

Identify and monitor critical internet threats.

Purpose-built for government agencies, Outtake is the federal government's trusted unified platform to detect, map, and monitor threats at AI speed and internet scale.

51%

of global internet traffic is now automated bots

703%

increase in phishing attacks YoY

300%

surge in AI bot activity this year

37%

of all internet traffic is "bad bots" today

THE PROBLEM

Adversaries move fast. Outtake helps you keep up.

01 VISIBILITY

Blind to Emerging Threats

Attacks launch well before they reach your network. Manual OSINT misses coordinated campaigns, spoofed domains, and disguised hostile narratives targeting your mission.

02 PRIORITIZATION

Drowning in Alert Noise

Security teams can't distinguish critical abuse from irrelevant signals. Without semantic prioritization, high-impact threats get buried in the backlog.

03 RESPONSE

Slow, Manual Takedowns

AI-powered adversaries outpace human-led responses. Reactive workflows leave agencies, leadership, and individuals exposed far too long.

THE DIGITAL TRUST JOURNEY

Identification, classification, and prioritization in hours, not weeks.

STEP 01 → Detect Threats

Agentic OSINT surfaces threats across all digital spaces

STEP 02 → Understand Risk

Threat correlation ranks what matters most to your agency

STEP 03 → Disrupt Attacks

Agentic DRP + Threat Graph identify and classify full adversarial networks

STEP 04 → Prove ROI

Analytics quantify impact and justify investment

STEP 05 → Predict & Prevent

Unified intelligence keeps you ahead.

TRUSTED BY THE BEST

THE PLATFORM

See everything. Stop everything.

CORE
FUNCTIONS

Triage

Take Action

INTELLIGENCE

AGENTIC OSINT

Open Source Intelligence

AI-powered automated discovery across domains, social media, apps, and dark channels, surfacing threats before they scale

AGENTIC DRP

Digital Risk Protection

Generating actionable intelligence by mapping threat infrastructure across platforms, revealing the hidden links that single-point tools overlook.

COVERAGE

SOLUTIONS

Built for every team protecting your organization.

Threat Intelligence

Detect, prioritize, and investigate real-world threats.

- Real-Time Investigation
Automated processing of open source text, image, and video data
- Location & Event Monitoring
Credible threats to physical assets or events
- Map Connections
Automatically surface connected networks of threats and threat actors

Individual Protection

Protect priority individuals from impersonation, target harassment, and real-world threats.

- Executive Impersonation
Across domains, social, ads, apps, and messaging platforms
- Leaked Identity Detection & Takedown
Credentials, PII, financial data
- Person-of-Interest (POI) Threat Tracing
Continuous investigation of individuals posing credible threats

Agency Protection

Dismantle coordinated impersonation campaigns across digital channels.

- Agency Impersonation and Fraud Campaigns
Across domains, socials, ads, apps, messaging platforms
- Fake Employee Remediation
Stop fraudulent employee activity and recruiting abuse

PROVEN OUTCOMES

Results the world's top agencies rely on.

20M+

Potential cyberattacks scanned in 2025

17M+

Text, image, video, and other alerts processed in 2025

4M+

Investigations in 2025 alone
