

Condensation & Ventilation Management

Introducing COLORSTEEL DRIDEX®

The better way to roof.

As New Zealand’s favourite roof, COLORSTEEL® has been helping Kiwi’s transform their environments for over 40 years.

Driven by a desire to deliver intelligent solutions for real applications, we’ve developed COLORSTEEL DRIDEX®.

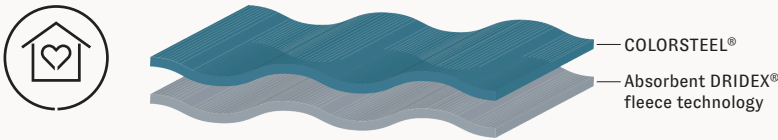

An innovative roofing & wall cladding solution that delivers superior condensation absorption and enhanced ventilation, Dridex® helps to create warmer, drier and healthier New Zealand environments.

- » Recommended for moderate & severe environments - your COLORSTEEL® supplier will be able to recommend what is best for your project.
- » Available in all COLORSTEEL® colours.
- » Without the need for roofing underlay, it can be laid faster and in more weather conditions.
- » Dridex®, like all COLORSTEEL® products, is backed by a range of extensive warranties from New Zealand Steel, offering peace of mind and assurance for many years to come. To learn more about warranties, visit colorsteel.co.nz/warranty.

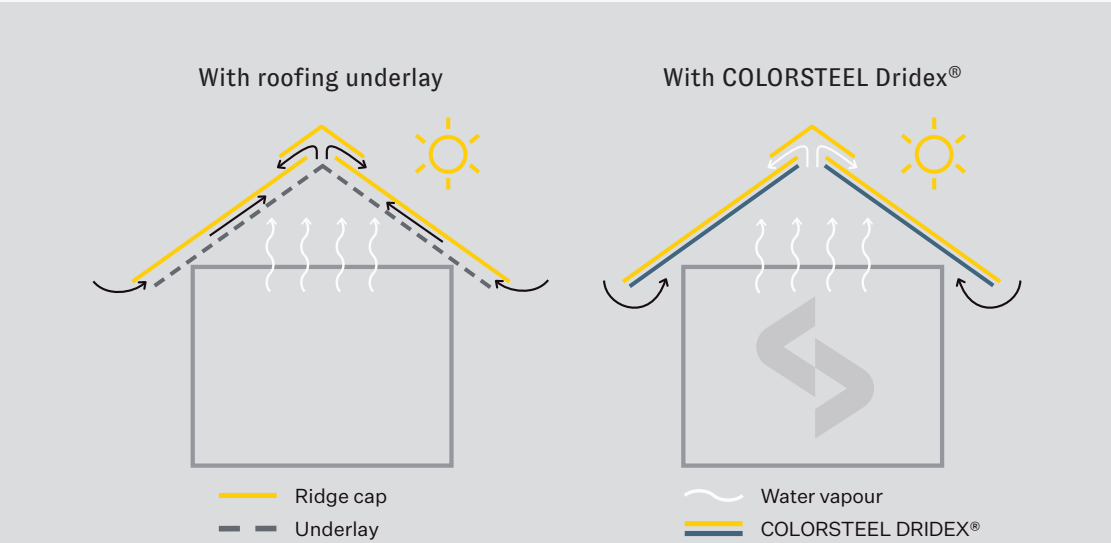

Protecting what matters most.

Dridex® combines a thin layer of specialised absorbent fleece to the underside of each COLORSTEEL® sheet, negating the need for roofing underlay. It works to absorb accumulating moisture from the roof cavity and then releases it when conditions improve.

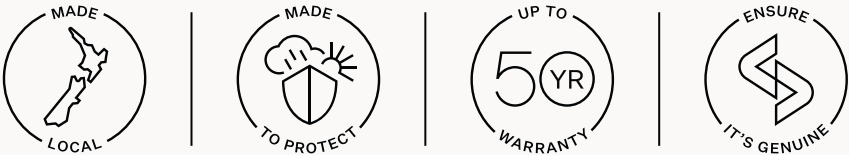

Due to the lightweight properties of water vapour, it tends to find its way into the ceiling cavity, which is why the ceiling is often the first place you will find mould, a known trigger of asthma.

Dridex® works to help reduce mould and other pollutants associated with asthma, respiratory tract inflammations and allergies. That's why it is Sensitive Choice approved by the National Asthma Council, giving you reassurance you have the right product for a warmer, drier and healthier environment.
