DELIVERY

Day 1 hands-on

01 THE SQUAD

# Built around your delivery, *not the other way round.*

A SATIGO Digital Squad is a fully formed, multi-disciplinary delivery team — engineers, analysts, designers, leads — pre-aligned to your outcomes and governed end-to-end. Whether you need one specialist or a complete squad, we shape it around your context, your stack and your stakeholders.

<h2>5+</h2> <p>Core delivery disciplines, fully governed</p>	<h2>UK·wide</h2> <p>Reach across South East, Midlands, North &amp; Devolved Nations</p>
<h2>100%</h2> <p>Outcome-based engagement model</p>	<h2>Day 1</h2> <p>Hands-on contribution from onboarding</p>

— WHAT IS A DIGITAL SQUAD?

A *governed, outcome-led* team that integrates with yours — sized to the work, accountable to the result.

02 WHAT MAKES A SQUAD

# Three pillars. *One team mindset.*

Every squad is built on the same foundation — practical, targeted and integrated from day one.

## Hands-on practitioners

01

Practically minded advisors and builders — not slide-makers. Shipping working features inside your delivery cadence, embedded in your stand-ups and your stack.

## Targeted skill-gap solving

02

Filling the exact capability your roadmap is missing — sized to the problem, scaled to the moment. No oversized teams, no wasted retainer.

## Rapid, seamless integration

03

Embedded into your stand-ups, your stack and your governance. A natural extension of your team — not an outside vendor parachuted in.

### GOVERNANCE BAKED IN

We focus on *role-fit and culture-fit*, with structured onboarding, ongoing oversight and outcome-based measurement. Every squad is composed from the same governed bench — so security clearance and delivery standards are sorted before mobilisation.

03 FIVE CORE DISCIPLINES

# A vast skills matrix, *built on five core disciplines.*

Centred around the delivery roles that drive practical digital execution. Percentages reflect bench composition.

## Software development

23%

Design and support software solutions primarily within the Microsoft ecosystem — full-stack development through to cloud platforms and integration.

## Business analysts

14%

End-to-end requirements gathering, stakeholder engagement, and solution design that bridges business needs with technical delivery.

## Technical service delivery

14%

Multidisciplinary delivery of end-to-end IT and digital transformation services — platform engineering, cloud and application deployment, and technical leadership.

## Project management

11%

Coordinating projects and resources across ERP, cloud migration, AI and innovation initiatives — ensuring delivery runs smoothly and predictably.

## Data analytics & AI

9%

Data and AI specialists who build intelligent solutions and advise on how to use data and AI effectively, and responsibly, to support decision-making.

### WHY THE MATRIX MATTERS

Every squad is composed from the same governed bench — so role-fit, security clearance, and delivery standards are baked in before mobilisation.

04 GROWING EXPERTISE

# Beyond the core — *growing expertise.*

Squads scale with supporting expertise drawn from the same governed bench, alongside a proven technology stack across cloud, data and platform engineering.

## DISCIPLINE EXPANSION

### Supporting capabilities

- QA & Testing
- DevOps
- Cyber Security & Assurance
- UX & Content Design
- Change Management
- Cloud Engineering

## ENGAGEMENT MODES

### How we deploy

- Individual specialists (1:1 plug-in)
- Mini-squads (2-4 person, focused)
- Full delivery squads (multidisciplinary)
- Embedded leadership (fractional CTO / Lead)
- Surge capacity (short-term acceleration)
- Programme-level scaling

## — TECHNOLOGY STACK ACROSS THE BENCH

- Azure
- AWS
- SharePoint
- Docker
- Python
- Tableau
- Selenium
- Kubernetes
- Cucumber
- Power BI
- Terraform
- Ansible
- Salesforce
- C#
- Atlassian
- .NET Core
- React
- Node.js

05 THE DELIVERY RHYTHM

# Four stages. *One outcome.*

A simple, governed delivery rhythm — from problem definition through to embedded value, at squad pace.

01

## Understand & Shape

Together we define your project scope, identify risks and shape the squad that can deliver the outcome.

- Define scope
- Identify risks
- Establish success metrics
- Agree SoW

02

## Mobilise Squads

Rigorous compliance and onboarding, with stakeholders integrated from day one.

- Targeted matching
- Onboard quickly
- Integrate stakeholders
- Establish governance

03

## Deliver & Optimise

Working features shipped in short, collaborative cycles. Performance optimised, capability scaled.

- Iterative cycles
- Performance tracking
- Continuous improvement
- Scaling capability

04

## Evaluate & Embed Value

Tangible milestone delivery, reduced risk and long-term value embedded into your organisation.

- Milestone validation
- Outcome reporting
- Knowledge transfer
- Long-term value

06 WHEN & WHERE

# When a squad is the *right answer*.

Three signals tell us a squad will move your delivery forward — and we can deploy across the UK to support it.

## A Acceleration

A project that needs to be delivered at pace — without sacrificing quality, governance or your existing team's focus.

Rapid delivery

## B Critical capability gaps

Specific expertise your team is missing — filled with role-fit specialists who plug straight into your delivery.

Skills matrix

## C Short & medium-term programmes

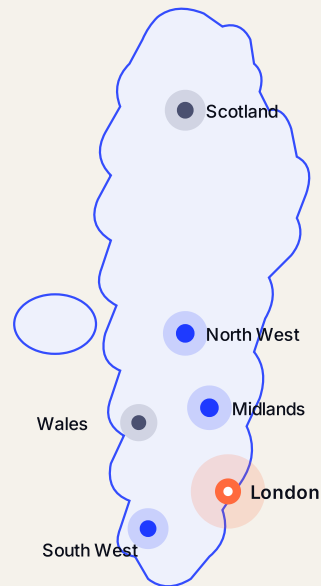

High-need expert support sized to the work, with a clear path to outcomes and a defined exit.

Flexible engagement

### — GEOGRAPHIC REACH

## UK-wide, locally deployable.

Strong presence across London & the South East, broad coverage in the Midlands, North West and South West, with extended reach into Scotland and Wales.

● London & South East STRONG

● Midlands · NW · SW BROAD

● Scotland & Wales EXTENDED

07 THE RESULT

# Tangible outcomes. *Reduced risk.* Long-term value.

Measured against tangible delivery milestones, not hours and headcount.

## Day 01

Hands-on contribution from a squad that integrates seamlessly with your team.

## End-to-end

Governance from scoping through to milestone validation and value embed.

## Outcome-led

Measured against tangible delivery milestones, not just hours and headcount.

— COMMERCIAL ONBOARDING

## Plug in the team. *Ship the outcome.*

Tell us the gap, the project or the deadline. We'll shape the squad — governed, managed, and ready to deliver — typically inside two weeks of scoping.

— STEP 01

### Discovery call

30 min: requirements, context, success metrics.

— STEP 02

### Squad shaping

Targeted matching from our governed bench. SoW agreed.

— STEP 03

### Mobilisation

Compliance, onboarding, day-one delivery.
