

# TTM WHITEPAPER

# Executive Summary

 **TTM**: The native utility token of the Tradetomato ecosystem

A trading automation platform that unifies centralized and decentralized finance (CeFi & DeFi).

TTM provides access to the Tradetomato platform and features, including proprietary on-chain algorithmic vaults, trading strategies & tools, dashboards & performance insights, and much more.

**DISCLAIMER:** TTM is not an investment product and does not represent a claim on profits or equity.

# What TTM does

## TTM does

- ✔ Unlocks platform features and service tiers.
- ✔ Fuels on-chain vault operations through fee mechanics.
- ✔ Enables staking for access and rewards where applicable.

## TTM does not

- ✘ No profit rights, dividends, or redemption claims.
- ✘ Not an e-money token or asset-referenced token under MiCA.

# Token Overview - 1

# Token Overview – 2

Circulating supply (per January 1<sup>st</sup> 2026)

**130,495,946.70 TTM**

Total max supply

**1,000,000,000 TTM**

Total supply (per January 1<sup>st</sup> 2026)

**996,200,000 TTM**

Transferability

**Freely tradable on CEXs, DEXs, and swap protocols**

Divisibility

**Yes**

Market cap and price

**[See Coinmarketcap](#)**

# Token Distribution

The TTM token supply has been thoughtfully allocated to support long-term growth, incentivize early contributors, and build a sustainable ecosystem. Each allocation category is subject to specific lock-up and vesting conditions designed to ensure responsible distribution and alignment with Tradetomato's mission and values.

The table below outlines the detailed distribution terms, including allocation percentages, token price at issuance, vesting schedules, lock-up periods, and the number of tokens released at the Token Generation Event (TGE).

	Price	Total Tokens	% Supply	Vesting	Lock	TGE Release
Angel	\$0.0060	87,500,000.00	8.75%	24	2	0.00%
Seed	\$0.0070	71,500,000.00	7.15%	18	1	3.00%
Private	\$0.0080	25,000,000.00	2.50%	12	1	6.00%
KOL	\$0.0085	6,000,000.00	0.60%	8	1	9.00%
Public	\$0.0100	10,000,000.00	1.00%	6	1	12.00%
Advisors	-	40,000,000.00	4.00%	36	6	0.00%
Ecosystem	-	250,000,000.00	25.00%	60	0	0.00%
Partners	-	40,000,000.00	4.00%	24	3	0.00%
Staking + Liquidity	-	140,000,000.00	14.00%	12	0	10.00%
Marketing	-	130,000,000.00	13.00%	24	0	0.05%
Team	-	80,000,000.00	8.00%	36	12	0.00%
Treasury	-	120,000,000.00	12.00%	48	6	0.00%
<b>Total</b>	-	<b>1,000,000,000.00</b>	<b>100.00%</b>	-	-	-

# Token Distribution

The chart on the left provides a clear visual representation of how the total TTM supply is distributed among different participant groups, including community incentives, team, early investors, partners, and ecosystem reserves.

This structure ensures a balanced approach between immediate utility and long-term commitment from all stakeholders involved in the Tradetomato ecosystem.

# Token Utility & Use Cases

## Platform access

TTM is required to unlock the full suite of tools and features on the Tradetomato platform. Access is tier-based: the more TTM held or staked, the more features become available (e.g., backtesting, number of algorithmic strategies and portfolio connections).

## VIP-service

TTM is required to unlock and use the VIP-service and its respective tools.

**Access:** TTM is required to access the VIP-service.

**Services:** VIP-clients pay for some of the services (fees) in TTM.

# Token Utility & Use Cases

## Tradetomato Vaults (on-chain trade automation)

Tradetomato Vaults are smart contracts that allow for the execution of on-chain (trading) strategies. Each individual vault is owned by the wallet used to approve its creation. Therefore, users always remain in full control of their assets.

