

ENCLOSE™

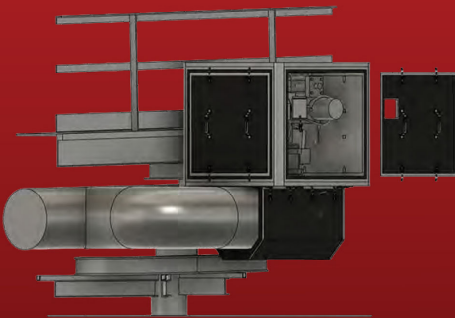

HIGH QUALITY COMPONENTS

CUTTING EDGE 3D SCANNING TECHNOLOGY

COMPONENT WEIGHTS LIMITED TO ALLOW EASE OF INSTALL

SIZE FIT FINISH AND ORIENTATION ARE FULLY CUSTOMIZABLE TO THE CLIENTS NEEDS

INSTALLS THE FIRST TIME & EVERY TIME IN MINUTES

OVERVIEW

The ENCLOSE™ series of insulated enclosures revolutionizes equipment insulation by providing durable, removable, and reusable enclosures that can be tailored to fit even the most challenging shapes and spaces.

CHARACTERISTICS

Typical configurations range from 1 ft3 up to 100ft3 – fully self supporting, modular & operator friendly design makes the ENCLOSE™ equipment enclosures the right choice for complex enclosure scenarios.

CUSTOM ENGINEERING

The ENCLOSE™ system is fully customizable to our clients' needs and requests and based off of 3D data acquisition. These units install the first time & every time in minutes & offer unparalleled equipment access while leaving the system in place.

KEY ADVANTAGES

1. Superior insulation value & access through thoughtful design
2. Data acquisition provides the ability to meet the most challenging customer & environmental requirements
3. Fully prefabricated – Easy to install – reducing manpower requirements
4. Digitally designed / Catalogued / Blueprinted components allows for component replacement rather than complete replacement.
5. Cloud based user / installation manuals eliminate the need for tools & skilled hands
6. 3D Modelling / proofing provided prior to Contractor installation
