

ALUMINIUM GARDEN SYSTEMS

ABOUT US

Alufem Aluminium operates in the Kayseri Organized Industrial Zone, providing customer oriented, fast, and innovative services within a 50.000 m² enclosed production facility.

Alufem Aluminium has aluminium extrusion press lines, polishing surface treatment machines, anodizing facilities, electrostatic powder coating, wood effect lamination systems, CNC mechanical processing centers, assembly lines, and expert teams.

Our company has an annual production capacity of over 27.000 tons of aluminium profiles with extrusion press lines of 1.100 US Tons (5"), 2.000 US Tons (7"), and 4.000 US Tons (10"). We manufacture profiles in various alloys through T0, T4, T5, and T6 heat treatment processes.

In our anodizing facility, matte, bright, and satin finishes can be applied up to 7.5 meters in length with an annual capacity of 4.000 m².

Coloring demands ranging from light bronze to black are met using Tin Sulphate and Nickel Sulphate baths.

VERTICAL SLIDING GLASS SYSTEM

VERTICAL GLASS SLIDING SYSTEM

Vertical Sliding Glass Systems offer both ease of use and a sleek appearance thanks to their vertical motion design.

Available in motorized options, they adapt to a variety of spaces like cafes, restaurants, terraces, and balconies. They protect against weather conditions and make outdoor areas usable year round.

DESCRIPTION

In Vertical Glass Sliding Systems, glass panels move vertically. The bottom panel is fixed while the upper ones move up and down, ensuring airflow. In motorized models, remote control operation provides convenience and comfort. It's a top tier solution both functionally and aesthetically.

TEMPERED GLASS

Tempered glass panels are resistant to heat and impact, ensuring enhanced safety and long term durability.

CORROSION RESISTANCE

Powder coated aluminium profiles offer excellent protection against rust and harsh weather conditions.

STRONG FRAMING

Thick walled aluminium profiles ensure high structural integrity and a long lasting framing solution.

SLIDING GLASS SYSTEM

SLIDING GLASS SYSTEM

Aluminium sliding glass doors offer an excellent solution for those looking to enhance their outdoor experience.

Resilient against wind and rain, these doors ensure ample light indoors while bringing in stunning garden views.

These doors aren't just for winter gardens but are also ideal for protecting spaces like cabins or balconies.

DESCRIPTION

They stand out not only for their aesthetic appeal but also for their functionality, allowing you to harmoniously blend indoor spaces with the outside world, enabling you to be in tune with nature year-round.

Sliding Glass System consists of glass wings that move in a sliding manner in the horizontal direction. According to the system length, can be delivered in 3, 4, 5 and 6 rails. 10 mm tempered glass is applied in the system.

ZIP SCREEN

ZIP SCREEN SYSTEM

Zip screen systems are a modern shading solution designed to enhance outdoor comfort.

They stand out with their resistance to wind, sunlight, and rain. Available in both manual and motorized versions, they are ideal for use in pergolas, winter gardens, terraces, and balconies.

Aluminium Zip Screens are distinguished by their durable material for daily use and an easy to use zipper mechanism. They regulate room temperature for a comfortable environment, enhance interior decor with modern design and color options.

The sturdy and secure structure provides sound insulation against external noise. The non-dusting aluminium structure ensures easy maintenance. These screens offer a stylish, practical, and reliable window covering option.

DESCRIPTION

When installed inside pergolas or winter garden systems, zip screens are not compatible with vertical or sliding glass panels. For all systems to operate seamlessly such as zip screens, sliding and vertical glass panels the zip screen must be installed externally.

WINTER GARDEN

WINTER GARDEN

Winter Garden Systems create an aesthetic and comfortable space that will provide for people to stay in touch with nature in different weather conditions.

Its durable aluminium construction and different material options (such as glass and polycarbonate) allow it to enjoy the garden every season.

It has flexible design features that can adapt to any garage, garden, cafe, restaurant, home and office space.

An aluminium winter garden is also sometimes called an aluminium canopy. This extension to your house is an aluminium roof with uprights and extends your living space. This way you can enjoy your garden all year round.

DESCRIPTION

Our winter gardens can be completely customized with all kinds of options, accessories and extensions. Think of side walls made of glass, polycarbonate aluminium or different sizes.

