

Zero Consumables Biological Deodorizer

Our biological deodorizer operates with zero consumables and is highly effective against strong odors such as high-concentration hydrogen sulfide in wastewater treatment plant sludge thickening tanks and high-temperature, high-concentration ammonia in compost plants.

Primary Applications

High temperature / high concentration ammonia in vertical composting

Large air volume /high concentration gas in stirring lane

Sulfuric odor from paper mills and sewage treatment plants

Foul-smelling gas from biogas power generation

Unit type

10 - 100m³/ min

Order-made type

100 - 1,000m³/ min
