Leg Bag Straps

Leg Bag Straps are stretchable soft cotton straps designed to secure a leg bag comfortably.

Leg Bag Straps come with a hook and loop fastening system. Silicone lines on the reverse side of the straps help to secure the drainage bag to the leg.

How to secure

- The leg bag should be positioned on the calf or thigh depending on the tube length
- Feed the leg bag straps through the eyelets of the bag (see below) ensuring the silicone line are facing the leg
- Secure the straps so they are comfortable. The straps can be adjusted at any time

LATEX Reusable Washable

Pack of 10 (5 pairs)

Reference	Description	Size	PIP code
10622C	**Libra**® for use on the calf	70cm: 30cm	342-9503
