

We're Hiring

Mobile App Developer

Bitventure is a leading provider of verification, authentication, and data-driven solutions across South Africa. Our technology empowers businesses to onboard customers securely, prevent fraud, and scale confidently.

We are looking for a **Mobile App Developer** to design, build and ship Dula, a cross-platform (iOS & Android) app that lets students search, view and apply to Dula-accredited residences.

What You'll Drive

- Build Dula's cross-platform mobile app (iOS & Android) in React Native or Flutter
- Translate Dula's web flows and UI prototypes into clean, native-feeling mobile screens
- Deliver the core student journey: residence search, filtering, details and photos
- Build application submission, document upload and application/payment tracking
- Add notifications for deadline reminders and application outcome updates
- Integrate with Dula's backend/APIs, or help define them where they don't exist yet
- Build or consume REST/JSON APIs, light web admin tooling and hybrid web views
- Own app store readiness: builds, releases, crash monitoring and usage analytics
- Work with the Product Owner/BA to turn user stories into a working technical build
- Keep mobile and web flows consistent

What We're Looking For

- 5+ years of mobile app development
- At least one cross-platform app shipped to the App Store and/or Google Play (certificates, provisioning, store listings)
- Strong React Native (preferred) or Flutter skills, plus JavaScript/TypeScript or Dart
- Solid HTML, CSS, JavaScript and REST API integration skills
- Mobile architecture: state management, offline storage, push notifications and secure document/photo uploads
- Comfortable working independently and owning technical decisions
- Strong communicator, able to work directly with a non-technical Product Owner/BA
- SA payment gateway and POPIA-compliant document handling experience preferred
- Node.js or Python backend experience a plus
- Good UI/UX instincts for improving flows