WINTER GARDEN CARPORT

Alufem Aluminium's winter garden carports not only protect your vehicles from external elements but also offer an elegant solution. The durability of aluminium ensures a long-lasting structure while its lightweight nature provides flexible design options.

These carports shield your vehicle from the damaging effects of the sun, rain, and even heavy snow, while adding visual aesthetics to your home. Their functionality combined with their stylish appeal makes Alufem Aluminium Winter Garden Carports an important choice for those seeking both aspects.

If you desire your vehicles to be secure and protected from adverse external factors, considering these durable and aesthetically pleasing carports could be beneficial.

WINTER GARDEN ZIP SCREENS

Zip screens offer durable and aesthetic solutions that enhance comfort in winter gardens and outdoor living spaces.

Manufactured from lightweight, corrosion-resistant aluminum, they ensure long-lasting performance while supporting energy efficiency.

Suitable for both interior and exterior applications, zip screens effectively control sunlight, reduce wind impact, and enhance privacy throughout the year.

DESCRIPTION

With their sleek design and optional motorized operation, zip screens combine modern aesthetics with functional performance, creating a more comfortable and controlled environment. They provide a versatile shading solution adaptable to various architectural structures and usage needs.

- » Precisely filter sunlight in winter gardens
- » Reduce wind impact for a more stable indoor environment
- » Enhance privacy against external visual factors
- » Support energy efficiency through improved thermal control
- » Adapt to different architectural requirements with interior or exterior installation options
- » Available in manual or motorized operation alternatives

FENCE

GARDEN FENCE

Aluminium garden fences offer numerous advantages for outdoorspaces. Designed for both functionality and aesthetics, aluminium fences enhance the usability of gardens and surrounding areas while adding a refined visual appeal.

Highly durable and resistant to outdoor conditions, aluminium fences provide reliable protection for residential gardens of all sizes. They contribute to outdoor security while maintaining an elegant and modern appearance.

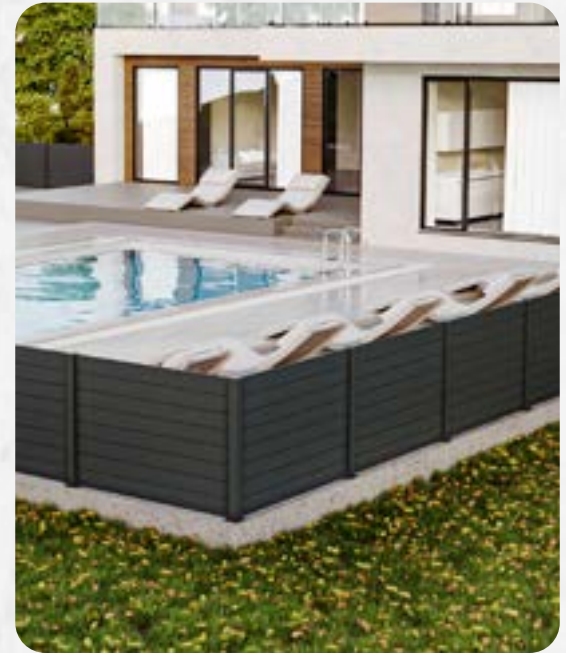

In addition to defining boundaries, aluminium fences help protect garden areas and cultivated spaces such as fruits and vegetables, combining safety with aesthetic value.

DESCRIPTION

An aluminum fence is a durable and stylish solution for defining outdoor spaces without obstructing the view. Suitable for gardens, pools, residential areas, and public properties, aluminum fences adapt seamlessly to different terrains and architectural styles.

- » Horizontal slat designs add visual depth and modern character to outdoor spaces.
- » Lightweight structure allows for easier and faster installation compared to wooden fences.
- » Optional enclosed panel designs provide enhanced privacy when needed.

With modular system options and a wide range of color choices, aluminum fences can be customized to match both functional requirements and aesthetic preferences.

SQUARE POST SPACED RECTANGLE LAMEL

Our aluminium fence systems feature advanced design options that elevate both performance and appearance. Combining modern lines with a warm architectural feel, these fences offer a balanced and contemporary solution for outdoor environments.

- » Horizontal panel configurations create a sense of depth and spatial continuity.
- » Lightweight aluminium construction ensures easy installation and long-term durability.
- » Closed panel alternatives maximize privacy while maintaining a clean visual design.
