

ODORIZATION TRAINING TRAILER

HANDS-ON TRAINING. NO LIVE ODORANT REQUIRED.

TRAINING MEDIA

No live gas or odorant

CONFIGURATION

Standard or replicated

SAFETY

E-stops and gas detection

HANDS-ON TRAINING. NO LIVE ODORANT REQUIRED.

The MRR Odorization Training Trailer provides practical equipment training without live natural gas or odorant. MRR can supply a standard configuration or reproduce an operator's equipment lineup so technicians train on familiar systems. Independent stations support startup, shutdown, fault diagnosis, and spill-response exercises.

APPLICATIONS

Operator and technician training, equipment-specific practice, startup and shutdown drills, fault diagnosis, and spill-response exercises.

DESIGNED AROUND THE WORK

■ TRAIN ON FAMILIAR EQUIPMENT

MRR can reproduce the operator's equipment lineup so technicians practise on systems they will maintain.

■ PRACTISE COMPLETE SEQUENCES

Independent stations support startup, shutdown, fault diagnosis, and spill-response exercises.

■ CONTROL THE TRAINING ENVIRONMENT

The sealed, climate-controlled interior includes independent power protection and emergency controls.
