Carbon Reduction Plan

Organisation name: Clinisupplies Limited

Publication date: 12th August 2026

Commitment to achieving Net Zero

Clinisupplies Limited is committed to achieving Net Zero emissions by 2045.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline year: April 2022 to March 2023	
Additional details relating to the baseline emissions calculations:	
This report has been constructed using the Operational Control Approach with no geographical boundary. The conversion factors used are for location-based reporting. The baseline data has been restated due to the removal of the UK Geographical boundary and improvements in data quality. The figures and information used in calculations have been provided as accurate to the best of our knowledge and are the group figures as it is not possible to separate the individual company activities. The commitment to achieving net zero by 2045 for the group is supported and adopted by Clinisupplies Limited. The carbon reduction measures and plan set out are applied by Clinisupplies Limited as an entity and when performing contracts. As far as practicable we have assumed that figures are representative of our operations. We will undertake a continual process of improving our data quality. In the case that we identify any material changes, we may recalculate the baseline data in the future.	
Baseline year emissions:	**2022-23 (FY 2023)**
Emissions	(tCO2e)
Scope 1	120.8
Scope 2	120.6
Scope 3 (included sources) Transmission and distribution (electricity), Transportation from suppliers, Transportation to customers, Waste generated in operations, Business travel , Employee commuting	2657.7
Total emissions	2899.1

Current Emissions Reporting

Reporting year: 2025	2025-26	2022-23 (baseline)
Emissions	(tCO2e)	(tCO2e)
Scope 1	253.7	120.8
Scope 2	95.2	120.6
Scope 3 (included sources) Transmission and distribution (electricity), Transportation from suppliers, Transportation to customers, Waste generated in operations, Business travel , Employee commuting	1639.9	2657.7
Total emissions	1988.8	2899.1
Per £m revenue	26.6	56.1
Per employee (FTE)	7.4	14.8

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets, revised based on the re-stated baseline year.

We project that carbon emissions will decrease to 1733 tCO2e by 2030. This is a reduction of 40% from our baseline year.

Carbon Reduction projects

Clinisupplies aims to develop the following initiatives that will support the company's strategies to meet Science Based Targets:

Completed:

- Given dedicated responsibility for sustainability to a Senior Manager
- Automated elements of scope 3 data collection and reporting
- Fleet transitioned to hybrid and electric vehicles. Current fleet includes 98.5% hybrid or fully electric vehicles.
- Full in depth packaging material review.
- Refrigerant gas system replacement with new lower risk alternative
- Reduced our distribution footprint by consolidating four older sites into two newer, more sustainable logistics centres.
- ESG data dashboard now updated and reviewed quarterly by sustainability team

These measures have contributed to a 31% reduction in emissions against the 2022-23 baseline, a reduction of 910 tCO2e.

Future:

Area of Focus	Initiative	Status
Employee commuting	Develop HR systems to link commuting data with attendance.	In progress
Business travel	Continue the transition of company owned fleet to lowest practicable carbon emissions option viable at the time of renewal.	In progress
Energy	Investigate and where practicable install additional solar panels to increase self-generated renewable energy in our Stoke distribution Centre.	In progress
Upstream transportation and distribution	Engage with manufacturers to provide data; capture by accounts on invoicing or develop other effective capture mechanism. The timetable for this will be defined based on manufacturer feedback.	In progress
Engagement of Team	We have started a programme to engage the entire team throughout the organisation in the Net Zero transition plan and to encourage staff to support lower carbon ideas, opportunities, and activities.	In progress
Product carbon footprints (PCF)	Develop strategy to create PCF's for product portfolio and add all material scope 3 emissions categories to our footprint and reduction plan	Future
Supply Chain Review	To carry out a full review of the supply chain, develop a full plan in, followed by the introduction of a sustainable supply chain policy.	Future

Declaration and sign off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard13 and uses the appropriate government emission conversion factors for greenhouse gas company reporting.14

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements (where required), and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors.

Approved by Clinisupplies Limited **Executive Leadership Team** in the presence of:)
