

Educating the Next Generation of *Global Problem Solvers*

An interdisciplinary, competency-based education rooted in global context

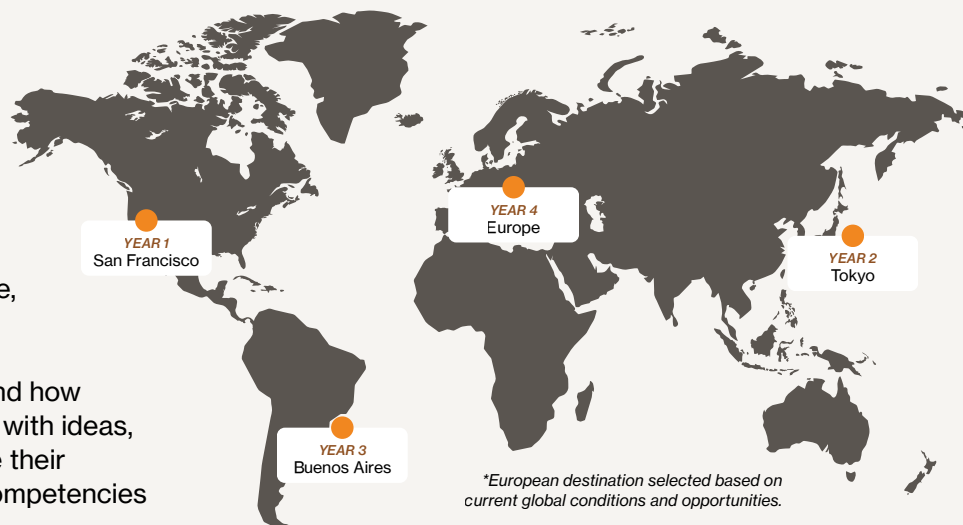

Learn.
Belong.
Lead.

Four Years. Four Cities. *One Global Education.*

By living and learning across different cultures and communities, students develop the skills, judgment, and global perspective to lead, solve complex problems, and build a safer, more sustainable, and more just future.

Minerva's academic model is designed around how people learn best. Students actively engage with ideas, apply them in real-world contexts, and refine their thinking over time, building the habits and competencies needed to thrive in their careers and lives.

How We Prepare *Future Leaders*

Interdisciplinary Learning

Competency-Based Learning

Global Context

Real-World Application

Purpose-Built Technology

Intentional Community

~20

students in each live, discussion-based seminar

100+

nations represented in the Minerva community

97%

of alumni held an internship before graduation

#1

Most Innovative University in the World by WURI*

Beyond the Prompt

The future belongs to those who think beyond the prompt. When everyone has access to the same tools, judgment becomes the advantage. Minerva teaches:

- Critical thinking
- Creative problem solving
- Ethical reasoning
- Communication
- Adaptability
- Systems thinking

Outcomes That Matter

Graduate study. Global scholarships. Meaningful careers.

91% of graduates are employed full-time or pursuing an advanced degree

Alumni pursue master's and doctoral degrees at leading institutions including: Princeton • Cambridge • Oxford • Harvard • Stanford • Columbia

And launch careers at leading organizations like: Google • BCG • World Bank • United Nations • Microsoft • McKinsey • Goldman Sachs

Rhodes Scholar Brittany, Class of 2024, is bringing Indigenous perspectives to graduate study at the University of Oxford.
