

We're Hiring

DevOps Engineer

Bitventure is a leading provider of verification, authentication, and data-driven solutions across South Africa. Our technology empowers businesses to onboard customers securely, prevent fraud, and scale confidently.

We are seeking a **DevOps Engineer** to bridge the gap between development and operations by building secure, automated, and scalable deployment environments. This role will focus on optimising the software development lifecycle through CI/CD, infrastructure automation, and continuous improvement while ensuring reliable software delivery.

What You'll Drive

- Design, implement, and manage CI/CD pipelines for efficient software delivery.
- Automate infrastructure provisioning, configuration, and deployment processes.
- Improve system reliability, scalability, and operational efficiency.
- Identify and implement process improvements across development and operations.
- Monitor application performance and optimise deployment workflows.
- Strengthen system security, compliance, and risk management practices.
- Collaborate with development teams to streamline the Software Development Lifecycle (SDLC).
- Support continuous innovation through automation and modern DevOps practices.
- Build and optimise automated CI/CD pipelines to accelerate software delivery.

What We're Looking For

- 3–5 years' experience in DevOps or software development.
- Experience designing and managing CI/CD pipelines.
- Knowledge of the Software Development Lifecycle (SDLC).
- Experience with Azure or AWS cloud environments.
- Proficiency with DevOps tools such as Bitbucket, Jenkins, Azure DevOps, or GitLab.
- Experience with Kubernetes and container orchestration.
- Understanding of cloud computing, APIs, microservices, and security best practices.
- Strong analytical, troubleshooting, and problem-solving skills.
- Relevant qualification in Computer Science, Software Engineering, or a related field.
- Azure or AWS certifications will be advantageous.
