

# Toro Loco Sports Bar Combats Food Waste Theft with MarketMan

## Customer name

Toro Loco

## Location

Bocas del Toro, Panama

## Saving Time with MarketMan

"We save a ton of time ordering a week. We put in almost no effort. It's helpful to see prices by suppliers, so we can find the lowest cost for goods automatically."

**Robbin Blythe, Founder at Toro Loco**

## About Toro Loco

To survive lockdowns and the loss of tourists to the famous resort island known for diving and surfing, Toro Loco transitioned to a full-time restaurant.

## The Challenges

Before they implemented MarketMan, Toro Loco operated on the honor system, and without an organized way to track inventory, they were unaware of just how much employee theft and food waste was costing their business.

- Taking inventory counts by hand
- Losing \$600 a month due to employee theft
- Relied on staff for accurate inventory counting, leading to inconsistent numbers
- Operating on half staff, cooks on call, and a simple menu due to the low volume of guests

## MarketMan's Solution

Toro Loco relies on MarketMan to track their inventory from ordering to service and preventing theft and waste. Benefits include:

- Saving thousands of dollars due to theft protection
- Quickly identify discrepancies through logged ingredients and sales
- Auto-ordering feature allows staff to stay on top of inventory, ordering items as needed every few days
- Keeping costs low by finding the best supplier deals
