

Portable Mid Rise Scissor

COMPACT WORKING. MAXIMUM EFFICIENCY.

OVERVIEW

The 3.5T Portable Mid-Rise Scissor Lift is a versatile lifting solution designed for workshops, tyre centres, detailing studios and home garages. Combining a compact footprint with an impressive 3,500kg lifting capacity, it provides safe and convenient access to vehicles without the need for a permanent installation.

Its portable design allows the lift to be easily repositioned within your workspace, while the electro-hydraulic lifting system delivers smooth, reliable performance. Whether you're performing tyre changes, brake servicing, detailing or general maintenance, this mid-rise scissor lift offers professional-grade capability in a space-saving package.

Product Features

Designed to safely lift vehicles weighing up to 3,500kg, making it suitable for passenger vehicles, SUVs, light commercial vehicles and performance cars. Its robust construction provides confidence for daily workshop use.

Unlike fixed workshop hoists, the portable design allows the lift to be moved and stored when required. This provides greater workshop flexibility while maximising valuable floor space.

With a lifting range from 110mm to 1,200mm, the lift positions vehicles at a comfortable working height for servicing brakes, suspension, tyres, detailing and general repairs without unnecessary strain.

Powered by a reliable 2.2kW electro-hydraulic system, the lift delivers smooth, controlled lifting and lowering with easy-to-use pendant controls for precise operation.

The low-profile design allows vehicles to drive directly onto the platforms while maintaining excellent underbody access. Perfect for workshops with limited ceiling height or where full-rise lifts are not practical.

Built from heavy-duty steel and equipped with integrated safety locks, the LL-MRSC3.5 is designed to provide reliable lifting performance, outstanding stability and long-term durability in both professional and home workshop environments..

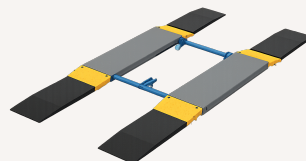

SPECIFICATIONS

Model	LL-MRSC3.5
Number of Cars	1
Weight Capacity	3500kg
Min Lifting Height	110mm
Max Lifting Height	1200mm
Platform Length	1550mm
Platform Width (ea)	530mm
Overall Length x Width	2170mm x 1910mm
Motor	2.2kw
Operation Mode	Electro-hydraulic
Lowering Mechanism	Foot Press

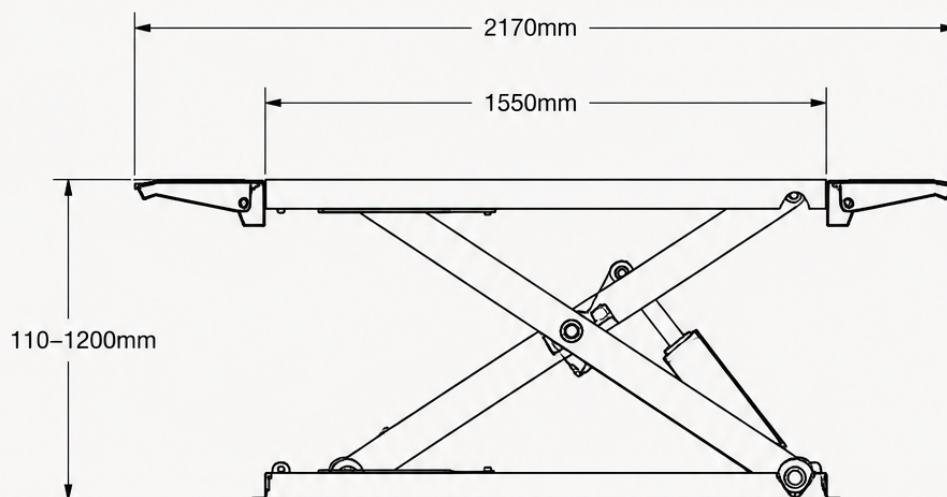

AVAILABLE ACCESSORIES

Rubber Drive on ramps

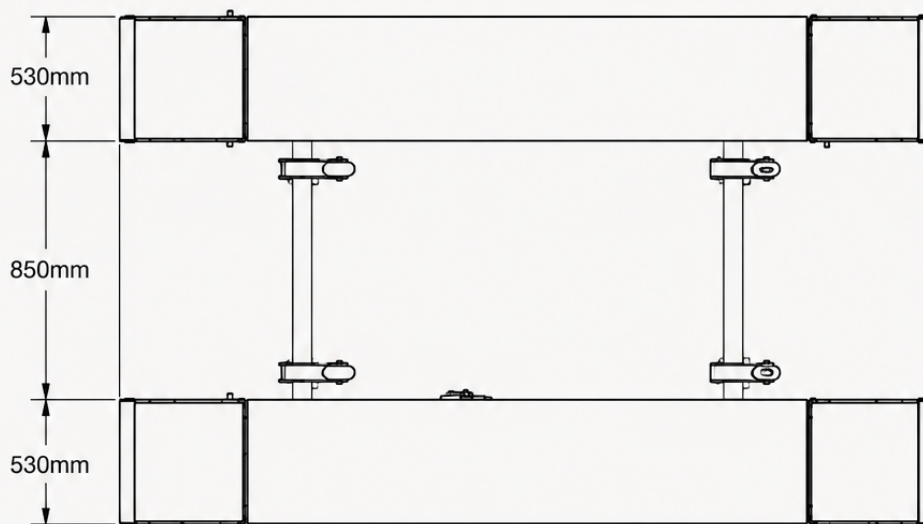

SUV Kit (2PCS per set)
