

LM Integrated Screening System

The LM Integrated Screening System is a compact screening treatment system featuring a screen-equipped LM Crusher, combined with a vertical conveyor that offers screening and dehydration functions. This integrated single-unit system captures, crushes, transports, dehydrates, and discharges screenings.

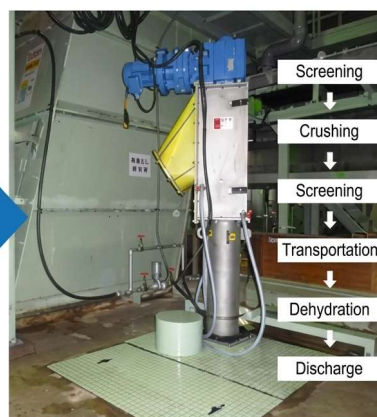

Minimizing screening volumes to allow screenings to be readily packed in bags/containers. and transported, the system is ideal for applications with no need for large-scale equipment or subject to maintenance cost constraints.

Model	Treatment Capacity (m ³ /min)	Motor (kW)	Weight (kg)
SPC-45	4.5	2.2+0.4+1.5	1225
SPC-60	6.0	2.2+0.4+1.5	1285
SPC-75	8.2	2.2+0.4+1.5	1345
SPC-100	13.0	3.7+0.4+1.5	1450
SPC-125	15.0	3.7+0.4+1.5	1550
SPC-150	16.0	3.7+0.4+1.5	1655
SPC-175	19.5	3.7+0.4+1.5	1760
SPC-200	25.5	3.7+0.4+1.5	1860

Ordinary treatment system

System using a crushing/dewatering functioned screen unit with vertical conveyor
