

We're Hiring

Project Manager

Bitventure is a high-growth fintech powering digital transformation across Africa.

We're looking for a highly skilled, delivery-driven Project Manager to lead and coordinate internal and client-facing technology projects across Bitventure's verification and payment solutions. If you thrive in a fast-paced environment, excel at managing multiple concurrent projects, and deliver with precision, this is the role for you.

What You'll Drive

- Lead end-to-end management of multiple simultaneous technology projects.
- Develop project scopes, schedules, budgets, milestones, and delivery plans.
- Coordinate cross-functional teams across Product, Development, BA/DA, QA, Operations, and Client Success.
- Ensure all deliverables meet scope, quality, compliance, and regulatory requirements.
- Facilitate requirement-gathering, project kick-offs, UAT coordination, and implementation planning.
- Maintain accurate project documentation (plans, minutes, specifications, status updates).
- Provide weekly progress reports to leadership and stakeholders.
- Identify and manage risks, issues, dependencies, and change requests.
- Translate technical requirements into actionable deliverables for engineering teams.

What We're Looking For

- Bachelor's degree or diploma in IT, Computer Science, Business Administration, or related fields.
- Project Management certifications advantageous (PMP, CAPM, PRINCE2, Agile).
- 5+ years' experience managing technology, payment, or fintech projects.
- Strong experience using Jira and Confluence (essential).
- Proven ability to deliver multiple projects concurrently in a high-pressure environment.
- Ability to translate technical concepts for clients and cross-functional stakeholders.
- Solid understanding of SDLC, integrations, APIs, and payment/verification systems (advantageous).
- Experience working with BAs, Product Managers, Developers, QA, and Support Engineering.
- Strong competency in documentation, planning, budgeting, and reporting.

This is a critical role in enabling secure, reliable, and scalable digital platforms.
