

Unlock the Best TCO for Azure Virtual Desktop

Automate AVD operations with Nerdio. Guarantee your Azure commitments with Archera. Save more - without the underutilization risk.

The Challenge

Azure Virtual Desktop delivers powerful flexibility—but realizing cost savings is harder than it looks. Operational complexity drives up management overhead, resources are over-provisioned by default, and committing to Reserved Instances or Savings Plans means risking underutilization if workloads shift. Most organizations stay conservative, leaving 20–30% of potential savings on the table.

NERDIO MANAGER FOR ENTERPRISE

Optimize AVD Operations

- **Rapid Deployment:** Deploy and manage AVD in hours—not weeks—with guided workflows
- **Intelligent Auto-Scaling:** Patented technology scales resources to real-time user demand, cutting idle compute and storage costs
- **Simplified Image Management:** Create, manage, and update golden images effortlessly—reduce patching overhead
- **Actionable Insights:** Granular performance monitoring and cost reporting for data-driven decisions

ARCHERA

Insure Your Azure Commitments

- **Insured Commitments:** Get commitment-level discounts (up to 45% on VMs) with terms as short as 30 days—backed by a Moneyback Guarantee
- **Free Platform:** Archera’s free platform provides cost visibility, commitment automation, and forecasting across all reservable Azure services
- **Zero Underutilization Risk:** If usage drops, Archera pays for unused commitments.
- **Marketplace Native:** Your Archera subscription transacts via Microsoft Marketplace, counting toward your MACC commitment.

Better together: Operational efficiency meets financial engineering

	Nerdio	Archera	Combined Value
Resource Optimization	Auto-scales AVD resources to match real-time user demand, eliminating waste	Monitors commitment coverage and provides Moneyback Guarantee on underutilization	Right-sized resources paid for at the lowest possible rate
Cost Control	Granular control over compute and storage consumption through automation	Intelligent recommendations and optional automation for commitment coverage	Optimized consumption paired with optimized commercial terms
Strategic Planning	Historical usage and performance insights for capacity planning	Forecasting and scenario modeling for optimal commitment strategies	Holistic AVD TCO—from operational efficiency to financial engineering

Why it matters

Nerdio ensures you only consume what you need. Archera ensures you pay the lowest rate for what you consume—without the risk of long-term lock-in. Together, they deliver a level of AVD cost savings and operational control that neither solution achieves alone.

Ideal For

Organizations running Azure Virtual Desktop today, or planning a migration from other VDI solutions to AVD.
