

# INTANGIBLE ECOSYSTEM PROFILE

## OVERVIEW

Project Troy is a technology consultancy specialising in custom software development, artificial intelligence implementation, digital transformation, and technical audits. The organisation partners with companies to design and build scalable digital systems that enable innovation and operational efficiency.

## STRATEGIC CONTRIBUTION

Project Troy focuses on developing the technological backbone required for modern organisations and ecosystems. By combining advanced digital infrastructure with strategic technology design, the organisation enables partners to adopt emerging technologies and build scalable platforms that support future-ready organisational environments.

## LEADERSHIP

Managing Partner:  
Kent Klein

## CORE FOCUS
