

01 DIGITAL SQUADS · INTEGRATED DELIVERY TEAMS

Squads. *Mobilised.* Delivered.

Outcome-driven digital teams, ready to deploy. Plug in one specialist, or a fully governed squad — built around your delivery, accountable to your outcomes, and integrated from day one.

<p>Full · stack</p> <p>Multi-disciplinary capability across the delivery lifecycle.</p>	<p>UK · wide</p> <p>Geographic reach locally deployable across regions.</p>	<p>100 %</p> <p>Outcome-based measured against delivery milestones.</p>	<p>Day 1</p> <p>Hands-on contribution integrated from the start.</p>

01 THE SQUAD

Built around your delivery, *not the other way round.*

A SATIGO Digital Squad is a fully formed, multi-disciplinary delivery team — engineers, analysts, designers, leads — pre-aligned to your outcomes and governed end-to-end. Whether you need one specialist or a complete squad, we shape it around your context, your stack and your stakeholders. We focus on **role-fit and culture-fit**, ensuring every member contributes from day one as a natural extension of your team.

WHAT IS A DIGITAL SQUAD?

A *governed, outcome-led* team that integrates with yours — sized to the work, accountable to the result.

<p>01</p> <p>Governed</p> <p>Defined SoW, structured onboarding, ongoing oversight.</p>	<p>02</p> <p>Managed</p> <p>Delivery cadence, performance tracking, embedded leadership.</p>	<p>03</p> <p>Outcome-driven</p> <p>Measured against tangible milestones, not timesheets.</p>
---	--	--

02 CAPABILITY MAP

A multi-disciplinary capability, *spanning the full digital delivery lifecycle.*

Squads composed from a deep, governed bench — covering every discipline you need across **discovery, design, build, run and assurance.**

— STAGE 01

Discover

Strategy, scoping, business analysis

— STAGE 02

Design

Solution & service design, UX, architecture

— STAGE 03

Build

Engineering, cloud, data, integration

— STAGE 04

Run

Service delivery, DevOps, platform ops

— STAGE 05

Assure

QA, security, governance, change

Software Engineering CORE

Full-stack engineering across the Microsoft ecosystem and beyond — cloud platforms, integration, modern architectures.

.NET Java React Node.js

Cloud & Platform CORE

Platform engineering, cloud-native architectures, infrastructure-as-code and end-to-end deployment.

Azure AWS Kubernetes Terraform

Data, Analytics & AI CORE

Data engineering, insight, modelling and responsible AI advisory — turning data into decisions.

Power BI Tableau Databricks GenAI

Business Analysis CORE

End-to-end requirements, stakeholder engagement and solution design — bridging business and technical delivery.

Discovery Process design SoW shaping

Programme & Project Mgmt CORE

Coordinating ERP, cloud migration, AI and innovation programmes — keeping complex delivery on track.

Agile PRINCE2 PMO

Technical Service Delivery CORE

Multi-disciplinary delivery teams covering platform engineering, application deployment and technical leadership.

SRE ITIL Service design

DevOps & QA SPECIALIST

CI/CD pipelines, test automation, release engineering and quality assurance — engineered for audit-grade delivery.

CI/CD Selenium Cucumber

Cyber Security & Assurance SPECIALIST

Security architecture, compliance and assurance for regulated environments — DORA, PRA, FCA, NCSC-aligned.

Sec architecture Assurance Compliance

UX, Content & Change SPECIALIST

User-centred design, content design and change management — delivering services people actually use.

User research Service design Change

— TECHNOLOGY STACK

Vendor-fluent, *cloud-native, regulation-ready.*

Microsoft Azure AWS Google Cloud Kubernetes Docker Terraform Ansible Power BI

Tableau Databricks .NET / C# Java Python Node.js React Salesforce SharePoint

Atlassian

03 HOW WE DELIVER

Four stages. *One outcome.*

A simple, governed delivery rhythm — from problem definition through to embedded value, at squad pace.

01

Understand & Shape

Together we define your project scope, identify risks and shape the squad that can deliver the outcome.

Define scope Identify risks

Success metrics Agree SoW

02

Mobilise Squads

Rigorous compliance and onboarding, with stakeholders integrated from day one.

Targeted matching Onboard quickly

Integrate stakeholders

Establish governance

03

Deliver & Optimise

Working features shipped in short, collaborative cycles. Performance optimised, capability scaled.

Iterative cycles Performance tracking

Continuous improvement

Scaling capability

04

Evaluate & Embed Value

Tangible milestone delivery, reduced risk and long-term value embedded into your organisation.

Milestone validation Outcome reporting

Knowledge transfer Long-term value

04 WHERE SQUADS FIT

When a squad is the *right answer.*

A

Acceleration

A project that needs to be delivered at pace — without sacrificing quality, governance or your existing team's focus.

RAPID DELIVERY

B

Critical capability gaps

Specific expertise your team is missing — filled with role-fit specialists who plug straight into your delivery.

SKILLS MATRIX

C

Short & medium-term programmes

High-need expert support sized to the work, with a clear path to outcomes and a defined exit.

FLEXIBLE ENGAGEMENT

Strong presence across London and the South East, broad coverage in the Midlands, North West and South West, with extended reach into Scotland and Wales.

London & South East · Strong

Midlands · Broad

North West · Broad

South West · Broad

Scotland · Extended

Wales · Extended

05 GEOGRAPHIC REACH

UK-wide, *locally deployable.*

Tangible outcomes. *Reduced risk.* Long-term value.

Day 01

Hands-on contribution from a squad that integrates seamlessly with your team.

End-to-end

Governance from scoping through to milestone validation and value embed.

Outcome-led

Measured against tangible delivery milestones, not just hours and headcount.

Plug in the team. *Ship the outcome.*
