

ENDURION

The Mission is
the only Metric.

How We Operate

Mission First Support	Defense and intelligence work guided by mission priorities and operational need.
Decision-Focused Technology	Tech-enabled capabilities supporting complex decision-making.
Operational Expertise	Elite talent paired with disciplined planning and execution.

UNIFIED INTELLIGENCE PLATFORM

Technology for mission success

PATHFINDER

Pathfinder is a unified intelligence platform designed for speed, clarity, and action in evolving mission environments. It transforms disparate data from sensors, GIS, and OSINT into real-time, decision-ready outcomes through a modular, AI-native architecture.

- [1] Multi-Source Ingestion

Continuous streaming and integration of sensor, GIS, and open-source data.
- [2] Advanced Analytics

Automated PoL, anomaly detection, link analysis, and co-traveler digital embeddings.
- [3] Edge Collection

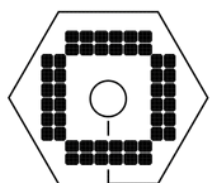

Direct signal and RF collection for high-fidelity data in contested areas.
- [4] Operational Oversight

Common Operational Picture dashboards with geofencing and automated reporting.

Industry Partnership We maintain strategic industry partnerships that strengthen our platforms by combining mission expertise with proven commercial technologies and data.		

Expertise. Systems. Advancement. Across every domain, for as long as it takes.

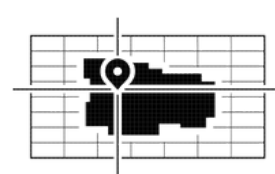

Advanced Data Analytics

- Data fusion, enrichment, and visualization
- Artificial intelligence & machine learning integration
- Publicly and commercially available information (PAI/CAI) analytics
- Decision-support analytics for operational and strategic missions

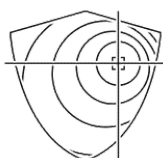

Global Intelligence Support

- HUMINT, IMINT, GEOINT, SIGINT, OSINT, and all-source intelligence
- Counterintelligence support and intelligence training
- Identity intelligence (I2) and pattern-of-life analysis
- Sociocultural intelligence and operational environment analysis

Geospatial Solutions

- GIS systems engineering and data management
- ArcGIS-based platform development and sustainment
- Real-time mapping and situational awareness tools
- Custom dashboards supporting time-sensitive decision-making

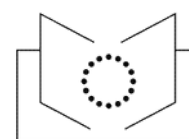

Operational Mission Support and Exploitation

- Mission planning and intelligence preparation
- Technical and sensitive exploitation (DOCEX, CELLEX, MEDEX, TECHEX)
- Physical security and counter-IED support
- Advisory services in austere and deployed environments

IT and Cloud Services

- Enterprise IT and C5I systems integration
- Cloud engineering, migration, hosting, and O&M
- Infrastructure, network, and service desk support
- Cybersecurity, risk management, and Authority to Operate (ATO)

Education, Training, & Performance

- Mission-focused education, training, and program support
- Intelligence, OSINT, GEOINT, and all-source training
- Electronic warfare (EW) and C-IED instruction
- End-user platform and systems training

ENDURION

Current Work

SOF Core Services Support (SCSS)

Enterprise mission and program support for USSOCOM components.

Joint Special Operations University (JSOU)

Academic and operational support for SOF professional education.

Maritime SOF Support (MSOFS)

Logistics and mission support for Naval Special Warfare.

SOF Exploitation (SOFEX)

Cloud-based exploitation supporting global SOF operations.

Document & Media Exploitation (DOMEX)

Sensitive media exploitation and analysis for deployed missions.

AFSOC A6 C5I Enterprise Service Support

End-to-end C5I, IT service management, and network operations supporting global missions.

DCGS-MC Test & Evaluation

Lifecycle support ensuring interoperability and cyber compliance for ISR systems.

Enhanced Domain Awareness (EDA)

Unclassified collaboration and situational awareness for multinational operations.

DCSA Application Development

Application development and data analytics for adjudication workflows.

HT-JCOE DATC Training - Tracking System

Advanced HUMINT training modernization powered by Endurion's Pathfinder Software.

Business Development POC

Primary NAICS Codes
