehensive product suite will ensure your business leads the way in fast, reliable and secure technology. We work with industry leading partners to design and deliver tailored solutions, to enable your business to grow.

Market Leader

We lead the market in finding unique solutions for business and enterprise. Our award-winning team is passionate and creative and they love to solve problems.

TasmaNet: Australia's Trusted Provider of Enterprise-Grade Connectivity & Cloud.

TasmaNet provides premium digital solutions, specialising in business and Government.

With a focus on regional connectivity, TasmaNet partners with global technology experts to deliver cutting edge Internet, voice, networking, security, and cloud services for Small Business, Government & Enterprise, backed by our Australian-based expert delivery and support teams.

Since 2004, we've built and operated a wireless data network that connects 85% of Tasmania's population, including some of the most remote communities. Along with our own premium fibre network, we also offer enterprise-grade nbn™ broadband throughout Australia.

Our proven expertise lies in creating tailored solutions that scale with your needs. From secure cloud infrastructure to voice and networking systems that simply work, we give you the tools and confidence to grow. With teams in Hobart, Launceston and across the state, we bring local knowledge and hands-on support to every project.

At TasmaNet, our mission is simple – to empower organisations to achieve their goals through reliable, secure, and scalable technology. We're committed to delivering enterprise-grade solutions that enhance performance and innovation for businesses everywhere, including those operating beyond metropolitan centres.

Industry Powering business with reliable connectivity and around-the-clock protection for data and networks.

Education	As learning evolves, TasmaNet provides the high-bandwidth, secure solutions students and teachers need.
Government	TasmaNet is a trusted partner to Local, State, and Federal Government, delivering secure, high-grade connectivity and networking for public services across Australia.
Healthcare	TasmaNet enables smart, safe, and scalable healthcare with enterprise-grade connectivity that supports telehealth and collaboration across city, rural, and regional services.
Professional Services	TasmaNet delivers secure, scalable solutions that help professional services work efficiently, protect sensitive data, and stay connected.
Manufacturing & Mining	TasmaNet works with businesses in the resource sector to connect to new and exciting ways to re-imagine traditional business practices, and find solutions to ever-changing challenges.

Products

Connect your business to your customers and to the world, no matter where you do business.

TasmaNet understands that every organisation relies on secure, reliable, and scalable technology to succeed. That's why we deliver end-to-end digital solutions designed to keep you connected, protected, and ready for growth.

Whether it's high-speed Internet that powers day-to-day operations, enterprise-

grade networking that links multiple sites, or cloud and cyber security solutions that safeguard your data, our products are built to meet the demands of modern business. We combine global technology partnerships with our Australian-based support teams to deliver solutions you can trust.

From voice systems that enhance customer connections, to IoT and data centre services that drive efficiency and innovation, TasmaNet provides the digital backbone your business needs to thrive—no matter your size, industry, or location.

Managed Services

Internet

Unlimited, uncomplicated Internet, built for business.

Enterprise Ethernet

nbn™ Enterprise Ethernet delivers cost-effective, dependable, superfast connectivity and symmetrical speeds using dedicated end-to-end fibre to your business sites anywhere in Australia on the nbn™ fixed line network.

Business Internet

TasmaNet Business Basic Internet offers unlimited, uncrowded plans at a great price for small businesses and home offices looking for Internet a step above everyday residential plans without needing extended support hours or priority service restoration.

SD-WAN

TasmaNet SD-WAN delivers secure, flexible networking that intelligently manages multiple connections across sites. Optimised for performance, it improves reliability, reduces downtime, and ensures critical applications always get the bandwidth they need.

Business Fibre Internet

Business Fibre Internet is a premium, high performance business broadband service that provides the speed and bandwidth that is crucial for modern, data hungry businesses. Bandwidths of up to 10GB Fibre are now available!

Networking

Connect your business sites with a resilient and secure TasmaNet Managed Private Network.

Managed Private Networks Secure, Multi-Site Connectivity

As communications technology improves, businesses are increasingly capable of being distributed across multiple sites. TasmaNet's Managed Private Network allows you to cohesively connect distributed sites together into a single, secure private network.

With connection speeds that exceed your demand, our highly secure MPLS network gives

you access to your remote assets quickly and simply, as though they were connected to your local network with our Layer 3 VPN.

TasmaNet's Managed Private Networks are available over any of our existing connectivity options. Our local, expert network engineers will evaluate and configure your Private Network and provide ongoing monitoring, along with added support from our Service Team and custom Service Level Agreements.

Our extensive network in Tasmania coupled with our global partnerships, allow us to connect you to your business assets anywhere in the world.

Voice

A smart, cost-effective way to connect

Mobile

SIM-Only Mobile Plans to connect you even more

Stay connected with flexible SIM-Only plans on a 4G/5G network. Bring your own phone, enjoy big data allowances, and simple month-to-month service. All plans include unlimited standard calls, no lock-in contracts, free SIM delivery, and Australian-based support.

Business Voice

Intelligent Business Communications

TasmaNet Business Voice combines cloud-based PBX features with flexible SIP trunking,

powered by our business-grade connectivity. Easily add users, scale during busy periods, and route calls seamlessly to staff on-site or mobile—with options for hardware, softphones, and mobile apps.

Business SIP

A smart, cost-effective way to keep your business PBX connected without ISDN.

