Belle's Place

OF CRAWFORDSVILLE

Thoughtful Design

In memory care, thoughtful design can make all the difference. While these apartments may have a smaller footprint than traditional apartments, their layout is intentionally designed to support residents living with memory loss.

A more compact space can be easier to navigate, helping residents move confidently between key areas such as the bedroom, bathroom, and entryway. With fewer turns, longer hallways, or unused spaces, residents often experience less confusion and greater independence in their daily routines.

Our floor plans also feature conveniently located bathrooms with direct sightlines from the bedroom, making them easier to find and access. This simple design consideration can support comfort, dignity, and safety throughout the day.

Smaller spaces also encourage engagement with the broader community. Residents can enjoy a private, personal retreat while spending their days participating in activities, dining with neighbors, and connecting with team members in thoughtfully designed shared spaces.

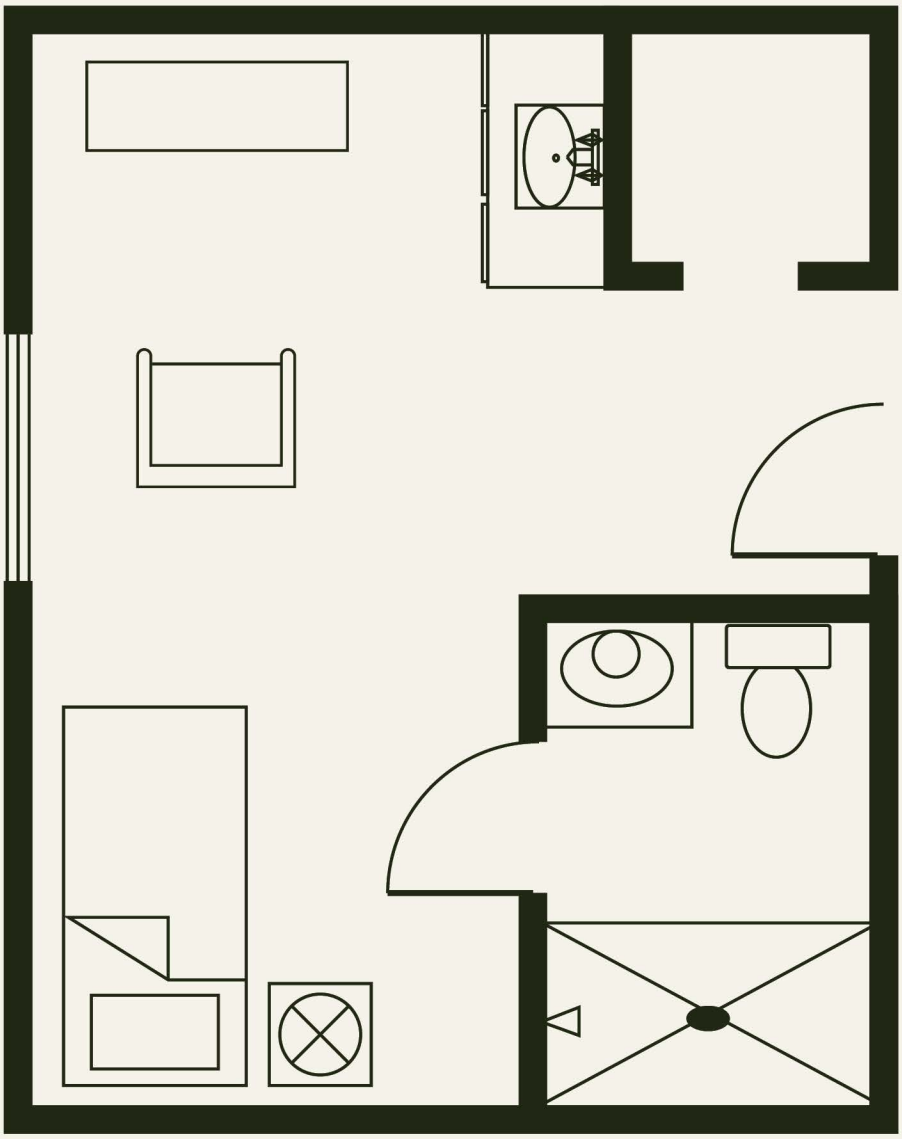

At 1019 Senior Living communities, every aspect of memory care is designed with the resident experience in mind, creating environments that feel comfortable, familiar, and easy to navigate.
