Aquaflush®

Simple & Flexible

Aquaflush® Sterile Stoma Stopper

The innovative solution for maintaining stoma sites

Aquaflush®
Stoma Stopper.

Aquaflush® Sterile Stoma Stopper has a unique patented sign which seals and maintains stoma sites in various locations on the body. A key feature of our **Stoma Stopper**, is that it can be cut to length to suit the individual patient, ensuring the best comfort and fit every time. Made from implant grade silicone and with an ultra low-profile cap, it is virtually invisible under thin clothing.

Stoma Stoppers often are used for ACE and Mitrofonoff patients to maintain the stoma site between irrigations. They can also be used for stomas of a suitable size, elsewhere on the body.

KEY FEATURES

- Unique patented design
- Adjustable length from 10 – 100mm
- Unique low profile cap sits flush to the skin
- Easy to remove with peel-up tab
- 4 gauge sizes (8fr, 10fr, 12fr and14fr)
- Each stopper is packed with a dressing – extra dressings are also available on prescription
- Monthly kits which include a stopper and 30 additional dressings are also available on prescription
- As our **Stoma Stopper** is adjustable, suppliers are only required to stock 4 adjustable sizes, instead of the usual 12, from alternative manufacturers

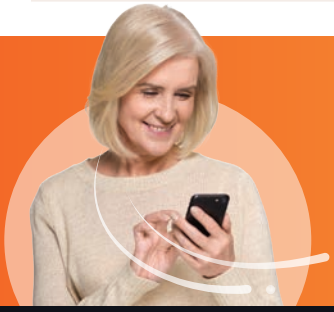

Ordering information.

Stoma Stoppers are available in 4 adjustable sizes. A monthly pack is also available which includes a **Stoma Stopper** and a pack of 30 dressings.