TasmaNet Business SIP keeps your PBX connected with virtual SIP trunking—no ISDN required. Add lines or users quickly without new hardware, and enjoy reliable voice and video quality through our business-grade internet with dedicated bandwidth for critical calls.

Cyber Security

Protect your business network, users, and devices

Cyber Threat Assessment

Businesses are facing increasing pressure when it comes to data security.

A TasmaNet Cyber Threat Assessment can help you better understand risks and vulnerabilities to your own business network and identify steps you can take to protect it's information and people. You will gain insight into the effectiveness of your current network security solution, how applications and web resources are used within your network, and actionable steps you can take to optimise security and performance.

Firewall-as-a-Service

Protect your entire network and every user

TasmaNet is a proud Fortinet Select Partner with Secure Access & SD-Branch and Secure SD-WAN specialisation accreditation, making us your first choice for expert advice and world-class protection of your business network. Our specialist security team includes some of the best-qualified Fortinet Network Security Experts in Australia, ensuring you optimal security outcomes for your business.

We are a leading Fortinet partner, being the only in Australia with four security specialisations.

Cloud

Private and Public Cloud Services

TasmaNet Core® IaaS

Elevate your business to the cloud with TasmaNet Core® IaaS

TasmaNet Core Infrastructure-as-a-Service (IaaS) lets you transition to the cloud while leaving you in control of your business data and ICT expenditure. Let your IT team focus on supporting strategy and innovative projects that drive growth without being burdened by the management and cost of on-premise hardware.

Backup for Microsoft 365

Data retention solutions offering TRUE data protection.

TasmaNet's Backup for Microsoft 365 gives you the ability to protect your Office 365 data from accidental deletion, security threats and retention policy gaps, quickly restore individual Office 365 items, and meet legal and compliance requirements with efficient eDiscovery of Office 365 backup archives.

Cloud Backup

Unlock easy and cost-effective off-site cloud Backup-as-a-Service.

TasmaNet Cloud Backup provides a comprehensive data protection environment that enables businesses of all sizes to protect and manage workloads across all platforms.

Internet of Things

Information. Opportunities. Transformations.

Digital transformation is reshaping how organisations operate – connecting the digital and physical worlds to drive efficiency, sustainability, and innovation.

At TasmaNet, we design and deliver tailored technology solutions that solve real business challenges. In partnership with local technology providers, we combine advanced data collection, connected devices, and cloud-based intelligence to empower clients with real-time, evidence-based insights and complete supply chain transparency.

Backed by our own fixed wireless network spanning key population and industrial areas, TasmaNet enables smarter, faster, and more efficient operations for modern enterprises.

Data Centre

Highly secure, always growing

Data Centre Hosting

Why take on the cost and complexity of managing your own network and server infrastructure when TasmaNet can provide secure, reliable, and locally hosted solutions right here in Tasmania?

Through access to state-of-the-art Tasmanian data centre facilities, we offer enterprise-grade security and resilience, with Tier 2+ protection and Tier 3-level redundancy for critical systems such as cooling and power. Whether you require a dedicated enterprise rack or a more cost-effective per-RU co-location option, TasmaNet delivers flexible solutions within a trusted, locally managed environment.

Direct Routing for Microsoft Teams

What is Teams Calling?

Teams Calling is Microsoft's Cloud Based Phone System built in the Microsoft Teams application. It's the Microsoft 365 Phone System in the cloud or sometimes called Microsoft 365 business voice. The Microsoft Phone System can be delivered over Direct Routing.

Teams Calling, also known as Direct Routing allows you to port your business phone numbers into to the Teams application and make and receive calls from the app.

Microsoft Teams Calling is a full enterprise grade phone system providing a professional call experience with Auto Attendant, Hunt Groups, Call Queues, Voicemail to Email, Video Calls and Conference/ Meetings, Music and Messages On Hold while working in the office, on the road or at home.

Teams Calling Deployment

The TasmaNet team will help you choose the correct Microsoft Office 365 licence type to enable Teams Calling.

We then take care of everything else including setting up your Teams Calling Plan and Manage your number porting. We will get you set up and trained on how to self manage and work with your Microsoft partner to deliver an outstanding Teams Calling Solution.

We know that every business is different, so we work with you to understand how your business works, to develop your customised Teams Calling solution.

Managed Services

TasmaNet offers a comprehensive Managed Services portfolio designed to support businesses and government agencies with reliable and scalable ICT solutions. TasmaNet services include tailored infrastructure-as-a-service (IaaS) cloud platforms, secure managed networks that span multiple sites (such as MPLS and VPN-based private WANs), enterprise-grade internet connectivity and voice services, and 24/7 Australian-based support with Service Level Agreements.

In addition to connectivity and infrastructure, TasmaNet's offering covers custom managed IT operations: proactive monitoring and maintenance of systems, dedicated field

resources for regional support (especially across Tasmania and remote areas), and strong cybersecurity services aligned with government-grade requirements.

TasmaNet managed services allow organisations to outsource critical ICT operations — freeing internal teams to focus on strategic initiatives — while benefiting from a single provider that handles everything from cloud and network to voice and security, with the reliability of a fully Australian-based service desk.

Become a Partner

National Solutions. Local Outcomes.

TasmaNet's reputation is built on delivering uncompromising, business-grade solutions right here in Tasmania. This expertise, trusted by local businesses, now extends across Australia. While our reach is national, our success remains grounded in strong local connections.