Vault actions incur fees in the form of native tokens and TTM. The portion of fees incurred in TTM is aimed at bettering the ecosystem and increasing scarcity, meaning that it is instantly burned or absorbed into vault activity reward schemes.

# Token Utility & Use Cases

## Staking

Access to the Tradetomato platform, services, and features is structured in tiers based on the amount of TTM tokens staked. By staking more tokens, users unlock additional features, while always retaining full custody of their assets.

Staking TTM also supports the ecosystem and may generate passive rewards (in TTM). The reward structure depends on the selected lock-up period. A portion of the total token supply is allocated to staking reward pools.

# Token Utility & Use Cases

## Liquidity

A portion of the token supply is allocated to support liquidity provision for TTM trading.

## Token burn

Certain ecosystem features may burn TTM, which removes it from circulation. An example of this is the typical Tradetomato Vault action. Burn policies are programmatic or governed as disclosed and may be updated through governance.

## Important

TTM utility is access and usage. It is not designed to be a financial instrument that promises income.

# Benefits for Token Holders

TTM provides access to the Tradetomato platform, including its services, tools and features, subject to applicable access tiers and conditions.

TTM is not a financial instrument or investment product and does not provide any guarantee of returns.

TTM does not represent ownership, voting rights, or profit participation in Tradetomato B.V., and does not confer any shareholder or governance rights.

TTM tokens subject to vesting become the property of the receiver from the moment that they are claimed from the vesting contract.

# Risk Disclosures – 1

The use of the TTM token involves various risks, including but not limited to the following:

## **Market risk**

The value of TTM may fluctuate significantly due to market conditions, demand, and external factors. There is no guarantee that TTM will at all times be tradable or have a non-zero worth.

## **No profit or return guarantee**

Holding or staking TTM does not grant any rights to profits, dividends, or guaranteed returns. TTM is a utility token only.

## **Platform & development risk**

The availability and functionality of platform features depend on ongoing development, maintenance, and market adoption. Features may be modified, delayed, or discontinued.

# Risk Disclosures – 2

The use of the TTM token involves various risks, including but not limited to the following:

## Smart contract risk

TTM functionality relies on smart contracts, vaults, and on-chain integrations. Despite audits and testing, smart contracts may contain vulnerabilities or fail, which could result in loss of functionality or assets.

## Counterparty & API risk

Certain services depend on third-party providers such as centralized exchanges or external APIs. Changes, outages, or termination of these services may impact strategy execution or platform availability.

## Operational risk

Risks include system outages, security breaches, governance errors, misconfigurations, or failures in internal processes.

# Risk Disclosures -3

The use of the TTM token involves various risks, including but not limited to the following:

## **Liquidity & volatility risk**

TTM may be subject to limited liquidity, price volatility, and slippage, particularly if traded on secondary markets.

## **Regulatory risk**

TTM is intended to qualify as a utility token under MiCA. However, changes in laws, regulations, or regulatory interpretation may affect its classification, availability, or permitted use.

# Issuer Information

**Issuer:** Tradetomato B.V.

**Jurisdiction:** The Netherlands

**Business model:** SaaS platform for crypto trading automation and DeFi integration

# Disclaimer & legal status

This whitepaper is not an offer of securities or financial instruments.

- ✔ TTM is a utility token intended solely for use within the Tradetomato ecosystem.
- ✔ This document is provided for informational purposes only and does not constitute legal, financial, or tax advice.

# Compliance under MiCA

This document is prepared in line with Article 6 of the Markets in Crypto-Assets Regulation (MiCA) regarding utility tokens. Tradetomato affirms that:

- ✔ TTM is not an e-money token or asset-referenced token.
- ✔ No capital guarantees, interest, or rights to profits are offered.
- ✔ The token is essential to access Tradetomato's services and tools.
- ✔ Tradetomato reserves the right to update this whitepaper as regulations evolve or the platform expands.

Imagine an ecosystem where access to high performing algorithms, cutting-edge trading tools, exclusive content, and community rewards is just a token away. That's the power of TTM.
